Cape Town

TABLE OF CONTENTS.

	PAGE
AGRICULTURAL ...	1-32
Cereals. —Wheat, Emmer, Oats, Barley, Rye, Maize, Teosinte, Sorghums, Millets ...	1-9
Grasses ...	10-16
Fertilisers ...	16
Legumens. —Lucerne, Clovers, etc., Beans, Peas, Vetches, etc. ...	17-24
Root Crops. —Mangolds and Beets, Turnips, Swedes, Other Roots ...	24-26
Tobacco and Fibre ...	27-28
Miscellaneous. —Rape, Kale and Mustard, Melons and Gourds, Miscellaneous Fodder Crops ...	28-32
VEGETABLE ...	33-62
Legumens. —Peas, Cow Peas, Dwarf Beans, Sugar Beans, Runner Beans, Lima Beans, Broad Beans, Other Legumens ...	33-37
Roots. —Artichokes, Beet, Carrots, Onions, Parsnips, Radishes, Swedes, Turnips, Other Roots ...	37-42
Brassicas. —Broccoli, Brussels Sprouts, Cabbages, Savoy Cabbages, Cauliflowers, Kale, Kohl-Rabi or Knolkool ...	42-46
Cucurbits. —Calabashes, Cucumbers, Musk Melons, Water Melons, Pumpkins, Squash & Vegetable Marrows ...	46-52
Miscellaneous. —Artichokes (Globe), Asparagus, Celery, Egg Plant, Gooseberries, Herbs, etc., Lettuce (Cabbage), Lettuce (Cos), Okra or Gumbo, Rhubarb, Spinach, Sweet Corn, Tomatoes, Popular Parcels ...	52-62
ORNAMENTAL ...	63-128
Sweet Peas ...	63-64
Herbaceous Perennials ...	65-78
Annuals and Other Bedding Plants ...	79-89
Bulbous Plants ...	90-99
Rockery Plants and Succulents ...	100-102
Pot Plants. —Ferns, Palms, Others ...	102-107
Creepers ...	108-110
Roses ...	111-116
Hedge Plants ...	116-117
Shrubs, etc. ...	118-122
Trees. —Forest and Ornamental ...	122-128
Kitchen Garden Fruits and Sundries ...	128

BOOKS. —Agricultural and Horticultural Literature ...	141-142
INDEX ...	142-144
STOCK and POULTRY FOODS ...	Inside back cover

SEEDS AND PLANTS FOR 1920

SPECIAL NOTICE.

It will always be our endeavour to supply the very best and freshest Seeds, true to the descriptions given in this catalogue, but it is a condition of sale of all Seeds and Plants sent out by us, that, though we give you our assurance that we are using all reasonable care in the selection, we give no warranty, either as to description or productiveness, and we accept no responsibility in regard to the crop or failure of crop. All orders are booked on the understanding that these conditions are agreed to, but we also notify to the same effect on the invoice and if the conditions are not acceptable to you the goods should be returned at once.

When this Catalogue is printed many varieties herein quoted will not yet have arrived from oversea: others may have been sold out in the meantime, and in many cases the prices fluctuate. Quotations are, therefore, without engagement, but where the price is mentioned on the order we will refer back for confirmation if an increased rate has to be charged. If we fail to do this, the goods can be returned if the price is not approved.

Five per cent. can be deducted if cash is sent with order

CEREALS

It is no idle boast of the Western Province that it produces the finest seed grain to be found anywhere in South Africa and as importers of seed grain from all parts of the world, we can affirm that the grain grown in this neighbourhood is equal or superior to most imported seed. Special strains have been developed which are now thoroughly proved and the northern agriculturist knows that for a change of seed he must come to these parts in order to get the best results.

Situated, as we are, immediately contiguous to the principal grain growing districts, we have special opportunities, both at Mowbray and at Moorreesburg, to select the very best seed that is produced by the most reliable growers. Knowing practically every important grower intimately, we are able to judge as to those qualities which evade detection in the ordinary way. We judge, not only the seed, but the grower. A careful grower can rely on a better price from us for his seed grain and our clients throughout the country reap a special advantage in being able to secure from us the best that local experience can help us to obtain.

Apart from the original selection indicated above, there are other weighty reasons why our seed can not be equalled. The machinery which we have installed here and at Moorreesburg is thoroughly up-to-date and cannot be matched in this country. All the seed grain sent out by us has been selected in the careful manner described and has also been re-cleaned in a most drastic fashion.

Local growers, after seeing what we remove from their seed grain though it may have appeared thoroughly clean at the start, almost invariably arrange with us for a supply of the re-cleaned seed for their next season's sowing or send as their own seed to be re-cleaned in the same manner. For this latter service we shall be pleased to quote for lots of 20 bags and upwards.

The lists which follow will be found fairly exhaustive, but if variety you want is not found there, kindly write about it because we often secure additional varieties after the catalogue has gone to press.

Wheat.

(*Triticum sativum*, Lam.)

Gluyas Early.—A beardless white wheat of excellent milling quality, a good yielder and does not shell easily. It is highly rust-resistant and ripens early.

Sold out for 1920.

Long-Eared Rieti.—This wonderful rust-resisting variety is now so well known that it hardly needs description. It has very long ears, is a bearded wheat and a splendid yielder, especially when the season is a wet and late one. The grain is of dark colour, but the flour produced is very white and it is a highly valued milling wheat.

Sold out for 1920.

Spring Early.—A bearded white variety of excellent milling quality and a splendid yielder. Good seed is scarce and, unfortunately, much of that now available shows a little mixing of other varieties. This defect it is impossible to eliminate after thrashing. It is a matter for the grower because the "rogues" must be stripped in the field before harvesting.

Sold out for 1920.

Florence.—One of the earliest of all varieties and it has proved rust-resistant in a high degree. It is a beardless white wheat of excellent milling quality.

Sold out for 1920.

Primrose.—A recently introduced white wheat which has given very good results in the grain-growing districts of Caledon and the Koeberg.

Sold out for 1920.

Darlván.—A hybrid from "Darling" and Van Niekerk. It has been giving consistently good results for several seasons. Sometimes referred to as "Dolphin" which is simply a corruption of the original name.

Sold out for 1920.

Union 31.—Several of the "Union" hybrids continue to give very good results and No. 31 has certainly been very consistent. It is rust-resistant.

Sold out for 1920.

WHEAT—continued.

Brown Caledon Baard.—Has been grown for many years in the Caledon District with success. It is a bearded wheat of excellent milling quality.

Sold out for 1920.

Du Toit's.—A beardless white wheat with small grain of excellent milling quality. It is an old variety of the Western Province and a good drought resister.

Sold out for 1920.

Union 17.—A "Union" hybrid which has withstood the test of field cropping for several years. It is a good rust-resister and reliable cropper.

Sold out for 1920.

Alaska Winter.—A comparatively new variety introduced by us from Alaska. It has a large and branching head and has given phenomenal results in some parts. We have had several excellent reports about it from the O.F.S.

Re-cleaned Seed : Per lb $1\frac{1}{3}$; 25 lbs 25/-

Apulian Durum.—The Durum varieties are of considerable value as drought and rust resisters. Apulian has been one of the most successful of these and should prove of considerable value along the coast from Caledon to Port Elizabeth. It has also given good results in the Transvaal.

Sold out for 1920.

American Durum.—We have been listing this Durum variety for a number of years and it still maintains its popularity.

Sold out for 1920.

Medeah.—A favourite variety in the South Western Districts of the Cape, all along the coast from Caledon to Port Elizabeth where it is highly rust-resistant and a very reliable cropper. It is one of the best of the Durums but good seed is very scarce indeed.

Sold out for 1920.

Persian Black.—This variety promises to become a prime favourite in the South Western Districts of the Cape owing to its great rust-resisting qualities and the consequent heavy yields obtained from it. It stools well and grows to as much as 6 ft. in height with a strong straw. It matures about the same time as Medeah.

Sold out for 1920.

Coastal King.—A new variety, similar to Persian Black, but has longer ears and is a remarkably strong grower and great rust-resister. A photograph of a stool of this variety sent to us shows a height of 5 ft. 9 in. although the soil on which this was grown is said to have a depth of but 6 inches before sub-soil is reached.

Sold out for 1920.

Emmer.

(*Triticum sativum*, var. *dicoccum*.)

Emmer.—A variety of wheat which is not suitable for milling purposes, but largely grown for stock feeding for which it may be used green or may be made into hay. When thrashed the glumes remain attached to the grain and in this form it is splendid feed for horses and any other livestock. Emmer is a great drought resister and may also be used as a grazing crop.

Imported Seed : 1/6 per lb ; 25 lbs at 1/3 per lb.

Oats.

(*Avena sativa*.)

Algerian.—Now more extensively sown throughout South Africa than any other variety. It is the standard sort for the Cape Oat-hay so favourably known throughout this country. It also yields a heavy crop of grain and is largely sown for thrashing, while for grazing purposes it probably has no equal. As a rust-resister it surpasses all others. It is a late—that is, slow-maturing—variety.

Recleaned Seed : Per lb 6d ; 25 lbs 8/6 ; 100 lbs 30/- ; per bag of 150 lbs 42/-

Texas.—Next to Algerian this is the most popular variety of Oat in the Western Province. It is very similar to Algerian and quite its equal either for a grain crop or for hay with an undoubted advantage in that it matures a week earlier.

Sold out for 1920.

River Plate or South American.—In type this is similar to Algerian and Texas and matures about two weeks earlier than the former. It makes excellent hay and in every way it is equal to the varieties mentioned and is even preferred by some growers. A recent introduction of imported seed has freshened the local strains.

Recleaned Seed : Per lb 6d ; 25 lbs 8/6 ; 100 lbs 31/6 ; per bag of 150 lbs 45/-. First crop from imported seed.

Kudukura.—A new variety introduced by us in 1917 and selected on its appearance as a likely rust-resisting milling oat. The grain is the best milling quality of any oat we have seen that is likely to resist rust under our conditions. Thus far it has been successful. A few bags only available.

Recleaned Seed : Per lb 6d ; 25 lbs 9/6 ; 100 lbs 35/- ; per bag of 150 lbs 50/-

Burt.—A quick-growing, prolific and sure-cropping Spring Oat. It is the best rust-resister we know of this type.

Imported Seed : Per lb 1/- ; 25 lbs 22/6 ; 100 lbs 40/-

Barley.

(*Hordeum sativum*, Jessen.)

Cape Six-Rowed.—An intensely popular variety on account of its splendid yielding qualities. It thrives throughout South Africa and may be called the standard variety of this country. Thousands of bags are purchased annually by the Breweries for malting. Good prices are obtained for good-coloured, plump and carefully thrashed parcels.

Recleaned Seed: Per lb 6/-; 25 lbs 10/-; 100 lbs 36/-; per bag of 150 lbs 50/-

Cape Early.—In type this is the same as Cape Six-Rowed, but it grows rapidly and thus matures earlier. It is very largely sown for early green fodder and is a splendid crop for the purpose. It also gives a good yield of the thrashed grain and suits districts where drought sets in too early for other varieties. Reliable seed is very scarce.

Sold out for 1920.

Beardless Spring.—Makes a quick-growing crop of excellent and nutritious green fodder. It will also make a good grain crop, although its value is as an early forage crop, either fed green or cured for hay for which it should be cut when the grain is in the milk stage. For thrashing it should be cut before fully ripe as it shells easily and the grain would otherwise be lost.

Sold out for 1920.

Nepal or Beardless Barley-Wheat (*Hordeum trifurcatum*, Jacq.)—An excellent variety for green fodder, especially for the earliest sowings, for which it is largely grown. It also makes a heavy grain crop that commands a good price. It is not a hybrid from barley and wheat as some believe, but in reality a “naked” barley, the grain being free from the glume like wheat. Good seed is scarce.

Sold out for 1920.

Rye.

(*Secale cereale*, L.)

Cape Early.—This variety is universally grown in the grain districts of Western Cape Province. It is quick-growing and a very heavy yielder. It withstands rust successfully in these parts and is also sown in the North with good results.

Recleaned Seed: Per lb 6d; 25 lbs 10/-; 100 lbs 37/6; per bag of 200 lbs 70/-

Mammoth Winter.—Much favoured as a grazing crop as it is a late variety and consequently continues to give a leafy growth, suitable for grazing, for a longer period than the early varieties.

Recleaned Seed: Per lb 1/3; 25 lbs 27/6; 100 lbs 100/- (Imported).

Maize.

(*Zea Mays*, L.)

Hickory King.—A standard late white variety, probably more largely grown than any other. Being a late-maturing sort it does best in a wet season or when, for other reasons, the longest growing period is obtainable. It is not so well suited to districts with a short season. Under favourable conditions it is probably the heaviest yielder of all varieties of maize.

Graded Seed : Per lb 6d ; 25 lbs 7/6 ; 100 lbs 25/- ; 200 lbs 45/-

Potchefstroom Pearl.—A medium early white variety having broad flat grain which yields a high percentage of sifted meal. It was derived from Champion White Pearl by selection. It has given excellent results, especially in the Transvaal.

Graded Seed : Per lb 6d ; 25 lbs 7/6 ; 100 lbs 25/- ; 200 lbs 45/-

Iowa Silver Mine.—A medium early white variety, well suited to districts with a short growing period owing to late rainfall. Always a favourite.

Graded Seed : Per lb 6d ; 25 lbs 7/6 ; 100 lbs 25/- ; 200 lbs 45/-

Flat White (Hickory King Type).—This is offered for growers who do not wish to produce a seed crop but grow for fodder or silage. It is machine-graded seed of Hickory King type.

Graded Seed : Per lb 6d ; 25 lbs 6/- ; 100 lbs 20/- ; 200 lbs 37/6

Eureka.—Early, yellow dent. A robust grower and heavy cropper. It has a red cob from 10 to 14 inches in length, well packed with 14 to 26 rows of grain. It is a prime favourite among the yellow varieties and its great merit lies in early maturity, drought resistance and heavy yield.

Graded Seed : Per lb 6d ; 25 lbs 7/6 ; 100 lbs 25/- ; 200 lbs 45/-

Chester County Mammoth.—Early, yellow dent. A most valuable variety in districts with a short season. The grain closely resembles that of Eureka, but is perhaps a little smaller.

Graded Seed : Per lb 6d ; 25 lbs 7/6 ; 100 lbs 25/- ; 200 lbs 45/-

Orangia Yellow.—A medium early variety of round yellow maize. This popular variety provides immense quantities of grain for the South African market and large quantities are also exported. It is probably more largely grown than any other yellow variety. It is well suited for fodder and silage.

Graded Seed : Per lb 6d ; 25 lbs 5/6 ; 100 lbs 18/6 ; 200 lbs 35/-

Teosinte.

Teosinte (*Euchlaena Mexicana*, Schrad. Syn. *Recna Luxurians*, Dur.)—Somewhat resembles maize, to which it is closely allied. It produces an immense quantity of large and leafy growth which is excellent for fodder or silage. The seed is often a little difficult to germinate and it is desirable to soak it overnight in hot water before sowing. The plant requires a fairly long season to produce a heavy growth and likes warm, moist conditions. Sow about five pounds of seed per acre in drills 3 ft. apart.

Seed : Per lb 7/6 ; very scarce at present.

Sorghums.

(*Sorghum vulgare*, Pers.)

Most useful forage plants producing heavy crops on any well-worked average soil during the hottest months. On rich alluvial land they give an enormous yield. Sorghum may either be cut green for fodder or silage or may be ripened and cut into chaff.

Early Amber Cane Sorghum.—A saccharine variety and perhaps one of the best for a fodder or silage crop.

Seed: Per lb 6d; 25 lbs 9/6; 50 lbs 17/6; 100 lbs 30/-

Sorghum Saccharatum.—A saccharine variety and heavy cropper for fodder or silage.

Seed: Per lb 1/-; 25 lbs 22/6; 50 lbs 40/-; 100 lbs 75/-

Feterita.—A non-saccharine variety which we introduced from America in 1916. It has proved very successful on account of its great drought-resisting properties. In appearance of grain it is similar to White Kaffir Corn.

Seed: Per lb 9d; 25 lbs 10/6; 50 lbs 20/-; 100 lbs 37/6

White Kaffir Corn.—Non-saccharine. A great drought resister and too well known in South Africa to need description here. It provides the bulk of the Corn that is exported and immense quantities are also used locally.

Seed: Per lb 6d; 25 lbs 7/6; 100 lbs 25/-; 200 lbs 45/-

Sudan Grass.—A recent introduction. Sudan Grass is much thinner in the straw than the other varieties of Sorghum and a crop of it, if not too tall, much resembles a crop of oats. It is splendid for a grazing crop and may be cured for hay in which form it is highly nutritious. Since its introduction it has made rapid strides and it is undoubtedly a crop of great value. Sow in spring like other sorghums, about 10 to 15 lbs. per acre. It stools well.

Seed: Per lb 2/3; 25 lbs 50/-; 50 lbs 95/-; 100 lbs 180/-

Long Brush Evergreen Broom Corn.—One of the tall-growing varieties of broom corn. It makes a good brush and when well grown makes a heavy yield of broom. It is also useful as a fodder crop and even when grown for the broom, there is much valuable fodder that can be used on the farm.

Seed: Per lb 9d; 25 lbs 12/6; 50 lbs 22/6; 100 lbs 40/-

Oklahoma Dwarf Broom Corn.—Grows 4 to 5 ft. high and it is claimed that this variety makes the finest quality broom. It may also be grown as a fodder crop.

Seed: Per lb 9d; 25 lbs 15/-; 50 lbs 27/6; 100 lbs 50/-

Millets.

Boer Manna (*Setaria italica*.)—A white-seeded Millet largely grown for hay in the Transvaal. Hitherto it has been the best known of the Millets in South Africa, but of recent years Japan

MILLETS—continued.

Barnyard Millet has made rapid strides and is now also very extensively grown. The seed of Boer Manna is used for many purposes and usually commands a good price.

Seed: Per lb 1/-; 25 lbs 22/6; 50 lbs 40/-; 100 lbs 75/-

German Millet (*Setaria italica*, var. *germanica*).—Very much like Boer Manna and a very heavy cropping variety of that type. It should be sown fairly thickly, otherwise, owing to its strong growth, the hay is likely to be rather coarse. For the same reason it should not be allowed to harden the seed before cutting. It yields a very heavy seed crop if allowed to ripen.

Seed: Per lb 1/9; 25 lbs 35/-; 50 lbs 65/-; 100 lbs 125/-

Japan Barnyard Millet (*Panicum crus galli*, L.).—One of the most valuable of the Millets whether for a seed or hay crop. It is a rapid grower and yields an immense quantity of green fodder, or it may be cured into very nutritious hay. If allowed to ripen it yields a very heavy seed crop which is always in good demand and commands a good price.

Seed: Per lb 1/-; 25 lbs 17/6; 50 lbs 32/6; 100 lbs 60/-

N'youte or Pearl Millet (*Pennisetum spicatum*).—A vigorous grower yielding an immense crop of green fodder in the hottest summer months. It should be cut before flowering to avoid waste in feeding, which will occur if the stems are allowed to harden. It is specially suited to hot, dry and sandy situations and will thrive under conditions which would be practically impossible for any other crop. If cut early several cuttings may be taken in the season. It also yields a very heavy grain crop if allowed to mature and the grain is in good demand at a fair price.

Seed: Per lb 6d; 25 lbs 7/6; 50 lbs 13/6; 100 lbs 25/-

Napier's Fodder or Elephant Grass (*Pennisetum purpureum*).—A perennial species. It suckers freely and propagation is by root division and cuttings, as it is a shy seeder and seed is not obtainable in commercial quantity. The stems may attain a height of 10 to 12 ft, and under natural conditions in British East Africa it forms a dense reed jungle. As a fodder plant it is of very great value, as cuttings of succulent green food may be taken in quick succession during the summer months. Planting should be carried out after growth has commenced in the spring, or severe loss of plants may occur as it does not like being disturbed in the collar season.

Plants: 2/- per doz.; 10/- per 100

Rapoko (*Eleusine coracana*, Gaertn.).—This is not a true Millet, but is listed here because the grain is much like a Millet and is cropped in a similar manner. Rapoko grows well in the late summer, enduring great heat and is well worth a trial for late summer pasture. As a grain crop it is extensively grown in Rhodesia by the natives and in some parts it is their staple food.

Seed: Per lb 6d; 25 lbs 10/-; 50 lbs 17/6; 100 lbs 30/-

The "Kudu" Process of Formaldehyde Treatment for Smut in Grain.

The **Kudu-Formal** treatment for smut is simple and effective and does not injure the seed. It is important that the dipping solution should be made the right strength. Mix as under:—

FOR WHEAT AND OATS.

1 oz. (2 tablespoons)	Kudu-Formal to	3 gallons water
or 1 lb. ($\frac{1}{10}$ th gallon)	Kudu-Formal to	48 gallons water
or 1 pint ($\frac{1}{8}$ th gallon)	Kudu-Formal to	60 gallons water
or 1 gallon (10 lbs.)	Kudu-Formal to	480 gallons water

FOR BARLEY.

1 oz (2 tablespoons)	Kudu-Formal to	2½ gallons water
or 1 lb. ($\frac{1}{10}$ th gallon)	Kudu-Formal to	40 gallons water
or 1 pint ($\frac{1}{8}$ th gallon)	Kudu-Formal to	50 gallons water
or 1 gallon (10 lbs.)	Kudu-Formal to	400 gallons water

The seed may be treated on a clean floor or tarpaulin by spraying the solution over and working the seed over continually to make sure that every part of the seed is thoroughly wetted. Then work the grain up into a heap and allow to remain over-night, or for at least 5 hours, covered with sacks to keep in the gas that is generated. Afterwards, remove the covering and spread the seed sufficiently to allow it to dry off for sowing.

Another method is by dipping. The sacks should not be full otherwise they are likely to be burst by the expansion of the grain. Wooden barrels are best for dipping as iron vessels are liable to corrosion. Dip the seed in the solution for about ten minutes, moving it about to help the solution penetrate to every part of the grain. Then lift out the sacks and drain them over the barrels. Allow the grain to remain in the sacks overnight and cover up or throw the grain out and heap up and treat further in the same way as when the spraying method is used.

It is most important that the sacks and all utensils should be dipped in or washed with the solution, otherwise the grain will be re-infected before sowing. Don't forget to wash the seed drill also, or the "zaazak" if broadcasting.

The spores of smut are found everywhere, every season, and it is imperative that all seed should be treated before sowing.

On an average it takes a little more than a gallon of solution to treat each bushel of oats and a little less than a gallon to treat each bushel of wheat. But, of course, the quantity varies according to the methods employed and the care with which the work is done. It follows that 1 lb. of **KUDU-FORMAL** is approximately sufficient for 15 sacks of Wheat and 12 sacks of Barley or Oats.

Mix fresh solution each day and keep all containers covered as much as possible to prevent deterioration of the solution.

Kudu-Formal.—Per 1 lb bottle 5/- ; 5 lb jar 21/- ; 10 lb jar 37/6

GRASSES.

Creeping Bent Grass or Fiorin (*Agrostis stolnifera alba*).—Very useful in Lawn and Pasture Mixtures. It starts growth earlier and continues later than many other grasses commonly used in such mixtures and thus fills a gap that would otherwise be apparent.

Seed: Per lb 3/-; 25 lbs 60/-; 50 lbs 115/-; 100 lbs 225/-

Red Top or Herd's Grass (*Agrostis vulgaris*).—A very hardy perennial grass, succeeding in moist situations and also on drier land and light, sandy soils. It stands a hot climate admirably and remains green for the greater part of the year. It has a creeping root-stem and thickens into a very close turf. It is nevertheless easily eradicated if the land has to be brought under cultivation again. It is one of the most important pasture grasses in the Southern States of America. Sow 12 to 15 lbs. per acre.

Seed: Per lb 3/-; 25 lbs 70/-; 50 lbs 130/-; 100 lbs 250/-

Tall Oat Grass (*Avena elatior*, L.).—A most valuable perennial pasture grass, on account of its early and luxuriant growth. It is also splendid for a hay crop and may be cut twice and often three times. It is very hardy and withstands the extremes of heat and drought and adapts itself to almost any class of soil, being best suited to rather dry, light lands. When sown in autumn it produces a much heavier growth the following summer than from a spring sowing. Sow 30 lbs. to the acre.

Seed: Per lb 4/6; 25 lbs 105/-; 50 lbs 205/-; 100 lbs 400/-

Hungarian Forage Grass (*Bromus inermis*, Leyss.).—An awnless species of Brome Grass. It is a tall perennial with strong creeping rootstock and is proving a very valuable forage grass. It is a good drought resister and furnishes a good crop of hay with a quick after-growth which makes excellent grazing. Sow 30 lbs. per acre.

Seed: Per lb 3/-; 25 lbs 70/-; 50 lbs 130/-; 100 lbs 250/-

Rhodes Grass (*Chloris gayana*, Kunth.).—A great drought resister, but is tender to frost. It makes splendid growth in summer and is suitable for pasturing and also for hay. The seed may be sown thinly because the plant spreads by rooting at the nodes and will quickly thicken up under conditions that are to its liking. Sow, 8 to 10 lbs. per acre.

Seed: Per lb 3/3; 25 lbs 75/-; 50 lbs 140/-; 100 lbs 275/-

Plants: 2/6 per 100; 20/- per 1000

Quick or Bermuda Grass (*Cynodon dactylon*, Pers.).—Of dwarf habit with long, creeping stems rooting at the joints, and covering the ground with a matting of fine turf which no amount of trampling will impair. It is very useful for binding drifting sands and for steep embankments subject to wash. Unsuitable for temporary pasture, but for permanent pasture on dry, sandy lands and for lawns, it is of considerable value. Seed is very difficult to germinate. It should be sown in warm weather at the

rate of 15 lbs. per acre and must be kept moist until the young plants are established.

Seed : Per oz 6d ; $\frac{1}{4}$ lb 1/6 ; 1 lb 5/-

Roots : 7/6 per sack ; large quantities quoted specially.

"Velvety" Florida Grass (*Cynodon* Sp.).—Our "Velvety" strain of Florida Grass has been derived from specially selected plants and propagated here at the Cape. It has surpassed our expectations as a drought resister, remaining beautifully green during the heat and drought of summer, and making a lovely, velvety lawn. Plants are sent out in the form of small sections which may be further sub-divided and planted 9 inches apart each way.

Plants : 25/- per 100 sections (6/9 per 25)

Cocksfoot (*Dactylis glomerata*, L.).—A very hardy and productive perennial suitable for pasture and for hay. If cut before flowering it is less hard and the pith of the stem is soft and sweet. Stock of all kinds are fond of it, either dry or green, and it stands constant cropping particularly well. It can stand considerable shade. Sow 30 lbs. per acre.

Seed : Per lb 3/- ; 25 lbs 67/6 ; 50 lbs 130/- ; 100 lbs 250/-

Rapoko (*Eleusine coracana*, Gaertn.).—Grows well in the late summer, enduring great heat and is well worth a trial for late summer pasture.

Seed : Per lb 8d ; 25 lbs 10/- ; 50 lbs 17/6 ; 100 lbs 30/-

Teff (*Eragrostis abyssinica*, Link.).—Undoubtedly the finest summer hay crop yet introduced. It has made rapid strides in South Africa and is now more largely grown in this country than any other similar hay crop. Its nutritive qualities when cured are rated very high indeed and its advent has certainly been of immense importance to South Africa. Other countries also are now looking for this fine crop and seed is consequently exported to all parts. In short, it is the finest hay crop yet known for summer rainfall conditions. Sow 5 to 6 lbs. per acre.

Seed : Per lb 1/- ; larger quantities quoted in season.

Tall Fescue or Southey's Tussock Grass (*Festuca elatior*, L., sub-sp. *arundinacea*, Syme.).—A most robust grower and gives an immense amount of feed. It is suitable either for grazing or for hay. Although it delights in a moist situation, it will thrive under widely different conditions and may be regarded as a drought resister. The most recent South African experience locates this grass to the highveld and to high-lying lands, for on low, wet lands it becomes coarse and of lower feeding value. Sow 25 lbs to the acre.

Seed : Per lb 3/- ; 25 lbs 60/- ; 50 lbs 115/- ; 100 lbs 225/-

Plants : 2/- per 100 ; 10/6 per 1000

Meadow Fescue (*Festuca pratensis*, L.).—This perennial grass thrives on most soils, is excellent for permanent pasture, and is well liked by all kinds of stock. It makes splendid hay, the foliage being tender, succulent and highly nutritious. Perhaps not so hardy as Tall Fescue, but certainly far superior to it in quality and should be more largely sown. Sow 30 lbs. per acre.

Seed : Per lb 3/3 ; 25 lbs 75/- ; 50 lbs 145/- ; 100 lbs 280/-

Red Fescue (*Festuca rubra*, L.).—A creeping-rooted species, forming a close and lasting turf, and especially adapted to dry, sandy soils. It resists extreme drought and is valuable for shady places in lawns, as well as for golf courses and for binding shifting sand. Sow 30 lbs. per acre.

Seed: Per lb 3/-; 25 lbs 65/-; 50 lbs 125/-; 100 lbs 240/-

Italian Rye Grass (*Lolium multiflorum*, Lam. Syn. *Lolium italicum*, A. Br.).—A biennial hay and fodder grass of very great economic value. It is well known in other countries, but in South Africa its value is not yet fully appreciated. It likes moist, rich land, but will grow in a variety of situations. It will, under favourable conditions, give two or three cuttings a year. Sow 25 to 30 lbs. per acre.

Seed: Per lb 1/3; 25 lbs 27/6; 50 lbs 52/6; 100 lbs 100/-

Perennial Rye Grass (*Lolium perenne*, L.).—The Rye Grasses must necessarily fill a very important position in the agricultural development of this country as they have done in other great agricultural countries. For permanent pasture and for hay they are unsurpassed. It is true, they like good and moist land, but as agricultural methods improve they will find the conditions they like and will certainly prove of immense value. This development is already taking place in many parts and will assuredly continue. The perennial variety is best for permanent pasture, but it is preferably sown with an equal quantity of Italian which gives a quick return while the other is establishing itself. Sow 30 lbs. per acre.

Seed: Per lb 1/3; 25 lbs 22/6; 50 lbs 42/6; 100 lbs 80/-

Mixed Rye Grass (*Lolium* sp.).—Mixed seed of the Perennial and Italian varieties can often be obtained cheaper than the separate varieties and it is thoroughly good practice to sow the two together because the Italian variety gives the best return the first year when little can be expected from the Perennial kind. Later, the Italian dies out and the Perennial holds the land exclusively. Thus, the same results are obtained at a lower cost.

Seed: Per lb 1/-; 25 lbs 20/-; 50 lbs 35/-; 100 lbs 60/-

Paspalum dilatatum, Poir.).—A tussock grass of great value and now well known. It likes moist situations but is also a great drought resister excepting on very sandy soil. The seed requires three to four weeks of warm, moist conditions to germinate, but will often lie underground during unfavourable weather and germinate when the conditions are to its liking. Sow in the spring at the rate of 15 to 20 lbs. per acre.

Seed: Per lb 1/3; 25 lbs 25/-; 50 lbs 47/6; 100 lbs 85/-

Plants: 2/- per 100; 10/6 per 1000

Creeping-Rooted Paspalum (*Paspalum stoloniferum*).—We recently introduced this species in the hope that it would prove a valuable addition to our grasses as it is likely to prove more frost resistant than the other kinds.

Seed: Per oz 1/-; ¼ lb 2/6; 1 lb 7/6

Plants: 3/- per 100; 25/- per 1000

Upright Paspalum (*Paspalum virgatum*).—Of more upright growth than *P. dilatatum* and stands better against the extreme

of cold and drought. During recent years this species has made rapid strides and is now largely sown. Sow 15 to 20 lbs. per acre.

Seed: Per lb 3/6; 25 lbs 82/6; 50 lbs 160/-; 100 lbs 300/-

Plants: 2/- per 100; 12/6 per 1000

Buffel Grass (*Pennisetum cenchroides*).—A valuable summer grass. It has proved of great value on our farm in the Vryburg district where it lives through the cold winter and resumes its growth as soon as favourable conditions arrive.

Seed: Trial pkt. 1/-; oz. 2/6

Plants: 3/- per 100; 25/- per 1000

Kikuyu Grass (*Pennisetum longistylum*).—This valuable grass has recently come from East Africa and has made wonderful progress here. It has a creeping root-stock and covers the ground with a dense growth. It makes wonderfully rapid growth in summer and in warmer districts it also makes good growth in winter. For pastures and for lawns, etc. it is of very great value.

Plants only: 2/- per 100; 10/6 per 1000 ready for planting.

Toowoomba Canary Grass (*Phalaris bulbosa*, L.).—This valuable perennial grass may be described as a winter and summer grower, for it appears to accommodate itself to all conditions. When drought comes the roots thicken and retain some nutriment to support life under this adversity. This characteristic, from which the specific name is derived, is not very noticable when growing in moist situations. It grows to a height of 5 or 6 ft. and may be cut many times each year or it may be grazed.

Seed: Per oz 1/-; $\frac{1}{4}$ lb 2/6; 1 lb 7/6; 25 lbs 160/-

Plants from a special drought-resisting strain: 2/6 per 100; 20/- per 1000

Canary Grass (*Phalaris canariensis*).—This species produces the well known bird seed of commerce. It is an annual. The crop is a valuable one as there is a good demand for the seed at favourable prices. It thrives in most grain-growing districts.

Seed: Per lb 1/6; 25 lbs 30/-; 50 lbs 55/-; 100 lbs 100/-

Cape Canary Grass (*Phalaris* sp.).—An annual species very much like *P. canariensis* but producing a much smaller seed of darker colour. It thrives in the W. Province where it appears to be indigenous and is of considerable value for pasture and as a forage crop.

Seed: Per lb 1/-; 25 lbs 15/-; 50 lbs 27/6; 100 lbs 50/-

Timothy (*Phleum pratense*, L.).—This is considered the most nutritious of all the English hay and pasture grasses. Unlike many perennials, it produces probably its best results the first year after sowing. It is capable of enduring the extremes of heat and cold and may therefore be used at high altitudes. Sow 20 lbs. per acre.

Seed: Per lb 2/3; 25 lbs 45/-; 50 lbs 90/-; 100 lbs 175/-

Smooth-Stalked Meadow Grass or Kentucky Blue Grass (*Poa pratensis*, L.).—A perennial grass which succeeds in almost any soil and stands long-continued dry weather. A most valuable pasture grass, but takes two or three years to become well

established. It is, therefore, recommended for sowing in mixtures with other grasses that mature more quickly. Sow in the autumn or spring according to rainfall, 30 lbs. to the acre.

Seed : Per lb 3/3; 25 lbs 72/6; 50 lbs 140/-; 100 lbs 275/-

Marram Grass (*Psamma arenaria*).—Extensively used in many parts of the world for fixing drift-sand. It is largely used by our own Forest Department for this work. The seed should be sown on a sheltered spot as it can not be expected to germinate on moving sand. When a small plot has been established further propagation can be carried on by root-division and the plants may then be placed in the permanent situation.

Seed : Per lb 3/-

Coarse or Buffalo Quick (*Stenotaphrum glabrum*).—This is the coarse quick so commonly used for lawns here at the Cape.

Roots : 5/- per sack ; large quantities quoted specially.

Japanese Lawn Grass (*Zoysia pungens*).—New introduction.

Seed : Per oz 1/6 ; $\frac{1}{4}$ lb 5/-

Starke's Kudulawn Mixture.—The best of all Lawn Grass seed mixtures.

Seed : Per lb 2/9; 25 lbs 60/-; 50 lbs 110/-; 100 lbs 200/-

Pasture Mixtures.

No. 1 Pasture Mixture.—A mixture of the best pasture grasses specially selected to suit *dry* situations in districts with a *winter rainfall*.

Per 20 lbs 32/6; 40 lbs (1 acre) 62/6; 100 lbs 150/-

No. 2 Pasture Mixture.—A mixture of the best pasture grasses specially selected to suit *wet* situations in districts with a *winter rainfall*.

Per 20 lbs 32/6; 40 lbs (1 acre) 62/6; 100 lbs 150/-

No. 3 Pasture Mixture.—A Mixture of the best pasture grasses specially selected to suit *dry* situations in districts with a *summer rainfall*.

Per 20 lbs 32/6; 40 lbs (1 acre) 62/6; 100 lbs 150/-

No. 4 Pasture Mixture.—A mixture of the best pasture grasses specially selected to suit *wet* situations in districts with a *summer rainfall*.

Per 20 lbs 32/6; 40 lbs (1 acre) 62/6; 100 lbs 150/-

Special Highveld Pasture Mixture.—A mixture of the best pasture grass specially selected to suit "highveld" conditions.

Per 20 lbs 35/-; 40 lbs (1 acre) 67/6; 100 lbs 160/-

LAWNS

Their Preparation and Upkeep.

In order to produce a good dense turf of good fine texture it is necessary that the soil should be well prepared beforehand and that the right seed should be used—a mixture containing only the finer grasses and such as do not become turfy. The following notes will be found helpful to beginners.

Preparation of the Soil. This should be taken in hand well in advance and the soil should be worked up again and again to a good depth during the warm weather so that the sun may have an opportunity of penetrating to all parts of the soil and exerting its beneficial influence. Stones and other coarse matter should be removed and the ground thoroughly pulverised wherever necessary. A good Fertilizer should be applied while this preparation is being carried out. The best for the purpose is **Starke's Special Grass Fertilizer** and it should be used at the rate of $\frac{1}{4}$ lb. per square yard. After thoroughly working up the soil as described it should be consolidated by rolling or trampling, or other suitable means, and the surface should be raked carefully to provide a seed bed.

Sowing the Seed. In districts with a winter rainfall this should invariably be done in the autumn and **Starke's Kudu-Lawn Grass** should be used at the rate of 1 oz. to the square yard. This thick sowing is necessary in order to provide a dense turf from the start. It is much better to secure a good result at the commencement than to endeavour to patch it afterwards. The seed should be lightly covered by raking or brushing the surface with a bunch of twigs or by dragging a light bush harrow over it and if any uncovered seed remains it should be covered by a light dusting of fine soil.

Top Dressing. Frequent top dressing with soil is not desirable unless to even up the ground. If the Grass is cut frequently the clippings may be allowed to remain on the lawn and will prove of great benefit to it as they decay and provide a good protection to the roots during the hot weather. They also add to the humus in the soil which assists in making the plant food available. A light dressing of **Starke's Special Grass Fertilizer** should be applied each season.

Weeds. These will always make their appearance in new lawns in spite of the most careful preparation and treatment. They are always present in the soil and must be removed if the finer grasses are to have a fair chance. Hand-weeding is usually resorted to but much can be done by continuous mowing once the lawn grass is well established.

Lawn Grass Seed Mixture.

A good and reliable Lawn Mixture is a necessity for good results whether with new lawns or in the renovation of old lawns that require reseeded. Our **Kudulawn** Mixture contains only the choicest seeds of the varieties most suited for this purpose and we have every confidence in recommending it to our clients as the very best and most suitable mixture for the peculiar conditions of this country.

Starke's Kudulawn Mixture.—Per lb 3/-; 25 lbs 60/-; 50 lbs 110/-; 100 lbs 200/-

Grasses suitable for Lawns

We give here a list of grasses commonly used for lawns. All these are described and priced elsewhere in this catalogue (see pages 10 to 14). Some are suitable only for use in a mixture while others are better used alone and we indicate against each the approved method.

Creeping Bent Grass (*Agrostis stolonifera*, alba).—To be used in a mixture.

Quick or Bermuda Grass (*Cynodon dactylon*, Pers.).—To be used alone.

"Velvety" Florida Grass (*Cynodon*, sp.).—To be used alone.

Red Fescue (*Festuca rubra*, L.).—To be used in a mixture.

Perennial Rye Grass (*Lolium perenne*, L.).—To be used in a mixture.

Kikuyu Grass (*Pennisetum longistylum*).—To be used alone.

Timothy (*Phleum pratense*, L.).—To be used in a mixture.

Kentucky Blue Grass (*Poa pratensis*, L.).—To be used in a mixture.

Coarse or Buffalo Quick (*Stenotaphrum glabrum*).—To be used alone.

Japanese Lawn Grass (*Zoysia pungens*).—To be used in a mixture.

STARKE'S KUDULAWN MIXTURE.—A combination of all the best. To be used alone.

Starke's Complete Fertilizers.

"Kudu" Brand.

To get the best results from the use of artificial fertilisers you must specialise. The **"KUDU" BRAND FERTILISERS** are specially compounded to provide the needs of the particular plant for which they are to be used.

Our **SUPERIOR GARDEN FERTILISER** is suitable for all-round vegetable culture and also quite useful as a general fertiliser in the flower garden, but, if you want the best for your Sweet Peas, Roses, Daffodils or Chrysanthemums, then order the particular mixture for that purpose.

We regularly compound the following and will compound specially for any particular crop you may name:—

	Per 25 lbs	50 lbs	100 lbs
Starke's Superior GARDEN Fertiliser ...	5/-	8/6	15/-
Starke's Superior POTATO Fertiliser ...	6/-	10/-	17/6
Starke's Superior TOBACCO Fertiliser ...	7/-	12/-	20/-
Starke's Superior ORCHARD Fertiliser...	5/-	8/6	15/-
Starke's Superior VINE Fertiliser ...	5/-	8/6	15/-
Starke's Superior GRAIN Fertiliser ...	5/-	8/6	15/-
Starke's Special GRASS Fertiliser ...	6/-	10/-	17/6
Starke's Special SWEET PEA Fertiliser	*8/-	13/6	25/-
Starke's Special ROSE Fertiliser ...	*8/-	13/6	25/-
Starke's Special DAFFODIL Fertiliser ...	*8/-	13/6	25/-
Starke's Special CHRYSANTHEMUM Fertiliser ...	*8/-	13/6	25/-
Starke's "PLANTAX" for Pot Plants ...	*8/-	13/6	25/-

*Also in tins at 1/3 and 2/- per tin.

Special quotations for ton lots on application.

LEGUMENS.

These crops all belong to that most important natural order Leguminosæ. They gather nitrogen from the atmosphere without cost to the farmer and are often aptly referred to as "soil renovators." You cannot afford to overlook them.

Lucerne.

Cape Lucerne (Provence Type) (*Medicago sativa*, L.).—Our recleaned Cape Lucerne has entirely supplanted the imported article and in quality of seed it is undoubtedly superior to anything that has hitherto been offered. It is of the same type of growth as the French grown seed and the cleaning is superior as we find we can produce cleaner samples from the South African article. Large quantities are now exported to Australia, Argentina and the United States.

Recleaned Seed: Per lb 2/-; 25 lbs 47/6; 50 lbs 90/-; 100 lbs 175/-

Hunter River Lucerne (*Medicago sativa*, L.).—In type this is somewhat different to "Provence" and grows later in the autumn and earlier in the spring than other varieties. It, nevertheless, does well in summer also and is altogether a very desirable variety, being much favoured in the Transvaal.

Recleaned Seed: Per lb 3/6; 25 lbs 82/6; 50 lbs 160/-; 100 lbs 300/-

Arabian Lucerne (*Medicago sativa*, L.).—This variety was first introduced by us in 1910 and has since then been tried very extensively throughout South Africa. As a permanent crop it has, unfortunately, not come up to the expectations of those growers who were the first to give it a trial. It is a remarkably rapid grower, especially in the early stages, but its useful life is not very long. It lasts from two to five years according to soil and conditions. Owing to its remarkably rapid growth, however, and the fact that it can stand a great deal of crowding while young, it can be profitably sown as a catch crop in the grain districts, using the last grain crop as a cover crop for the Lucerne. In this way an excellent pasture is obtained on suitable situations and it will last for several years if carefully grazed. Stock should not be allowed on the Lucerne for more than 4 to 7 days at a time, after which it should be allowed a growing period of four weeks or so. Further, in those districts in which Lucerne of any variety is not a very permanent crop, this variety can often be grown to advantage for a cutting crop in the ordinary way. It gives its best return in the early part of its life and thus no time is lost in getting to the profitable stage.

Recleaned Seed: Per lb 4/6; 25 lbs 105/-; 50 lbs 205/-; 100 lbs 400/-

Tree Lucerne (*Medicago arborea*, L.).—This is the true Tree Lucerne and must not be confounded with Tagasaste (*Cytisus proliferus*, L.) which is often referred to as such although it is not

a Lucerne at all. *Medicago arborea* is suited to warm districts and resists even the greatest drought. It grows to a height of 6 or 8 ft. and is yellow-flowered. It thrives on any fairly deep soil that is not lacking in lime.

Seed : Per oz 9d ; $\frac{1}{4}$ lb 2/- ; 1 lb 6/6 ; 5 lbs 30/-

Yellow Trefoil (*Medicago lupulina*, L.).—As the name implies, this is allied to Lucerne. It is very useful on comparatively poor soils and especially when included in a pasture mixture for sheep and other small stock.

Seed : Per lb 1/- ; 25 lbs 22/6 ; 50 lbs 40/- ; 100 lbs 75/-

Clovers and Kindred Plants.

Dwarf White Clover (*Trifolium repens*, L.).—Of dwarf habit, the stems creeping and rooting at the joints. Valuable in permanent pastures as it is sweet and nutritious. Sow 10 to 12 lbs. per acre.

Seed : Per lb 4/6 ; 25 lbs 105/- ; 50 lbs 205/- ; 100 lbs 400/-

Kentish Wild White Clover (*Trifolium repens*, L.)

Seed : Per oz 3/- ; lb 42/-

Broad Red Clover (*Trifolium pratense*, L.).—An annual plant with much the same habit as Lucerne and thrives on lands that are suited to the latter crop and also on shallower soils where Lucerne would not be more than a temporary success. It likes somewhat heavy loam containing a fair percentage of lime. Sow 12 to 15 lbs. per acre.

Seed : Per lb 4/6 ; 25 lbs 100/- ; 50 lbs 180/- ; 100 lbs 350/-

Perennial Red Clover or Giant Cow Grass (*Trifolium pratense*).—As the name indicates, this is a perennial form of Red Clover. It gives heavy returns under good cultivation and thrives under similar conditions to the annual variety.

Seed : Per lb 6/6 ; 25 lbs 130/- ; 50 lbs 255/- ; 100 lbs 500/-

Crimson Clover (*Trifolium incarnatum*, L.).—An erect annual growing to about 2 ft. in height. It is recommended for districts that are practically free from frost and under such conditions it should prove a valuable crop for growing winter green feed. It is also used for ploughing under in orchards and for either purpose it should be sown in the autumn with the first rains at the rate of 15 lbs. to the acre.

Seed : Per lb 2/- ; 25 lbs 45/- ; 50 lbs 80/- ; 100 lbs 150/-

Alsike Clover (*Trifolium hybridum*, L.).—A true perennial, but not very permanent on some light soils. It is well adapted to wet situations and is most productive in wet seasons. A legume with these characteristics undoubtedly fills a need in advanced agricultural practice. Alsike is more suited to irrigation than other Clovers.

Seed : Per lb 4/6 ; 25 lbs 100/- ; 50 lbs 180/- ; 100 lbs 350/-

Berseem or Egyptian Clover (*Trifolium alexandrinum*, L.).—This crop is largely grown in Australia where it is much valued by dairy farmers and orchard men. It is sown early in the Autumn so that it may be well established before winter. It gives three to four cuts, after which the stubble may be ploughed under with great benefit to the soil. It is succulent and nutritious and is recommended for the warmer districts. Sow 20 to 25 lbs. per acre.

Seed: Per lb 3/9; 25 lbs 80/-; 50 lbs 155/-; 100 lbs 300/-

Japanese Clover (*Lespedeza striata*, Hook. and Arn.).—A low-growing annual, but attaining as much as 18 inches in good soil. It is suited to warmer districts where it may be grown for pasture and also for hay. It is grown with considerable success in the Gulf States of America where it is regarded as a drought resister.

Seed: Per lb 6/-; 25 lbs 125/-

Cape Stink Klaver (*Melilotus indicus*).—An annual Melilot, a plant much resembling Lucerne in the early stages. It grows freely in cultivated lands from its own re-seeding and is very useful as a nitrogen gatherer. It is readily eaten by stock unless they are kept from it until it has become coarse. Cape Stink Klaver is now largely used for green-manuring in Western Province orchards.

Seed: Per lb 8d; 25 lbs 12/6; 50 lbs 20/-; 100 lbs 37/6

King Island Clover (*Melilotus indicus*).—This variety of Melilot is far-famed for the wonderful improvement it worked on the sandy soil of King Island where it is said to have been the main factor in turning otherwise waste lands into prosperous dairying centres.

Seed: Per lb 9d; 25 lbs 15/-; 50 lbs 25/-; 100 lbs 45/-

Sainfoin (*Onobrychis sativa*, Lam.).—A perennial plant much grown in England on chalky soils. It is useful here on comparatively light lands if not lacking in lime. Sow 20 lbs. per acre.

Seed: Per lb 2/9; 25 lbs 62/6; 50 lbs 120/-; 100 lbs 225/-

Tagasaste (*Cytisus proliferus*, L.).—Incorrectly referred to as Tree Lucerne. The true Tree Lucerne is *Medicago arborea*, L. and is a very different plant. Tagasaste grows to a height of 8 to 10 feet and will thrive on any fairly good deep soil. If cut back while young to about 3 ft. it throws out long succulent shoots which may be cut and fed to cows or poultry. A large specimen is very beautiful when covered with its white flowers.

Seed: Per oz 1/-; $\frac{1}{4}$ lb 2/6; 1 lb 7/6; 5 lbs 35/-

Plants: 1/6 each in $\frac{1}{4}$ tins

Giant Beggar Weed or Beggar's Ticks (*Desmodium tortuosum*, D.C.).—An erect leguminous annual, a vigorous grower with abundant foliage, recommended for warm districts. It is a valuable soil renovater. In Florida, where it is grown for hay, it has proved of considerable value. For hay it should be cut just as it begins to bloom. Sow in spring, 10 lbs. to the acre and cover lightly.

Seed: Per oz 6d; $\frac{1}{4}$ lb 1/-; 1 lb 3/6; 5 lbs 15/-

Beans, Peas, Vetches, etc.

The importance of these crops can not be over estimated. Among them will be found Leguminous crops for summer and for winter and the crop list is incomplete without one or more such for each season. They are all great nitrogen-gatherers and prepare the way for grain crops, while at the same time producing very valuable forage crops for the farm livestock.

Velvet Bean (*Mucuna utilis*, Wall.).—A twining plant grown as a forage crop and for green manuring. It requires a long growing season, but produces an immense crop of green fodder, or if allowed to mature, a heavy crop of beans which may be ground with or without the pods and make a splendid concentrated feed. The vines are branching and often grow to as much as seventy-five feet in length. Sow in rows 4 ft. apart and two feet between the beans, two beans to a place, or if put in with the mealie planter, 1 ft. apart, 1 bean to a place, say about 15 lbs. to the acre.

Seed : Per lb 9d ; 25 lbs 15/- ; 50 lbs 27/6 ; 100 lbs 50/-

Kudu-Laing Bean (*Mucuna utilis*).—A hairless variety of the Velvet Bean which may, consequently, be harvested without the discomforts attendant on the handling of the ordinary kind. It is a very heavy cropper and may be put to all the uses of the Velvet Bean. Like Velvet Beans, it should be sown in the spring, say about 15 lbs. to the acre.

Seed : Per lb 1/6 ; 25 lbs 35/- ; 50 lbs 65/- ; 100 lbs 125/-

Horse Bean or Tick Bean (*Vicia faba*, L.).—This is of the same type as the Broad Bean of the vegetable garden, but produces a smaller pod. It is largely grown in England as a fodder crop suited to fairly heavy lands. Sow in autumn in rows about 30 inches apart, say about 15 lbs. to the acre.

Seed : Per lb 1/3 ; 25 lbs 32/6 ; 50 lbs 62/6 ; 100 lbs 120/-

Yellow Field Peas (*Pisum arvense*, L.).—Perhaps the most productive of all the field varieties. Very large quantities of the grain are produced in various parts of South Africa. One of the most suitable varieties for a winter green-manuring crop.

Seed : Per lb 6d ; 25 lbs 9/6 ; 100 lbs 35/- ; 200 lbs 65/-

Green Field Peas (*Pisum arvense*, L.).—Favoured for table purposes on account of the green colour which is preferred by many. Its merits, otherwise, are about the same as the yellow variety.

Seed : Per lb 8d ; 25 lbs 12/6 ; 100 lbs 42/6 ; 200 lbs 80/-

Black-Eyed Susan Field Peas (*Pisum arvense*, L.).—A rapid grower and well suited for a green-manuring crop on account of its strong growth, providing a great amount of herbage for turning

under. It also gives a heavy seed crop. The Peas are larger than the yellow and green varieties and distinguishable by the black "eye".

Seed: Per lb 8d; 25 lbs 12/6; 100 lbs 42/6; 200 lbs 80/-

Partridge or Maple Peas (*Pisum arvense*, L.).—A heavy cropping field variety. The peas are brown in colour and in demand for feeding to Homing Pigeons.

Seed: Per lb 9d; 25 lbs 15/-; 50 lbs 27/6; 100 lbs 50/-

Marrowfat Field Peas (*Pisum arvense*, L.).—A large white grain, somewhat wrinkled. Rapid and strong grower and heavy cropper. The pods are large and excellent for green picking. It is a splendid variety to sow for household use or if the peas are to be marketed green.

Seed: Per lb 1/3; 25 lbs 25/-; 50 lbs 42/6; 100 lbs 75/-

Dhal or Pigeon Pea (*Cajanus indicus*).—A shrubby plant of India and Tropical Africa. It can live under drought conditions and lasts for about three years in favourable situations, attaining in that time, a height of about 15 feet. The grain is valuable for practically all the uses to which ordinary peas are put. A crop is obtained in the first year and later it is phenomenal. Silkworms thrive on its foliage.

Seed: Per lb 9d; 25 lbs 17/6; 50 lbs 32/6; 100 lbs 60/-

Green Moonghi or Curnow Peas.—Our first acquaintance with this plant was through a bag of seed obtained from the Vryburg district and as further supplies have since come from that part, it seems evident this Legume can thrive in hot, dry districts and must prove valuable accordingly. We have not yet been able to ascertain definitely its botanical classification, but in growth it greatly resembles the Cow-peas. Indians state that in their country the grain is used as human food. Treat like a cow-pea crop.

Seed: Per lb 1/-; 25 lbs 22/6; 50 lbs 40/-; 100 lbs 75/-

Mammoth Yellow Soya Beans (*Glycine hispida*, Maxim.).—This variety is very largely grown in the Southern States of America and is, perhaps, the most important variety used there. It requires a full season to mature but yields a very heavy crop. For cutting green it will probably suit South African conditions well and is already largely sown, but for a dry crop many will prefer a quicker maturing variety such as Hollybrook Early. Sow 30 lbs. to the acre in drills.

Seed: Per lb 1/3; 25 lbs 30/-; 50 lbs 55/-; 100 lbs 100/-

Hollybrook Early Soya Beans (*Glycine hispida*, Maxim.).—A sure cropper and a vigorous, quick-growing variety. Matures a crop in 2 or 3 weeks less than the Mammoth Yellow variety. Sow 30 lbs. to the acre in drills.

Seed: Per lb 1/3; 25 lbs 30/-; 50 lbs 55/-; 100 lbs 100/-

New Era Cowpeas (*Vigna catjang*, Walp.).—An early-maturing, upright-growing variety. It is a heavy yielder and also produces a heavy crop of herbage if desired to cut for forage. Sow 30 to 40 lbs. per acre, in spring.

Seed : Per lb 1/3 ; 25 lbs 30/- ; 50 lbs 55/- ; 100 lbs 100/-

Whippoorwill Cowpeas (*Vigna catjang*, Walp.).—A favourite early, upright-growing variety and very largely grown. It makes a good growth of vine. Sow 30 to 40 lbs. per acre, in spring.

Seed : Per lb 1/3 ; 25 lbs 30/- ; 50 lbs 55/- ; 100 lbs 100/-

Taylor Cowpeas (*Vigna catjang*, Walp.).—A large speckled pea, making a good growth of vine and a heavy yield of Peas. It is upright-growing and early to mature. It is very popular wherever it has been sown. Sow 30 to 40 lbs. per acre, in spring.

Seed : Per lb 1/3 ; 25 lbs 30/- ; 50 lbs 55/- ; 100 lbs 100/-

Brabham Cowpeas (*Vigna catjang*, Walp.).—A comparatively new variety for which extra good qualities are claimed. It is upright-growing. Sow 30 to 40 lbs. per acre, in spring.

Seed : Per lb 1/6 ; 25 lbs 32/6 ; 50 lbs 60/- ; 100 lbs 110/-

White Bechuana Cowpeas (*Vigna catjang*, Walp.).—An upright grower and heavy yielder. This variety is now largely used in South Africa and seems to have adapted itself admirably to our conditions. The grain is of a yellowish white colour and can advantageously be used for culinary purposes. Sow 30 to 40 lbs. per acre, in spring.

Seed : Per lb 8d ; 25 lbs 13/6 ; 50 lbs 25/- ; 100 lbs 45/-

Zwartbekje Cowpeas (*Vigna catjang*, Walp.).—A local variety of great merit. It is recumbent in habit and is variously known as Zwartbekje Bean and Catjang Bean, but it is a true Cowpea. It is worth mentioning here, however, that Cowpeas are actually Beans and not peas as many suppose. This fact often leads to sowing them at the wrong season. They are tender to frost and should be sown in the spring, and not too early. "Zwartbekje" is very useful for culinary purposes.

Seed : Per lb 8d ; 25 lbs 13/6 ; 50 lbs 25/- ; 100 lbs 45/-

English Spring Vetch (*Vicia sativa*, L.).—Grows more rapidly and luxuriantly than the winter form and in our mild climate it is the best to sow excepting under severe conditions. When grown for green fodder the vetches are mixed in equal parts with oats, rye or barley which provide a support for the vetches and prevents the crop being laid. Sow in autumn and again in spring about 20 lbs. vetches with the same weight of the other grain per acre. For hay, cut when in bloom, but for green fodder at an earlier stage to encourage continued growth which provides good grazing, or perhaps a second cutting.

Seed : Per lb 1/- ; 25 lbs 22/6 ; 50 lbs 40/- ; 100 lbs 77/6

English Winter Vetch (*Vicia sativa*, L.).—The hardiest form, for cold districts. Sow 20 lbs. per acre, mixed with the same weight of oats, rye or barley for a support.

Seed : Per lb 1/- ; 25 lbs 17/6 ; 50 lbs 30/- ; 100 lbs 55/-

Early French Winter Vetch (*Vicia sativa*, L.).—Its characteristics are practically the same as the English Spring variety, but the seed is a little larger. It suits just as well under South African conditions as the Spring variety. Sow 20 lbs. with the same weight of oats, rye or barley per acre.

Seed : Per lb 1/- ; 25 lbs 22/6 ; 50 lbs 40/- ; 100 lbs 75/-

Sand or Hairy Vetch (*Vicia villosa*, Roth.).—Thrives on poor, arid, sandy soils. It may be sown either in autumn or spring, mixed with rye or oats for a support. It grows to 3 or 4 ft. and may be cut as soon as the bloom appears and again for seed. It is very hardy and in America is known as Winter Vetch but must not be confused with the English Winter Vetch than which it has a smaller seed. Sow 15 lbs. to the acre with about 20 lbs. oats or rye.

Seed : Per lb 2/6 ; 25 lbs 57/6 ; 50 lbs 107/6 ; 100 lbs 200/-

Japanese Vetch (*Astragalus sinicus*).—A new forage plant introduced from Japan for trial. We shall be glad to have reports of results obtained by growers.

Seed : Per oz 6d ; $\frac{1}{4}$ lb 1/6 ; per lb 5/-

Kidney Vetch or Yellow Sand Clover (*Anthyllis vulneraria*, L.).—A valuable forage plant for poor sandy soils. Sow 20 lbs. per acre.

Seed : Per lb 2/6 ; 25 lbs 57/6

Large White or "Kies" Lentils (*Lathyrus*).—The grain is large and may be used for culinary purposes. The plant may be grown as a forage crop in similar manner to Vetches.

Seed : Per lb 6d ; 25 lbs 8/6 ; 50 lbs 16/- ; 100 lbs 30/-

White Lupins (*Lupinus albus*).—The principal use of these is as a green-manuring crop and the value of the plant lies in its adaptability to poor sandy soils. It is a useful crop for orchard green-manuring. It can be sown in the autumn and will give a good growth for turning under in due season.

Seed : Per lb 8d ; 25 lbs 12/6 ; 50 lbs 20/- ; 100 lbs 35/-

Blue Lupins (*Lupinus hirsutus*).—This may be used for the same purposes as the white-flowering species and we do not know that the one has any advantage from an agricultural point of view over the other.

Seed : Per lb 9d ; 25 lbs 15/- ; 50 lbs 25/- ; 100 lbs 45/-

Peanuts.

(*Arachis hypogæa*, Linn.)

Virginia Improved.—A very profitable sort, planted almost exclusively in the Peanut-growing section of Virginia where it is the standard variety for roasting. The plants have erect stems with upright foliage and are easily grown. The nuts are of good size with large kernels and the vines furnish excellent forage.

Seed : Per lb 1/3 ; 25 lbs 25/- ; 50 lbs 45/- ; 100 lbs 80/-

Spanish Bunch.—A very popular variety. It produces a large nut and crops heavily. Excellent for roasting.

Seed : Per lb 1/3 ; 25 lbs 25/- ; 50 lbs 45/- ; 100 lbs 80/-

ROOT CROPS.

Root crops certainly do not receive, in this country, the attention that they deserve. For weight of crop and general usefulness as fodder for stock, these are crops which can hardly be surpassed, and as most districts will grow one sort or another successfully, we feel that agriculturists generally and stock farmers in particular should be able to add materially to the possibilities of their farms by growing roots on a considerable scale.

Mangolds and Beets.

(*Beta vulgaris*, L.)

Mammoth Long Red Mangold.—Remarkable for its great size and the immense quantity that it will produce per acre. This variety is best suited to a good deep soil.

Seed : Per lb 2/6 ; 25 lbs 47/6 ; 50 lbs 85/- ; 100 lbs 156/-

Plants : 1/6 per 100 ; 12/6 per 1000

Yellow Globe Mangold.—An excellent cropper, handsome in appearance and very nutritious. Yellow Globe is probably the best of all varieties for comparatively shallow soils. It is a variety that is well known and can be thoroughly recommended.

Seed : Per lb 2/6 ; 25 lbs 45/- ; 50 lbs 80/- ; 100 lbs 150/-

Plants : 1/6 per 100 ; 12/6 per 1000

Golden Tankard Mangold.—The best quality of all Mangolds, having a deep yellow flesh. It is specially rich in saccharine matter and its feeding properties are considered superior to other varieties. Being of good shape and neat habit, it can be grown a little closer together and thus increase the yield per acre.

Seed : Per lb 2/6 ; 25 lbs 45/- ; 50 lbs 80/- ; 100 lbs 150/-

Plants : 1/9 per 100 ; 15/- per 1000

Giant Half-Sugar White Mangold.—This excellent variety is now largely grown and well deserves the popularity it has attained. It combines the feeding and milk-producing qualities of the Sugar

Beet with the productiveness of the ordinary Mangold to an extent not attained in any other sort. It is strongly to be recommended to dairy farmers.

Seed: Per lb 2/6; 25 lbs 50/-; 50 lbs 90/-; 100 lbs 170/-

Plants: 1/9 per 100; 15/- per 1000

Giant Half-Sugar Rose Mangold.—Similar to Giant Half-Sugar White excepting in colour.

Seed: Per lb 2/6; 25 lbs 50/-; 50 lbs 90/-; 100 lbs 170/-

Plants: 1/9 per 100; 15/- per 1000

Sugar Beet.—A valuable fodder crop on account of the high sugar content of the roots, which are smaller than Mangolds and grow below the surface of the soil, the leaf only appearing above. The cultivation is similar to that of Mangolds, excepting that the plants can be placed closer in the row.

Seed: Per lb 3/6; 25 lbs 77/6; 50 lbs 145/-; 100 lbs 275/-

Silver Beet.—This has come into prominence recently as a new and valuable fodder and grazing crop. It may be cultivated similarly to Mangolds, which it resembles, but there is no root crop. The leaves alone are gathered or grazed off by cattle or sheep and form a very nutritious and succulent feed. The plant is highly drought resistant and continues to give good grazing for a considerable time.

Seed: Per lb 7/6; 25 lbs 175/-; 50 lbs 300/-; 100 lbs 500/-

Field Turnips.

(*Brassica rapa*, L.)

Purple Top Mammoth.—A white-fleshed, purple-topped variety of splendid size and a heavy cropper.

Seed: Per lb 4/-; 25 lbs 75/-; 50 lbs 120/-; 100 lbs 210/-

White Stone or Stubble.—A beautifully shaped and juicy variety. The best of all white turnips for late sowing as it is a very quick grower.

Seed: Per lb 4/-; 25 lbs 75/-; 50 lbs 130/-; 100 lbs 240/-

White American Strapleaf.—An early, white, flat Turnip of excellent quality and it endures heat well.

Seed: Per lb 4/-; 25 lbs 75/-; 50 lbs 130/-; 100 lbs 240/-

Swedes.

(*Brassica rutabaga*, L.)

Webb's Imperial Purple-Top.—Of excellent size and good quality and it yields a very heavy crop.

Seed: Per lb 4/6; 25 lbs 100/-; 50 lbs 175/-; 100 lbs 300/-

Monarch or Elephant.—A well known and favourite purple-topped variety. Always a reliable cropper.

Seed: Per lb 4/6; 25 lbs 100/-; 50 lbs 175/-; 100 lbs 300/-

SWEDES—*continued*.

Sutton's Champion.—This variety is universally favoured. It is purple-topped and yellow-fleshed. It can be thoroughly recommended.

Seed : Per lb 4/6 ; 25 lbs 100/- ; 50 lbs 175/- ; 100 lbs 300/-

Giant King.—A magnificent variety of tankard shape, purple top and rich yellow flesh. It grows to a splendid size and is early, hardy and a splendid cropper.

Seed : Per lb 4/6 ; 25 lbs 100/- ; 50 lbs 175/- ; 100 lbs 300/-

Kangaroo Bronze Top.—Of excellent shape, good quality and a very heavy cropper. It is yellow-fleshed and bronze-topped. A thoroughly reliable sort.

Seed : Per lb 4/6 ; 25 lbs 100/- ; 50 lbs 175/- ; 100 lbs 300/-

"Pioneer" Turnip-Swede.—A Turnip-Swede hybrid produced by Messrs. Gartons, Limited, England. In appearance it partakes more of the character of the Swede but has the quick and vigorous growing habit of the Turnip. On land that will not carry a crop of Swedes this will be found to produce a splendid crop of bulbs equal in quality and keeping properties to the finest Swedes.

Seed : Per lb 6/- ; 25 lbs 125/- ; 50 lbs 225/- ; 100 lbs 400/-

Other Root Crops.

White Belgian Cattle Carrot (*Daucus carota*, L.).—A very productive variety grown almost exclusively for stock, but when well grown and drawn before the roots are too large it can not be surpassed as a table variety. It grows one third out of the ground, the lower portion of the root being white and above ground green.

Seed : Per lb 6/- ; 25 lbs 125/- ; 50 lbs 225/- ; 100 lbs 400/-

Long Red Surrey Carrot (*Daucus carota*, L.).—Gives very long roots and is a heavy cropper, preferred by many to the White Belgian as a cattle carrot for field crop. It is also splendid for table if well grown and drawn at a suitable stage of its development.

Seed : Per lb 8/6 ; 25 lbs 185/- ; 50 lbs 360/- ; 100 lbs 700/-

Large-Rooted Magdeburgh Chicory (*Cichorium intybus*, L.).—This is the most favoured variety for a root crop. It thrives under conditions that will suit a beet or mangold crop and should be sown in drills at the rate of 4 to 5 lbs. per acre. If sown broadcast for a grazing crop, 10 to 12 lbs. of seed will be required to the acre. It is relished by all kinds of stock and if cut or grazed regularly so that it does not seed, it will last for many years.

Seed : Per oz 1/3 ; $\frac{1}{4}$ lb 3/9 ; Per lb 12/6

Tobacco.

(*Nicotiana tabacum*, Linn.)

“Soulook” Turkish.—The most popular Turkish variety and grown, almost to the exclusion of other varieties, in the Stellenbosch district.

Seed : Per oz 3/- ; $\frac{1}{4}$ lb 10/6 ; $\frac{1}{2}$ lb 18/6 ; lb 35/-

Goldfinder.—One of the best of the Virginia tobaccos for cigarette filler.

Seed : Per oz 3/- ; $\frac{1}{4}$ lb 10/6 ; $\frac{1}{2}$ lb 18/6 ; lb 35/-

Virginia Oak Hill Yellow.—Unsurpassed for delicacy of fibre.

Seed : Per oz 3/- ; $\frac{1}{4}$ lb 10/6 ; $\frac{1}{2}$ lb 18/6 ; lb 35/-

Sterling.—Bright colour, silky in texture and sweet flavour. Best adapted to light loam with clay subsoil.

Seed : Per oz 3/- ; $\frac{1}{4}$ lb 10/6 ; $\frac{1}{2}$ lb 18/6 ; lb 35/-

Improved Yellow Oronoko.—Easily cured to a bright colour, or may be cured for dark filler.

Seed : Per oz 3/- ; $\frac{1}{4}$ lb 10/6 ; $\frac{1}{2}$ lb 18/6 ; lb 35/-

Improved White Stem Oronoko.—Makes a good bright leaf and may be cured for dark filler. Suited to fairly rich soil if well drained and does particularly well on alluvial soils with clay subsoil.

Seed : Per oz 3/- ; $\frac{1}{4}$ lb 10/6 ; $\frac{1}{2}$ lb 18/6 ; lb 35/-

Improved Hester.—Cures a nice bright colour and suited for wrappers, cutters, fillers or cigars. The leaf is fairly long and of medium width. It is best adapted to light loamy soils overlying yellow clay.

Seed : Per oz 3/- ; $\frac{1}{4}$ lb 10/6 ; $\frac{1}{2}$ lb 18/6 ; lb 35/-

Connecticut Broadleaf.—Formerly known as Connecticut Seed-leaf. Used largely for cigar wrappers and binders and makes a good pipe tobacco. Adapted to sandy loam and makes a very rapid growth. The leaves are broad and long, but vary according to soil conditions, etc.

Seed : Per oz 2/6 ; $\frac{1}{4}$ lb 7/6 ; $\frac{1}{2}$ lb 13/6 ; lb 25/-

Yellow Pryor Tobacco.—A good pipe tobacco and also makes a fine wrapper or filler. On rich red land it will give a dark colour.

Seed : Per oz 3/- ; $\frac{1}{4}$ lb 10/6 ; $\frac{1}{2}$ lb 18/6 ; lb 35/-

Brazilian American.—Excellent for cigars, and a delightfully aromatic smoker.

Seed : Per oz 3/- ; $\frac{1}{4}$ lb 10/6 ; $\frac{1}{2}$ lb 18/6 ; lb 35/-

Clarksville.—A heavy smoker.

Seed : Per oz 2/6 ; $\frac{1}{4}$ lb 7/6 ; $\frac{1}{2}$ lb 13/6 ; lb 25/-

Fibre-producing Plants.

Common Flax (*Linum usitatissimum*, Linn.).—The common Flax or Linseed as used for a grain and fibre crop. There is now a good demand for the grain at favourable prices and it should be more largely grown as it will produce a good crop under normal conditions suited to cereal crops.

Seed : Per lb 1/4 ; 25 lbs 30/- ; 50 lbs 55/- ; 100 lbs 100/-

Canada Fibre Flax (*Linum usitatissimum*, Linn.).—This is a special fibre Flax, Canada grown seed. We do not recommend it for growing a grain crop as it is not likely to give a heavy crop of Linseed.

Seed : Per lb 6/-

Irish Fibre Flax (*Linum usitatissimum*, Linn.).—Irish grown seed of a special fibre strain of Flax which is not recommended for growing a grain crop.

Seed : Per lb 6/-

Common Hemp (*Cannabis sativa*, Linn.).—A tall-growing annual plant grown for its bast fibre and for its seeds. The grain is in good demand for bird-feeding and other special purposes and commands a favourable price.

Seed : Per lb 2/- ; 25 lbs 45/- ; 50 lbs 80/- ; 100 lbs 150/-

New Zealand Flax (*Phormium tenax*, Forst.).—A native of New Zealand and Australasia. The fibre is obtained from the leaves and the plant is a very useful one to have on the farm as its leaves may be put to many uses as tying material.

Plants : 2/6 each in half tins.

Rape, Kale and Mustard.

Dwarf Essex Rape (*Brassica napus*, L.).—The best of all varieties for a forage crop. Rape is now largely grown in the Western Province for grazing and the results are undoubtedly remarkable. It is not only of value for its nutritive properties, but those who grow it regularly, claim that the health of their animals is very greatly benefitted by it. Messrs. Starke Bros., of Mulder's Vlei sow every year at least 1200 lbs. of seed of this variety and considering that 5 lbs. is enough for an acre, this provides considerable grazing for their animals. They say they can not farm without this crop and we know that it proves of immense value to them.

Seed : Per lb 1/6 ; 25 lbs 35/- ; 50 lbs 65/- ; 100 lbs 120/-

Japanese Dwarf Essex Rape (*Brassica napus*, L.).—Japan-grown seed of this popular variety. We shall be glad if growers who try Japan-grown and European seed side by side will kindly report to us if there are any noticable differences between these two strains.

Seed : Per lb 1/3 ; 25 lbs 30/- ; 50 lbs 55/- ; 100 lbs 100/-

KALE & MUSTARD—continued.

Thousand Headed Kale (*Brassica oleracea*, L. form *acephala*).—A tall-growing plant of the cabbage tribe with branching stem and producing an immense amount of succulent leaf that may be regularly harvested for cattle, sheep, pigs, poultry, etc. The seed is best sown on a seed bed and set out when strong enough to a spacing of 3 ft. each way.

Seed: Per oz 6d; $\frac{1}{4}$ lb 1/-; lb 3/6; 25 lbs 75/-

Plants: 1/6 per 100; 12/6 per 1000

Chou Moellier or Marrow Kale (*Brassica oleracea*, L. form *acephala*).—A large variety of Kale with a thickened stem. Both leaves and stem may be used for stock-feeding. The leaves are harvested as with Thousand Headed Kale and after the plant has served its purpose in this way, the stems also may be cut and sliced up for feeding, as they are soft and filled with the characteristic "marrow" of the cabbage. Sow in a seed bed and transplant when ready, placing the plants 3 ft. apart each way. There is a white-stemmed and a purple-stemmed variety.

Seed: Per oz 9d; $\frac{1}{4}$ lb 2/3; lb 7/6; 25 lbs 150/-

Plants: 1/6 per 100; 12/6 per 1000

White Mustard (*Brassica alba*, Vis.).—An annual plant grown chiefly as a food for sheep and for ploughing under to enrich the soil in humus. Often sown in small proportion with Rape to prevent "hoven" or "op-blaas". Table Mustard is produced from the seed.

Seed: Per lb 2/-; 25 lbs 47/6; 50 lbs 90/-; 100 lbs 175/-

Melons and Gourds.

Starke's Mammoth White Kaffir Melon (*Citrullus vulgaris*).—One of the best crops for the late summer. This is a splendid keeping variety of immense size; can be stored for many months, it being quite exceptional for a single melon to spoil. A most desirable feed, particularly in the dry season, and greatly relished by all kinds of livestock. It is a wonderful cropper.

Seed: Per oz 6d; $\frac{1}{4}$ lb 1/6; lb 5/-; 25 lbs 87/6

Woodside Long White Kaffir Melon (*Citrullus vulgaris*).—A good cropper and excellent keeper. It is longer in shape than Mammoth White and not quite so large.

Seed: Per oz 6d; $\frac{1}{4}$ lb 1/6; lb 4/6; 25 lbs 87/6

Majorda Melon (*Citrullus vulgaris*).—A new variety that promises well.

Seed: Per oz 6d; $\frac{1}{4}$ lb 1/-; lb 3/-; 25 lbs 55/-; 100 lbs 200/-

"Swap" Melon (*Citrullus vulgaris*).—A variety introduced from the South West Africa Protectorate. It is of great size and round in shape. The colour is dark green-mottled.

Seed: Per oz 6d; $\frac{1}{4}$ lb 1/6; lb 5/-; 25 lbs 100/-

Monketaan (*Citrullus vulgaris*).—This is simply another name for “Kaffir Melon” and growers usually supply any mixed seed under this name. The seed we offer is cheap and will no doubt give a good crop of nondescript melons, but it is not comparable to the foregoing varieties which are the result of long continued selection.

Seed: Per oz 6d; $\frac{1}{4}$ lb 1/-; lb 2/6; 25 lbs 50/-

Sweet Tsamma (*Citrullus vulgaris*).—A small, round, green-mottled melon on which travellers and their animals depend for water and nourishment in the desert when other resources give out.

Seed: Per $\frac{1}{4}$ lb 6d; lb 1/6; 25 lbs 30/-; 100 lbs 100/-

Virginia Mammoth Pumpkin (*Cucurbita pepo*, Linn.).—Oval in shape and grows to a great size. It is thick fleshed, of first rate flavour and splendid keeping quality. A very heavy cropper.

Seed: Per oz 1/3; $\frac{1}{4}$ lb 3/6; lb 12/6; 5 lbs 57/6

Woodside Boer Pumpkin (*Cucurbita pepo*, Linn.).—In type this is very much like the Fraserdale Improved Boer and shares many of its good qualities.

Seed: Per oz 1/-; $\frac{1}{4}$ lb 2/6; lb 8/6; 5 lbs 37/6

Fraserdale Improved Boer Pumpkin (*Cucurbita pepo*, Linn.).—An improved strain of the Cape Boer Pumpkin. It is a heavy cropper and splendid keeper. These qualities commend it as a field crop for stock feeding, but it is, at the same time, a splendid cooking variety. The flesh is thick and firm and of excellent flavour.

Seed: Per oz 1/-; $\frac{1}{4}$ lb 2/6; lb 8/6; 5 lbs 37/6

Miscellaneous Fodder Crops.

Old Man Saltbush (*Atriplex nummularia*).—A tall-growing species of Australian Saltbush. It is considered one of the most wholesome and fattening of this useful class of fodder plant. It is the most successful in the Free State of all the Saltbushes tried there. It also succeeds well in other parts.

Seed: Per lb 2/6; 25 lbs 55/-; 50 lbs 105/-; 100 lbs 200/-

Creeping Saltbush (*Atriplex semibaccata*).—A very popular species. It has become thoroughly established in some parts of the Cape Province and is now well recognised as a most useful and wholesome plant for sheep and cattle. Every farmer should endeavour to have at least a patch of it on to which animals can be turned when desired for a change of feed.

Seed: Per lb 3/-; 25 lbs 70/-; 50 lbs 130/-; 100 lbs 250/-

Spanish Chufas, or Earth Almonds (*Cyperus esculentus*).—A nut grass largely grown for pig feed. When the crop is fit the pigs are simply turned in and do the harvesting for themselves. Chufas do best on a sandy soil, or rather a soil that does not con-

tain too much clay except as a sub-soil. They may be placed in drills about 30 inches apart and about 10 inches apart in the rows. Cover to a depth of about 2 inches. Poultry will also scratch for the nuts once they have had a taste of them.

Seed : Per lb 2/3 ; 25 lbs 50/- ; 50 lbs 95/- ; 100 lbs 180/-

Common Buckwheat (*Fagopyrum esculentum*, Moench).—A summer growing annual producing a large seed that is in good demand at high prices for poultry feeding and other uses. It is also a good summer green forage crop.

Seed : Per lb 8d ; 25 lbs 12/6 ; 50 lbs 22/6 ; 100 lbs 40/-

Japanese Buckwheat (*Fagopyrum esculentum*, Moench).—Early maturing and a heavy cropper.

Seed : Per lb 1/6 ; 25 lbs 30/- ; 50 lbs 55/- ; 100 lbs 100/-

Niger (*Guizotia oleifera*, Cass.).—An erect annual reaching a height of 3 ft. It is grown for its oily seeds which are used for bird seed mixtures and also for the pale yellow fatty oil produced from them. The oil is used for illumination and for soap making. The crop should be tried here as it is likely to succeed well.

Seed : Per lb 2/6 ; 25 lbs 55/- ; 50 lbs 105/- ; 100 lbs 200/-

Tall-Growing Sunflower (*Helianthus annuus*, Linn.).—The seed is in good demand for poultry feeding and for other purposes and should be more largely grown as it is a crop that thrives naturally in South Africa. It is extraordinary that in a country like this which suits the crop so well, Sunflower is at times so scarce that the seed cannot be bought excepting at an impossible price. Over-production need not be feared as it is an excellent stock food and must necessarily command a fair price for a variety of purposes.

Seed : Per lb 1/- ; 25 lbs 20/- ; 50 lbs 35/- ; 100 lbs 60/-

Jerusalem Artichoke (*Helianthus tuberosus*, Linn.).—Closely allied to, and in appearance it much resembles Sunflower, but this species is grown from tubers and not from the seed which is usually sterile. It is a most useful farm crop because the tubers can be used for culinary purposes or for stock food. Cattle, pigs and other stock eat them readily and they are very nutritious owing to the starch content. The crop is as easily grown as Sunflower.

Seed : Per lb 9d ; 25 lbs 10/6 ; 50 lbs 18/6 ; 100 lbs 32/6

Spineless Cactus (*Opuntia* sp.).—The variety we offer is a strong grower and particularly free from spines. Slabs can be sent by agricultural parcels post.

Per slab 1/- ; postage extra.

Japanese Mountain Rice (*Oryza sativa*, Linn.).—We have imported a very small quantity of seed for experimental sowing.

Seed : Per oz 1/- ; lb 10/-

Rib Grass (*Plantago lanceolata*, L.).—A useful forage plant, especially for sheep pasture and pigs are also very fond of it. A well established patch affords constant grazing to which the pigs resort at every opportunity. Sow 2 lbs. per acre in mixtures, or 20 lbs. if sown alone.

Seed : Per lb 1/6 ; 25 lbs 30/- ; 50 lbs 55/- ; 100 lbs 100/-

Sheep's Burnet (*Poterium sanguisorba*, L.).—A deep-rooting perennial herb of the rose family, about 12 inches high, hardy and drought and frost resistant and adapted to dry, sandy soils. Most useful in mixtures for sheep's pasture. Sow 30 lbs. per acre if sown alone or about 5 lbs. in mixture.

Seed : Per lb 3/- ; 25 lbs 65/- ; 50 lbs 125/- ; 100 lbs 240/-

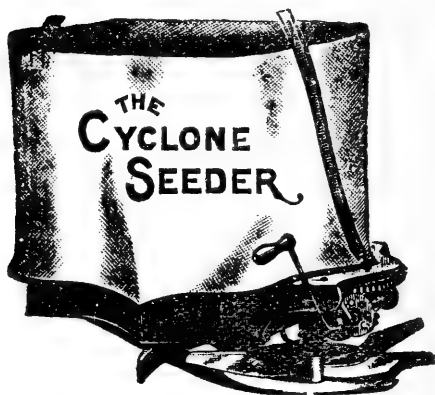

Kudzu Vine (*Pueraria thungbergiana*).—An ornamental perennial climber from Japan. This plant is claimed to be of remarkable economic value as every part of it can be turned to some use. Fine starch is prepared from the roots and fibre from the bast while the roots are also said to have medicinal properties. Kudzu Vine is attracting much attention just now as a fodder plant. It is said to yield an immense crop of herbage and if the roots are rich in starch as is indicated from the above, they must have a high feeding value.

Seed : Per oz 4/6 ; $\frac{1}{4}$ lb 15/- ; $\frac{1}{2}$ lb 27/6 ; lb 50/-

Plants : 2/- each in quarter tins.

Castor Bean (*Ricinus communis*, Linn.).—The plant from which the castor oil of commerce is derived. It thrives in South Africa and probably this country is its original home. The seed is used only for the oil it produces and must not be fed to stock as it contains a poisonous principle. The residue after expressing the oil is a useful fertiliser but cannot be used as cake for stock-feeding for the above-mentioned reason, although, it is possible, we believe, to extract the poison and thus render it safe.

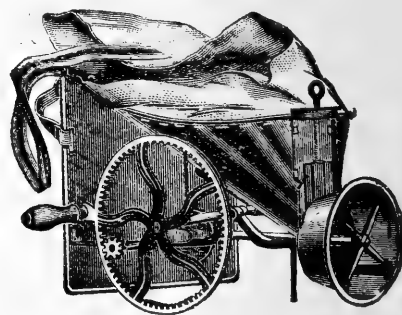

Seed : Per lb 2/- ; 25 lbs 40/-

The Cyclone Seeder

For Cereals and Small Seeds

17/6 each

Cahoon Broadcast Seeder

For sowing Cereals, Lucerne,
Rape and Similar Seeds

37/6 each

Vegetables.

We pay postage on SIXPENNY PACKETS of seeds to any address in South Africa. For Rhodesia and British Bechuanaland Protectorate, not less than twelve packets must be ordered at one time to secure this privilege. For all other parts, six packets or more may be ordered at one time.

Garden Peas.

(*Pisum sativum*.)

Perpkt 1 lb 25lbs 100lbs

Woodside First-Of-All.—A very early variety and a prolific bearer, often producing pods within 10 weeks from sowing. It is not quite so hardy as the main crop varieties, but cannot be surpassed for very early sowing and also for spring sowing. Height 3ft. ...

6d 1/6 31/3 110/-

Gradus.—One of the finest early peas in cultivation, producing large, round, well-filled pods with large peas of finest flavour. Should be sown after the very cold weather is past. Height 2½ ft. ...

6d 2/6 56/3

American Wonder.—One of the very earliest wrinkled sorts in cultivation, of the finest quality and flavour and wonderfully productive. Its most distinctive feature is its compact habit of growth. Height 1 ft. ...

6d 2/3 50/-

White Canadian Wonder.—Hardy, and a vigorous grower. In habit it is much like the Red Canadian Wonder and it is a prolific bearer of large pods. ...

6d 9d 15/- 50/-

Red Canadian Wonder.—A strong grower and heavy cropper. The pods are large and of excellent quality. It is so well known as to need little recommendation ...

6d 2/- 37/6

6d 1/- 20/- 60/-

South African Seed

Burpee's Stringless Green Pod.—A very early variety and can be planted sooner than others because it stands the cold better. It is stringless and gives a round-podded snap bean that is tender and of excellent flavour. It is one of the very best green-podded varieties we know ...

6d 1/9 37/6 125/-

Surecrop Stringless Wax.—Hardy, highly rust resistant and absolutely stringless at all stages of growth. It gives rich yellow

DWARF BEANS—*continued.*

Per pkt 1 lb 25 lbs 100 lbs

Pods of great length and broad and thick. It is very early and a vigorous grower and productiveness is its special feature ... 6d 2/9 62/6

Hodson Wax.—A thoroughly reliable and highly productive variety. The pods are long and nearly straight and are creamy-white in colour. A handsome variety and very popular... 6d 2/9 62/6

Mont D'Or Butter.—A yellow-podded, black-seeded variety of great merit. The pods are of good size and excellent flavour and are borne in profusion ... 6d 2/9 62/6

Sugar Beans.

(*Phaseolus vulgaris.*)

Per pkt 1 lb 25 lbs 100 lbs

Half-White or Painted Lady.—This is the most popular variety of this popular type. The beans are large and of an oval-round shape and about half the bean is white in colour and the other half is red-speckled. They are useful either green or dry and are specially esteemed for "brédies" ... 6d 9d 15/- 55/-

Port Natal.—Similar to "Half-White" but a slightly smaller bean and without the half-white marking... 6d 9d 15/- 50/-

Woodside Prize White.—The best of all the Sugars. As a dried bean it has no equal for it combines the superior appearance of a white bean with the characteristic Sugar Bean flavour. As a green bean, also, it is entirely satisfactory ... 6d 1/6 31/3 100/-

Runner Beans.

(*Phaseolus multiflorus.*)

Per pkt 1 lb 25 lbs 100 lbs

Scarlet Runner.—This well known and popular bean is exceedingly ornamental when in flower and produces a heavy crop of large pods ... 6d 1/- 18/9 60/-

Large White or Bomba.—This is a white variety of the Scarlet Runner from which it has no doubt been derived as a "sport." The dried beans are of the best table quality and are large and shaped like the Scarlet Runner Bean. It is an immense cropper and large quantities were exported from South Africa during the recent war for army purposes ... 6d 1/- 18/9 60/-

Tall White Scimitar.—The beans are white and much smaller than the Scarlet Runner. The pods also are of a smaller and finer type. One of the best of the Runner Beans for use as a green bean ... 6d 2/-

Lima Beans.

(*Phaseolus lunatus*.)

Lima Beans are very largely grown in America where they are greatly esteemed as a table bean used in similar manner to Broad Beans. The flavour, however, is distinct and the bean is tender to frost so that it becomes a summer crop and cannot be sown at the same time as Broad Beans. In other respects it may receive similar cultural treatment. As a summer crop the Lima Bean is not yet fully appreciated in South Africa, but it makes so delicious a vegetable that it must surely come into great favour in the near future.

Per pkt 1lb 25lbs 100lbs

Fordhook Bush.—A very satisfactory bean of the bush or dwarf type. It gives a large bean of excellent flavour and is a most prolific bearer, continuing late in the season 6d 2/9

Wood's Prolific Bush.—A great improvement on the original bush lima. It makes a larger growth and is a prolific bearer, in fact, it is claimed to be the most prolific of all the bush limas. The beans are smaller than Fordhook Bush Lima ... 6d 2/9

Carpinteria Pole.—The vine is strong and produces a great abundance of large, full pods which are thicker and plumper than is usual with Pole Limas. The seed has a distinctive greenish tint which is an indication of the finest quality ... 6d 2/9

Small or Butter.—A tall or pole variety. It is hardier and earlier than the larger-seeded varieties and a prolific bearer. It is the popular "butter bean" of the Southern States of America ... 6d 3/-

Kudu-Lima or Governor Bean.—A local variety of the tall-growing type. It is a remarkably vigorous grower and prolific bearer ... 6d 1/- 18/9 60/-

Broad Beans.

(*Vicia faba*.)

Per pkt 1lb 25lbs 100lbs

Woodside Giant Green.—We have every confidence in recommending this as a variety of superior quality and a prolific bearer of shapely pods ... 6d 1/9 37/6 125/-

Taylor's White Windsor.—An excellent main-crop variety and a distinct improvement over the older sorts ... 6d 2/- 43/9

Carter's Leviathan.—A very prolific variety with long pods which contain from 8 to 10 beans of excellent flavour. It is hardy and suitable for growing an early, medium, or main crop. Grows 3 to 4 ft. high; space about 42 inches between the rows ... 6d 1/3 23/- 85/-

Other Legumens.

Per pkt 1 lb 25 lbs 100 lbs

Hyacinth Bean (*Dolichos lablab*, Linn.)

—An annual suited to high altitudes, being cultivated up to 7000 ft. in the Himalayas. The young pods and the ripe seeds are used for culinary purposes, either dry or green, like the ordinary haricot bean and the whole plant can be used for fodder ...

6d 8/6

Large White or "Kies" Lentils

(*Lathyrus* sp.)—A large-seeded lentil of excellent quality for culinary purposes. It is used in the same manner as dried peas and its flavour is much esteemed.

6d	2/-	6/9	25/-
----	-----	-----	------

Plants: 1/9 per 100; 15/- per 1000

Woodside Early.—A new quick-maturing variety which has been developed by a very careful grower who speaks very highly of its quality and reliability as a cropper. Suitable for the later sowings

6d	2/6	8/6	30/-
----	-----	-----	------

Plants: 2/3 per 100; 20/- per 1000

Garden Kale.

(*Brassica oleracea acephala.*)

Dwarf Curled.—Of compact habit forming a dense mass of moss-curved foliage

Per pkt	oz	$\frac{1}{4}$ lb	1 lb
6d	1/-	3/-	10/6

Plants: 2/- per 100; 17/6 per 1000

Chou Moellier or Marrow Kale.—A large variety of Kale with thickened stem. The leaves may be used like Curled Kale but its value as a vegetable is in the stem which is used in the same manner as Kohl Rabi or Knol Kool

6d	9d	2/3	7/6
----	----	-----	-----

Plants: 1/6 per 100; 12/6 per 1000

Kohl-Rabi or Knol Kool.

(*Brassica oleracea caulorapa*.)

	Per pkt	oz	$\frac{1}{4}$ lb	1 lb
Early White Vienna. —A quick-maturing variety of splendid quality. It may be sown early for a winter crop and also later for a spring crop. Plants may be spaced about 18" apart and 2 ft. between the rows ...				
Plants: 1/9 per 100; 15/- per 1000	6d	1/-	2/6	7/6
Extra Large White Goliath. —A vigorous grower producing large bulbs. It stands drought and heat better than most varieties and will suit both for a winter and for a spring crop ...				
Plants: 1/9 per 100; 15/- per 1000	6d	1/-	2/6	7/6

Mustard.

(*Brassica alba*, Vis.)

	Per pkt	oz	$\frac{1}{4}$ lb	1 lb
White. —This is the variety used for growing with Cress ...	6d		1/-	2/-

Calabashes.

	Per pkt	oz	$\frac{1}{4}$ lb	1 lb
Bottle Gourd or Large Calabash (<i>Lagenaria vulgaris</i>).—This is the well known variety used by the natives as a water receptacle. It is also used as a vegetable in similar manner to Vegetable Marrow but must be taken very young for that purpose...				
... 6d	1/6	4/6	15/-	
Pipe Calabash (<i>Lagenaria</i> Sp.).—At one time largely grown for the manufacture of pipe bowls. It makes an excellent vegetable if used young in similar manner to Vegetable Marrow ...				
... 6d	2/6	8/6	30/-	
Turkish Calabash (<i>Lagenaria</i> Sp.).—Of unique shape, like a decanter with long neck. The rind is fairly thin and the variety should prove a very useful one for growing as a vegetable. Per pkt of 6 seeds ...				
... 1/-				
Solomon Islands Gourd or Guad Bean (<i>Lagenaria</i> Sp.).—Per pkt of 6 seeds ...				
... 1/-				
Japanese Sponge Gourd (<i>Luffa petola</i>).—Not a true Calabash but listed with them for convenience. It is an ornamental gourd, the fibrous tissue of which may be used as washing sponges and scouring cloths, etc. Presumably this variety has no value as a vegetable. The seeds are used in medicine as a purgative ...				
... 1/-				

CALABASHES—*continued.*

Naras or Narrah Fruit (*Acanthosicyos horrida*.)—Not a true Calabash, but listed with them for convenience. A remarkable leafless plant which grows on the sand dunes in Gt. Namaqualand. Subterranean water is necessary for its success and it thrives even though the water may be brackish. The roots penetrate to a great depth for the necessary water and thus it succeeds where most plants could not exist. The pulp and the seeds are used as food by the natives, the former being dried and stored for later use when necessary

Per pkt oz $\frac{1}{4}$ lb 1 lb

1/-

Cucumber.

(*Cucumis sativus*.)

New Model.—This Cucumber is very early, hardy and productive and is uniform in shape and size. It holds its deep rich green colour remarkably well and is affected less by the hot sun than any other. We recommend this variety particularly for market growers, but it is equally good for the home garden.

Per pkt oz $\frac{1}{4}$ lb 1 lb

Giant Pera.—A long cucumber of excellent table quality and one that can be specially recommended for the home garden

Fordhook Famous.—This variety is long, straight and well-formed, a vigorous grower and very productive. It retains its green colour particularly well

Woodside Telegraph.—This strain of the well known Telegraph Cucumber is the result of careful selection in South Africa and it is consequently hardier than the old variety. It is a strain that we can thoroughly recommend, giving Cucumbers of good length and beautiful shape and tender and crisp

Noroton Improved White Spine.—Of excellent shape and a very productive variety

New Orleans Market.—Suitable either for forcing or for the open ground. It is an excellent cropper

Bedfordshire Ridge.—A well known hardy and prolific variety. It is of moderate length and compact shape and a very heavy cropper

Japanese Climbing.—A most attractive Cucumber and a real climber. It comes into bearing quickly and sets its fruit constantly throughout the season. It is of excellent quality and a dark green colour

6d 1/6 4/6 15/-

6d 1/6 4/6 15/-

6d 1/6 4/6 15/-

6d 2/- 6/9 25/-

6d 1/3 4/- 12/6

6d 1/6 4/6 15/-

6d 1/6 4/6 15/-

6d 1/6 4/6 15/-

CUCUMBER—*continued.*Per pkt oz $\frac{1}{4}$ lb 1 lb

Woodside Cape Stam.—This is a special selection from the popular Cape variety. In type it is somewhat like Bedfordshire Ridge and it is of superior quality and a most reliable cropper

6d 2/- 6/9 25/-

Woodside Gherkin.—A very fine prickly Gherkin splendid for pickling and may be used as a Cucumber at a later stage

6d 2/- 6/9 25/-

Musk Melons.*(Cucumis melo.)*Per pkt oz $\frac{1}{4}$ lb 1 lb

Woodside Perfection.—A large melon of superior quality. The strain has been very carefully selected by one of the best local growers. We have every confidence in recommending this variety

6d 1/9 6/- 20/-

Woodside Mammoth.—Similar to Woodside Perfection but usually attains a larger size. It is also of splendid quality and a highly desirable variety both for marketing purposes and for the home garden

6d 1/9 6/- 20/-

Green Montreal.—A large round netted melon. The flesh is thick and a light green colour. It is a late-maturing variety

6d 1/- 3/- 10/-

Long Island Beauty.—One of the earliest and finest in quality and a most beautiful melon

6d 1/3 4/- 13/6

Melrose.—Oval in shape, dark green in colour and densely netted. The flesh is thick and light green shading to salmon. Excellent flavour

6d 1/3 4/- 13/6

Netted Gem, Round.—A very early variety, small and of fine flavour. It is green-fleshed and a most prolific bearer

6d 1/- 3/- 10/-

Skillman's Netted.—Of oval shape, green-fleshed, sweet and highly perfumed. It is early maturing

6d 1/3 4/- 13/6

Cosmopolitan.—Round, densely netted, green-fleshed and very sweet

6d 1/3 4/- 13/6

Hackensack, Extra Early.—A large round melon of extra good quality

6d 1/- 3/- 10/-

Jenny Lind.—This is a small melon, green-fleshed, very early and of splendid quality

6d 1/3 4/- 13/6

Banana.—This is quite a curiosity. It grows 18" to 24" long. The flesh is thick and of delicious flavour

6d 1/6 5/- 17/6

Ohio Sugar.—One of the most luscious green fleshed melons now on the market. It is round, inclined to oval in shape, the flesh

VEGETABLES—Cucurbits

49

MUSKMELONS—continued.

is deep and the cavity small. It is of that medium size which is so much in demand in all markets. It is a distinctly ribbed and heavily netted melon and because of its firm flesh and solidity it carries well...

Per pkt oz ¼ lb 1 lb

6d 1/3 4/- 13/6

Cape Winter or Export.—This is one of the finest export melons of the Casaba type. It has been grown in South Africa for a number of years and has developed superior qualities from careful selection

6d 3/6 12/- 45/-

Hybrid Casaba.—This variety makes vigorous growth and is a very heavy cropper. It produces melons of large size and splendid flavour. The skin is green until the fruits begin to ripen when it turns a light yellow. The flesh is white, rich and luscious and from 2" to 3" thick

6d 2/- 6/9 25/-

Belalcazar.—A long-keeping melon of oblong shape. The skin is dark green and the flesh is of fine texture and sweet. It is said to keep as long as 5 months in good condition and is consequently recommended as a shipping variety

6d 2/- 6/9 25/-

Winter Antibes.—Of oval shape, smooth and of dull white colour when ripe. The flesh is green, very sweet and juicy. It is an excellent keeper

6d 1/9 6/- 20/-

Winter Pineapple.—A green netted melon which keeps in splendid condition for a considerable time after being pulled. It is of excellent flavour

6d 1/6 5/- 17/6

Water Melons.

(*Citrullus vulgaris*.)

Per pkt oz ¼ lb 1 lb

Ice Cream.—An early variety and a prime favourite in the Western Province where it is probably more largely grown than any other kind. It is white-seeded and the flesh is luscious and crisp with a thin rind

6d 1/- 3/- 10/-

Dark Icing.—An extra early and extra good melon for home use and near-by market. It is one of the most delicious of melons, rich red and sugary to the very thin rind

6d 1/- 3/- 10/-

Alabama Sweets.—Oblong in shape, large and attractive. The skin is tough and dark green with darker stripings: flesh bright red, solid, sweet and entirely free of stringiness. Under good cultivation the melons attain a great size

6d 1/- 3/- 10/-

Florida Favourite.—A splendid large, long melon. It matures early, carries well and is a fine home melon. Its solid, juicy, bright crimson meat is deliciously sweet and the rind is thin

6d 1/- 3/- 10/-

WATERMELONS—*continued.*

Halbert Honey.—A long early melon with dark glossy green skin, crimson flesh and unsurpassed for sweetness. It is splendid for home use and near-by markets but the rind is too thin and brittle to carry a great distance

Per pkt oz ¼ lb 1 lb

6d 1/- 3/- 10/-

Black Spanish.—Large, roundish, dark green skin, dark red flesh, early

6d 1/- 3/- 10/-

Mountain Sweet.—Oblong fruit, thin rind, red flesh, sweet and solid, late

6d 1/- 3/- 10/-

Tom Watson.—A large and long melon. It has a dark green skin which is thin but tough and carries well. The flesh is deep red, crisp, melting, and of finest flavour

6d 1/- 3/- 10/-

Dixie.—Ripens early, is a good yielder and of attractive appearance. The skin is dark green striped with a lighter green. The rind is tough, giving it a good carrying quality. The flesh is bright scarlet and ripens close to the rind

6d 1/3 3/6 12/6

Cuban Queen.—Oval in shape, solid and heavy. This is an excellent early variety with regularly marked skin of a somewhat light green colour

6d 1/- 3/- 10/-

Rattlesnake.—An old and favourite variety. It has a thin, tough rind and deep scarlet flesh with a flavour that is unsurpassed by any other variety

6d 1/- 3/- 10/-

Pumpkins.

(*Cucurbita pepo*, L.)

Per pkt oz ¼ lb 1 lb

Fraserdale Improved Boer.—An improved strain of the Cape Boer Pumpkin. It is a heavy cropper and splendid keeper. The flesh is thick and firm and of excellent flavour. It is a splendid cooking variety

6d 1/- 2/6 8/6

Woodside Boer.—In type this is very much like the Fraserdale Improved Boer and shares many of its good qualities

6d 1/- 2/6 8/6

Large Flat Cheese.—Flat in shape and one of the best varieties for family use

6d 1/- 2/6 8/6

Virginia Mammoth.—Oval in shape and grows to a great size. It is thick-fleshed, of first rate flavour and splendid keeping quality; a very heavy cropper

6d 1/3 3/6 12/6

Iron Bark.—Medium in size and of excellent flavour

6d 1/6 4/6 15/-

Bright Red Etampes.—Of medium size, flat and bright red colour. It is very productive and of good flavour

6d 1/6 4/6 15/-

Turks Cap.—An excellent table variety and splendid keeper

6d 1/- 3/- 10/6

PUMPKINS—continued.

	Per pkt	oz	$\frac{1}{4}$ lb	1 lb
Woodside Cape Sweet. —An improved strain of the popular Cape Sweet Pumpkin	6d	1/-	3/-	10/6
Cushaw Striped. —A splendid striped crook-neck variety of good flavour and excellent cooking quality	6d	1/-	2/6	8/6

Squash and Vegetable Marrow.

(*Curcubita pepo.*)

Bush Varieties.

	Per pkt	oz	$\frac{1}{4}$ lb	1 lb
Golden Custard Squash. —This is a Mammoth strain of the Golden Bush on which it is a great improvement. It has golden yellow flesh of very fine quality	6d	1/3	3/6	12/6
Wood's Earliest Prolific Squash. —It is earlier than any other Squash and consequently commands the highest prices and is a very profitable marketing variety. The fruits are similarly shaped to the ordinary Scalloped Squash but the scallops are not so pronounced and the fruits are better filled out, containing more flesh	6d	1/3	3/6	12/6
Woodside Mammoth Squash. —A specially developed strain of White Scalloped Bush. The fruits are of tremendous size and splendid quality	6d	1/9	6/-	20/-
Early White Scallop Squash. —A splendid early maturing variety which is a favourite among market gardeners	6d	1/6	4/6	15/-
Long Island White Squash. —An improved strain of White Scallop Bush. It is very prolific and of good shape	6d	1/3	3/6	12/6
Silver Custard Squash. —A Mammoth strain of Early White Scallop Bush. The fruits are very large and produced freely	6d	1/3	3/6	12/6
Long White Bush Vegetable Marrow. —A favourite marketing variety and a great cropper	6d	1/3	3/6	12/6
Long Green Bush Vegetable Marrow. —Similar to Long White Bush excepting in colour	6d	1/3	3/6	12/6
Long Green Warted Bush Vegetable Marrow. —Similar to the ordinary Long Green but warted. It is a very productive variety	6d	1/6	4/6	15/-

Trailing Varieties.

	Per pkt	oz	$\frac{1}{4}$ lb	1 lb
Long White Trailing Vegetable Marrow. —Similar to Long White Bush but of trailing habit	6d	1/-	2/6	8/6

TRAILING SQUASH—*continued.*

Per pkt oz ¼ lb 1 lb

Mammoth Warted Hubbard Squash.

—Of large size and dark green colour. It is covered with warts

6d 1/9 6/- 20/-

Golden Hubbard Squash.—A yellow strain of Mammoth Warted Hubbard ...

6d 1/- 2/6 7/6

Boston Marrow Squash.—Oval in shape and of bright orange colour. The flesh is yellow and fine and of delicious flavour ...

6d 1/- 2/6 7/6

Little Gem Squash.—A small round green squash about the size of an orange, yellow when ripe. This most delicious squash is boiled and eaten without removing the seeds. There is nothing to equal it in flavour and it is a most prolific bearer ...

6d 2/6 7/6 25/-

Turban Squash.—This unique variety should be in every home garden. It is of most attractive appearance and of splendid table quality

6d 1/6 4/6 15/-

Perfect Gem Squash.—A strong grower and heavy yielder. The fruits are round and from 4" to 6" in diameter, of a creamy-white colour with thin, smooth but slightly ribbed shell. It is a splendid keeper and the flesh when cooked is dry, sweet and of rich flavour. This variety is suitable for using when ripe as well as in the green state

6d 1/6 5/- 17/6

Globe Artichokes.*(Cynara scolymus.)*

Per pkt oz ¼ lb 1 lb

Woodside Purple Globe Artichoke.—

This delicious and wholesome vegetable thrives particularly well in South Africa and should be found in every home garden. The fleshy flower bud is the part used and it is gathered before the scales open freely. The buds are boiled in water with a little salt until the inner parts soften. They are served with white sauce

6d 3/9 12/6 40/-

Plants: 7/6 per doz.; 40/- per 100; smaller 3/- and 20/-

Large Green or Paris Globe Artichoke.—Next to the Woodside Purple, we prefer this variety to any other

6d 3/9 12/6 40/-

Spanish Cardoon (*Cynara cardunculus*). This plant is closely allied to the Globe Artichoke and resembles it in growth but the parts used are not the same. The crisp leaf stalks of the Cardoon are used. They are blanched like Celery and stewed or used in soups and salads. The culture is the same as for Celery

6d 1/- 2/6 8/6

Asparagus.

(*Asparagus officinalis*.)

	Per pkt	oz	$\frac{1}{4}$ lb	1 lb
Woodside Giant French. —This variety is most deservedly popular. The strain has been specially developed for us and as the seed is South African saved it gives a high germination percentage and vigorous growth. Grown beside other varieties in our nurseries the difference in growth was remarkable ...	6d	1/-	3/-	10/6
Plants: 9/- per doz.; 60/- per 100; smaller 5/- and 30/-				
Conover's Colossal. Plants only: 7/6 per doz.; 40/- per 100; smaller 4/- and 20/-				
Purple Argentueil. Plants only: 7/6 per doz.; 40/- per 100; smaller 4/- and 20/-				

Celery.

(*Apium graveolens*.)

	Per pkt	oz	$\frac{1}{4}$ lb	1 lb
Thorburn's Gilt Edge Golden Self-Blanching. —A new introduction from America ...	1/-	8/6		
Plants: 1/- per doz.; 6/- per 100				
Solid White. —An old and favourite variety and deservedly popular ...	5d	9d	2/6	8/6
Woodside Improved White. —An improved local strain which is much favoured by market gardeners and can not be beaten for the home garden ...	6d	1/-	3/-	10/6
Plants: 9d per doz.; 4/6 per 100				
Woodside Rose Pink. —Locally grown seed is always reliable in germination and prevents many disappointments. This variety is the result of careful selection by our grower ...	6d	1/-	3/-	10/6
Plants: 1/- per doz.; 6/- per 100				
Woodside Soup. —This is the true Soup Celery and preferred by many experienced cooks for flavouring soups and stews ...	6d	9d	2/6	7/6
Plants: 9d per doz.; 4/6 per 100				
Turnip-Rooted Celery or Celeriac (<i>Apium Graveolens rapaceum</i>).—The swollen crowns of this variety are used as flavouring for soups, etc. ...	6d	1/-	3/-	10/6

Egg Plant.

(*Solanum melongena*.)

New York Spineless.—Produces very large, oval, purple fruits of excellent quality. It is an early variety and one of the most popular ... 6d 2/6 9/- 32/6
Plants: 2/6 per doz.

Long White Chinese.—A late variety with long, slender white fruits which are usually curved. It is a good table variety and of attractive appearance ... 6d 2/6 7/6 25/-
Plants: 2/6 per doz.

Gooseberries.

Cape (*Physalis peruviana edulis*).—Well known on account of the excellent reputation, abroad as well as in South Africa, of the delicious jam that is made from its fruit. Cape Gooseberry jam is usually priced higher than other varieties, a clear indication of popularity. It is easily cultivated and thrives all along the coastal belt of the Cape. Sow in early spring and prick out into tins as soon as the plants can be handled. When large enough they are spaced 8 feet apart in the permanent situation ... 6d 2/6 8/6 30/-
Plants: 1/6 per doz.; 7/6 per 100

Giant Japanese (*Physalis franchetti*).—An excellent fruit for Jam. It is easily grown and produces a very heavy yield of fruit ... 6d 2/6 8/6 30/-

Herbs, etc.

Curled Chervil (*Anthriscus cerefolium*).—The leaves are used for garnishing as well as for flavouring soups, etc. The cultivation is the same as for Parsley ... 6d 1/6 5/- 17/6

Plain Chervil (*Chærophylum aromaticum*).—The cultivation and uses of this plant are the same as with Parsley ... 6d 1/6 5/- 17/6

Magdeburgh Chicory (*Cichorium intybus*, L.).—A large-rooted variety. The roots may be cooked and eaten like Parsnips as is the custom in some parts of Europe, or the leaves make an excellent salad when well blanched ... 6d 1/3 3/9 12/6

HERBS, etc.—continued.

Per pkt oz $\frac{1}{4}$ lb 1 lb

Curled and Plain Cress (*Lepidium sativum*).—Used with White Mustard for growing "Mustard and Cress" ...

6d 9d 1/6 5/-

Water Cress (*Nasturtium officinale*).—A most wholesome herb. It is easily grown in the garden in a sunken trench in which plenty of well rotted manure has been buried and well mixed with the soil. The trench should be shaded until the plants are well up and must never be allowed to become dry while growth continues ...

6d 3/6 12/- 40/-

Curled Bordeaux Endive (*Cichorium endivia*).—An excellent salad when well blanched. When the plant is well grown the outer coarse leaves are cut away and the plant covered with a paraffin tin so that all light is excluded. In about three weeks blanching should be complete ...

6d 1/3 3/9 12/6

Horse Radish (*Cochlearia armoracia*).—Used as a condiment, or sauce, with roast beef. It is easily grown, needing the minimum of attention once it is established, although to grow shapely roots it is necessary to set out small root cuttings at intervals in a good, rich bed.

Roots: 1/- each; 9/- doz.

Common Lavender.—(*Lavandula spica*) ...

6d 1/6 4/6 15/-

Plants: 5/- per doz.; 2/- each in single tins.

Sweet Marjoram (*Origanum marjorana*) ...

6d 1/6 4/6 15/-

Plants: 3/- per doz.

Mint (*Mentha*).—This may be grown from divisions of the roots or from cuttings.

Roots: 1/- per doz.

Mushroom Spawn (*Agaricus campestris*)

9d per cake; 7/6 per doz.

Woodside Curled Parsley (*Carum petroselinum*).—A superb strain, well curled and a vigorous grower ...

6d 9d 2/- 6/6

Plants: 1/- per doz.

Common or Plain Parsley (*Carum petroselinum*).—Preferred by many for flavouring ...

6d 9d 1/6 5/-

Plants: 6d per doz.

Large Bell or Bull Nose Pepper (*Piper*).—Gives large fruits of mild flavour. The plant is early and of compact habit ...

6d 1/3 4/- 13/6

Plants: 6/- per doz.; 1/6 each in single tins.

HERBS, etc.—continued.Per pkt oz $\frac{1}{4}$ lb 1 lb

Long Red Pepper (*Piper*).—This well known variety hardly needs description. It is perhaps more largely grown than the others and its fruits, having a stronger flavour, are preferred for every purpose where this is desirable

Plants: 3/6 per doz.

Large Sweet Spanish Pepper (*Piper*).—The fruits are large and handsome and of very mild flavour. The plant is hardy but rather late in maturing

Plants: 6/- per doz.; 1/6 each in single tins.

Broad Leaf Sage (*Salvia officinalis*) ...

Plants: 3/- per doz.

Garden Thyme (*Thymus vulgaris*) ...

Plants: 3/- per doz.

Cabbage Lettuce.(*Lactuca sativa*.)Per pkt oz $\frac{1}{4}$ lb 1 lb

California Cream Butter.—Of distinct shape, heading up like a Cabbage and almost as solid. The colour is light green and the flavour rich and buttery

Plants: 1/6 per 100

Curled Neapolitan.—A splendid Cabbage Lettuce. It produces a crisp and solid heart and grows to a good size. It is one of the best for marketing purposes, making very fine heads

Plants: 1/3 per 100

Woodside Giant.—This splendid Lettuce is undoubtedly one of the very best for our climate. It is large and crisp and a strong grower

Plants: 1/3 per 100

All the Year Round.—A small and quick-maturing variety which can be sown at almost any season. It is one of the most successful varieties...

Plants: 1/- per 100

New Orchid.—The famous Orchid Salad used in many of the highest class restaurants. It should be cut when the orchid centre develops, that is, when the plants have attained about quarter of their full growth

Plants: 1/6 per 100

Giant Crystal Head.—This variety is large and solid and the outside leaves are bright green. The inside leaves are crystal white with yellow heart. It is crisp and tender

Plants: 1/3 per 100

VEGETABLES—Miscellaneous

57

CABBAGE LETTUCE—*continued.*

	Per pkt	oz	$\frac{1}{4}$ lb	1 lb
Mammoth Black Seeded Butter. — Forms large cabbage-like heads, creamy white inside, very tender and of rich buttery flavour. It is a fine summer lettuce resisting heat and drought and slow to go to seed ...	6d	1/3	3/9	12/6

Plants: 1/3 per 100

Woodside All the Year Round. —A valuable strain of this popular Lettuce which has been developed locally and can be recommended as a most suitable variety for our climate... ..	6d	1/6	4/6	16/-
---	----	-----	-----	------

Cos Lettuce.

(*Lactuca sativa.*)

	Per pkt	oz	$\frac{1}{4}$ lb	1 lb
White Paris. —One of the best of the Cos varieties	6d	1/-	2/6	8/6

Plants: 1/6 per 100

Green Paris. —A quick-growing variety somewhat smaller than White Paris Cos but earlier. It is of a dark glossy green colour and the head is long and pointed or only slightly blunt	6d	1/-	3/-	10/6
--	----	-----	-----	------

Plants: 1/3 per 100

Okra or Gumbo.

	Per pkt	oz	$\frac{1}{4}$ lb	1 lb
Long Green. —The seed should be sown late in the Spring in drills 3 ft. apart where the plants are to remain. Later the plants are thinned to 9" to 12" apart. They may also be raised in pots and transplanted without disturbing the roots	6d	2/6	7/6	25/-

Rhubarb.

(*Rheum.*)

	Per pkt	oz	$\frac{1}{4}$ lb	1 lb
Victoria. —Rhubarb can be successfully raised from seed on a well prepared bed in a sheltered situation. The soil should be rich and moist and when the young plants are large enough to handle they should be transplanted into rows 3 feet apart each way. All flower stems that may appear should be promptly removed. The plants will require a heavy dressing of well rotted manure each year and this may be supplemented with Starke's Superior Garden Fertilizer. Sow the seed from July onwards	6d	1/3	3/9	12/6

Plants: 1/- each; 9/- per doz.

Spinach.

Per pkt oz $\frac{1}{4}$ lb

Yellow Cutting Spinach Beet or **Swiss Chard** (*Beta vulgaris*).—The roots of this Beet are undeveloped, the leaves being used for Spinach. The broad stems also when cooked and served with white sauce are delicious

6d 1/- 2/6 7/6

Plants: 2/- per 100

New Zealand (*Tetragonia expansa*).—Valuable for Summer growing as it stands the hot weather well

6d 1/- 2/6 7/6

Prickly (*Spinacea oleracea spinosa*).—A Winter variety. Sow with the first Autumn rains in drills 18" apart and thin the plants to 12" apart in the row

6d 1/- 2/6 7/6

Melde or **French** (*Atriplex hortensis*).—A tall-growing plant producing an abundance of leaves which make a delicious Spinach. It is hardy and easy to cultivate

6d 9d 2/- 6/-

Sweet Corn.

(*Zea mays*.)

Per pkt $\frac{1}{8}$ lb 1 lb 5 lbs

Country Gentleman.—The most popular of all Sugar Corns for the main crop and the home garden. It gives a large ear with deep grain and a thin cob. It is of excellent quality, tender and sweet and one of the very best for the table

6d 1/3 2/- 8/6

Early Mammoth.—Gives very large ears of fine quality and medium early in maturing

6d 1/3 2/- 9/-

Golden Cream.—A new variety derived by crossing Country Gentleman and Golden Bantam. It comes from America with a very high reputation

6d 1/6 2/6 10/-

Tomatoes.

(*Lycopersicum esculentum*.)

Per pkt oz $\frac{1}{4}$ lb 1 lb

Starke's Invincible Canning.—This excellent variety has been specially selected for canning purposes for which it is admirably suited because of its medium size, firm flesh and beautiful round shape. The fruit is borne in clusters and the plant is an exceptionally heavy bearer. Apart from canning it is also a most desirable table variety, being of suitable size and excellent quality in every way

6d 4/- 13/6 50/-

Plants: During August 2/6 per doz.; September onwards 1/6 per doz.; 7/6 per 100

TOMATOES—*continued.*

Per pkt oz ¼ lb 1 lb

Livingston's Coreless.—In colour this is bright red and in shape almost round and it is a very productive variety bearing clusters of 4 to 7 fruits 6" to 8" apart along the stem. All the fruits are of marketable size and many are quite large. It is globe-shaped being full at the stem end and splendid either for slicing or canning. The plant is a strong grower ...

6d 3/- 10/6 35/-

Plants: During August 2/- per doz.; September onwards 1/3 per doz.; 5/- per 100

Wood's Improved Beauty.—This is one of the most productive main crop Tomatoes. The strain we are offering is the result of continued selection and it has proved itself a very great favourite in South Africa, especially in the Transvaal. The fruits are always smooth, large and perfect form and quality. They are borne in clusters of 4 to 6. They ripen up well and early and the flesh is very firm and seldom cracks after rain. It is specially suited for transporting to distant markets ...

Sweet Peas.

(*Lathyrus odoratus*.)

Sweet Pea enthusiasts will find in the following list an exceptionally good assortment for exhibition purposes. The varieties listed under "Summer-Flowering" are all of proved exhibition standard and both for collections and for the variety classes they are unsurpassed. The "Winter-Flowering" varieties are rapidly coming to the fore and will undoubtedly be taken up more keenly as time goes on. We are offering an excellent assortment of these also.

Summer-Flowering—Exhibition Varieties.

	Per pkt	oz
Barbara. —Salmon pink; one of the best for exhibition	6d	5/-
Birdbrook. —Chocolate flake on light ground. Gives a big percentage of fours	6d	5/-
Dobbie's Cream. —Improved strain; deep cream	6d	7/6
Edith Taylor. —A deep pink self; good exhibition variety	6d	5/-
Fiery Cross. —A glowing orange-cerise and sun-proof	6d	5/-
King Manoel. —Maroon shaded violet, grand substance	6d	10/-
King White. —A pure white of fine form giving large flowers and an abundance of fours	6d	6/-
Lady Evelyn Eyre. —Blush pink shaded with pale salmon and delightfully waved	6d	5/-
Lilian. —Pale pink, flushed buff, very large	6d	12/6
Lord Nelson Spencer. —Deep blue. A very useful exhibition variety: standards slightly hooded	6d	5/-
Louvain. —Ivory, suffused pink; a strong grower	6d	5/-
Margaret Atlee. —Rich cream pink, beautiful shade; a strong grower	6d	5/-
Maud Holmes. —Crimson, sun-proof, of splendid form and substance; the best of its colour	6d	6/-
Mrs. A Gentle. —Delicate pink on white ground. Always 4 on a stem; grand exhibition variety	6d	5/-
Pathfinder. —Deep salmon-pink	6d	5/-
Princess Mary. —Deep sky blue with faint suggestion of pink; wings clear blush	6d	5/-
Queen of Norway. —Deep mauve, wonderfully waved	6d	10/-
R. F. Felton. —Undoubtedly the strongest-growing lavender variety yet introduced	6d	6/-
Robt. Sydenham. —Fine orange self; one of the best of its colour	6d	7/6
Rosabelle. —Charming rose-coloured flower of large size and exceptional beauty; a strong grower producing plenty of fours	6d	12/6

1/- 15/-

Niobe.—Light blue

1/- 15/-

Pauline.—Deep Crimson

1/- 15/-

Prince.—Dark blue

1/- 15/-

Winter Spencer Mixture.—A choice assortment of Spencer varieties of the new Winter Flowering type

6d 7/6

HERBACEOUS PERENNIALS.

This large group includes many of the most beautiful flowering and foliage plants. The majority are hardy and suitable for out-door cultivation in South Africa. Every plant enthusiast should scan the following lists with the utmost care for in them are to be found many unsuspected gems.

BOTANICAL NAME.	COMMON NAME.	Seed Pkt. oz.	Plants each doz.
Acanthus			
Lusitanica	Bear's Breech ...		2/6
An ornamental plant with large foliage and tall spikes of white and rose-coloured flowers.			
Larger plants, 4/6.			
Agapanthus			
Umbellatus	African Lily, Blue ...	1/- 20/-	9d 7/6
A beautiful native plant for the herbaceous border or for lining carriage drives. It has long strap-shaped leaves rising from bulb-like stems. Its magnificent umbels of blue flowers, veined lighter blue, are borne on a tall scape. It is a most striking plant which should be found in every garden.			
Agapanthus Umbellatus Albidus	African Lily, White ...		9d 7/6
A white form of the beautiful Blue African Lily.			
Alstromeria			
Aurantiaca	Peruvian Lily ...	1/-	9/-
The flowers are a golden orange colour streaked with red and open freely. Excellent for hot positions and does well on rockeries.			
Alstromeria	Peruvian Hybrid		
Hybrida	Alstromeria	1/-	9/-
A grand range of colours. The flowers are smaller than those of A. aurantiaca and last well in water.			
Alternanthera			
Amabilis	Alternanthera ...		1/6
Pretty dwarf edging plant with red and green foliage.			
10/- per 100.			
Alternanthera			
Flavescens	Alternanthera ...		1/6
A fine edging plant with yellow and green leaves. It is more compact than A. amabilis.			
10/- per 100.			
Althaea Rosea	... Hollyhock,		
	Single Mixed	6d 15/-	
A splendid mixture of colours; very effective.			
Althaea Rosea	... Hollyhock,		
	Chater's Double	1/-	9/-
One of the grandest and most showy hardy garden plants. Our collection of 8 varieties will be difficult to surpass.			

BOTANICAL NAME,	COMMON NAME,	Seed		Plants	
		Pkt.	oz.	each	doz.
Anemone Japonica Alba	Japanese Anemone, "Honorine Joubert"			9d	6/-
Invaluable for cut flowers in Autumn. It is suitable for borders, rock gardens and shrubberies.					
Aquilegia Chrysantha	Aquilegia 6d	15/-		
Fine waxy yellow; long spurs.					
Aquilegia Clemataquila	Clemataquila	... 6d	8/6	9d	7/6
Spurless, large flowered. A unique type. Seedlings 3/6 per dozen.					
Aquilegia Hybrida	Aquilegia, Mixed	... 6d	10/6	9d	6/-
Charming range of colours, long-spurred and strong growing. Smaller 10/- per 100.					
Aquilegia Hybrida	Aquilegia, Mrs. Scott Elliott's Strain			1/6	12/-
Aquilegias are becoming very popular in South Africa as a cut flower for decorative effect, especially under artificial light. This is a strain of long-spurred hybrids comprising the most beautiful colours and should be included in every collection of herbaceous perennials.					
Artemisia Stelleriana	Artemisia ...			3/6	
A remarkable drought-resistant, decorative plant with beautiful silvery foliage. It is splendid for large borders or rock work. It requires stopping back to induce compact growth. Smaller Plants 2/-					
Arundo Donax	Arundo 6d	6/-		
A tall-growing Bamboo-like plant with green and gold leaves suitable for lightening up dark corners and very showy in conspicuous positions. Roots: 1/6 each.					
Aster Acris	Michaelmas Daisy			9d	7/6
In 4 colours, mauve, white, pink, blue. Well known and much appreciated for their decorative effect. Smaller 3/6 per dozen.					
Bellis Perennis Monstrosa Plena	Double Daisy	... 6d	15/-		2/-
A fine type of English Daisy admirably adapted for borderings. 10/- per 100.					
Billbergia	Cape Vierkleur			2/-	
Has a fine drooping spike; sepals red, petals yellowish green, margined blue.					

BOTANICAL NAME	COMMON NAME.	Seed		Plants	
		Pkt.	oz.	each	doz.
Billbergia					
Grandiflora			3/6	
A grand plant which may be used in shady situations.					
Boltonia					
Latisquama Boltonia			1/-	7/6
A tall-growing plant producing Aster-like flowers. It suits this country well.					
Smaller 4/6 per dozen.					
Calceolaria	Calceolaria,				
Rugosa	Yellow Bedding			1/6	12/-
Rapidly coming into favour for Spring and early Summer flowering.					
Calliopsis					
Grandiflora Calliopsis, Yellow ...	6d	3/6			
A large and free flowering variety.					
Clumps 6d each; 3/6 per dozen. Seedlings 1/- dozen.					
Campanula	... Canterbury Bells,				
	Single Mixed	6d	5/-	6d	5/-
Campanula	Canterbury Bells,				
Calycanthemum	"Cup and Saucer"	6d	15/-	1/-	7/6
The calyx is very large and as showy as many types of clematis. The plants are of good pyramidal habit.					
Seedlings 3/- per dozen.					
Campanula	Carpathian Harebell,				
Carpatica	Light Blue			9d	6/-
Campanula					
Fragilis Hanging Campanula ...				2/6	
A very effective plant for hanging baskets.					
Baskets, well established, 10/6 each.					
Campanula	Japanese Bell Flower,				
Grandiflora	Pale Blue	6d	13/6	2/-	
A fine plant and easily grown.					
Campanula					
Grandiflora Alba Japanese Bell Flower ...	6d	7/6	2/-		
The white-flowered type is a very pretty plant.					
Canna Hybrida ... Cannas, "Crozy" ...				1/-	9/-
A choice assortment of the best colours.					
Named varieties 1/6 each.					
Canna Hybrida ... Cannas, "Orchid" ...				1/-	9/-
A fine range of colours.					
Named varieties 1/6 each.					
Catananche Cœ-					
rulea Bicolor Catananche ...				9d	7/6
Blue and white; silvery heads, very pretty and fine cut flowers.

One of the best white flowers.					

BOTANICAL NAME	COMMON NAME.	Seed		Plants.	
		Pkt.	oz.	each	doz.
Centranthus					
	Ruber Valerian, Red	... 6d	7/6	9d	7/6
	For wild garden, rockery or shrubby.				
Cheiranthus	... Wallflower, Mixed	... 6d	4/6		
Chelone	Barbata Shell Flower	...		6d	4/6
	Similar to Pentstemon.				
Chrysanthemum					
	Leucanthemum Oxeye Daisy	... 6d	2/6	6d	4/6
Chrysanthemum	Paris Daisy,				
Leucanthemum	"Queen Alexandra"			1/6	
	A new double form of the White Paris Daisy.				
Chrysanthemum	Shasta Daisy,				
	Maximum "King Edward VII"	6d	7/6	9d	7/6
	One of the best Shasta Daisies yet produced.				
	It has long white ray florets and strong upright stems.				

Japanese Chrysanthemums

(*Chrysanthemum sinense*)

Price: **9d.** each; **7/6** per dozen; our selection of named varieties **6/-** per dozen; un-named, but from our unrivalled collection, **3/6** per dozen.
Postage: 6d per dozen extra. Delivery: October, onwards.

Exhibition Varieties

These varieties are suitable for growing exhibition blooms by dis-budding, leaving not more than three blooms to each plant.

Ada Kitchingham. Amber chestnut.

A. J. Foster. Rose, shading to white.

Amaranth. Purple with white reverse.

Bob Pulling. Rich yellow.

Charles Blick. Delicate pink.

Col. du Croix. Golden yellow, incurved and first to bloom.

Coronation. Silvery rose.

D. B. Crane. Golden yellow, charming.

F. S. Vallis. Canary.

Gertrude Piers. Chestnut maroon, large and full.

Guy Paget. Faint purple.

H. E. Converse. Crimson and old gold.
This variety gave our best bloom last season.

Helena Williams. Choice yellow.

Hon. Mrs. Lopes. Golden yellow, twisted petals.

J. H. Silsbury. Old gold.

Julian Hilpert. Cream with long quilled petals

J. W. Molyneaux. Rich crimson, gold reflex.

L. Canning. Delicate pink.

Lelea Filkins. Pink.

Louis Boehmer. Hairy mauve.

Madame Oberthier. White, a prime favourite.

Mary Mason. Brick red.

Mrs. David Syme. Pure white.

Mrs. F. W. Pocket. A good yellow.

Mrs. G. C. Kelly. Old gold.

Mrs. Gilbert Drabble. Marble white.

Mrs. H. J. Jones. Green-tinged yellow.

Mrs. H. Stevens. Bronze yellow.

Mrs. Marsham. White,

Mrs. Mease. Sulphur yellow.

Mrs. R. C. Pulling. Lemon, gives a good bloom.

Rowland Hill.

Thomas Figg. Crimson and old gold.

Triomphe de Mont Brun. Buff, streaked red.

William Turner. Pure white. It's a beauty.

W. Wells. Old gold, a nice bloom.

Yellow Queen. A grand yellow.

JAPANESE CHRYSANTHEMUMS—continued.

For Open Ground and Decorative Effect

These varieties are equally suited to pot culture. Dis-bud lightly so as to allow ten to twenty blooms per plant and stake out for effect.

Dorothy Fox. Light pink.
Earl of Arran. Lemon yellow.
G. Hutton. Yellow ground, streaked red.
Lady Osborne. Flesh pink, incurved.
Magnificent. Deep red, gold reverse.
Moneymaker. The best white in this class for cut flowers.

Monsieur E. Andre. Salmon.
Mrs. F. Judson. White.
Mrs. Swinburn. Cream.
Shanklin. Blush-white.
William Tricker. Shaded rose on white.
W. Mease. Maroon.

Single and Pompone Varieties

These make a handsome display without dis-budding. They are grown with the least trouble, but the display is much improved by staking to the desired shape.

Buller's Pompone. A pretty white.
Captain Nevos. Purple pompone.
Eureka. White with yellow disk, quilled petal with frilled edge, the finest single Chrysanthemum for cut flowers.
F. S. Stallard. A bronze single.
La Vogue. Old gold pompone, charming and effective.
Lilian Foster. A highly decorative single cream.
Mensa. A mass of white when in full bloom.

Miss Rose. A delightful shade of pink, single.
Roupa! Beauty. Bright mahogany, a striking single, should be in every collection.
Sir Albert Rollit. Chestnut gold, a very fine single.
White Spray. Fuller petalled and more substance than the usual type of single.
Wilhelmina. Yellow quilled petals, single.
Will Jordan. White and purple, single.

The decorative side of Chrysanthemum culture has, in the past, been sadly neglected, but there is undoubtedly a tendency abroad to give far greater attention to this feature and we venture to prophesy that in the near future the public will demand more and more real effect in Chrysanthemum display. For this purpose we direct attention specially to the Single and Pompone varieties listed above. The most charming effect can be obtained by intelligent work with these and the occupation opened up in this section is intensely interesting. Our admiration for the perfection that has been attained with exhibition blooms remains unstinted, but we do feel that there is a very formal effect about a display of these unless relieved by an intelligent interperment of the decorative types.

BOTANICAL NAME.	COMMON NAME.	Seed		Plants	
		Pkt.	oz.	each	doz.
Cnicus Diacantha	Purple Chamapeuce	... 6d	3/6		
An ornamental foliaged plant.					

Cyclamen Persi-

cum Hybridum Cyclamen ...

All are familiar with this lovely greenhouse plant yet few know what a fine addition it makes to the border in shady places. It requires light loamy soil. Plants in 6 in. pots
 Young Plants 1/- each; 9/- per doz.
 Dry Corms 2/- each; 18/- per doz.

2/6 24/-

BOTANICAL NAME.	COMMON NAME.	Seed		Plants	
		Pkt.	oz.	each	doz.
Cyphomandra					
	Betacea Tree Tomato	...			2/6
A curious plant bearing pendant orange-coloured edible fruit.					

Delphiniums.

(*Delphinium hybridum*).

These charming plants provide numerous shades of blue, a colour that is all too scarce among flowers, and their great popularity is richly deserved. In them the results of careful selection and hybridisation are remarkably apparent. The striking columnar spikes of bloom are freely produced and the foliage is shapely and of pleasing character.

	Seed		Plants	
	Pkt.	oz.	each	doz.
Belladonna. —The original of this type, a grand blue Delphinium ...	1/6	36/-	8d	5/-

Deep scarlet, large heads.					
Dianthus Caryophyllus	Picotees, Selected	... 1/-	25/-	2/-	
This pretty type of carnation has been somewhat neglected owing to the craze for the American and other Tree varieties.					

Tree Carnations.

(*Dianthus caryophyllus*).

The development of this favourite flower is a remarkable demonstration of what can be done by careful selection continuously applied. There are now numerous very fine varieties to select from and we know of no more satisfying hobby than the cultivation of Tree Carnations, in which many amateurs have proved highly successful.

ANNUALS

and other

BEDDING PLANTS.

Our mild climate enables us to make full and free use of numerous annuals for autumn sowing which, under less favourable conditions, would have to be left over till spring. This means a great addition to our resources for winter gardening and, in the winter-rainfall area, it is a very distinct advantage, for a dry summer is not conducive to the best results in the flower garden. Our inland friends, on the other hand, can take advantage of their summer rainfall to grow a very wide range of bedding plants from spring sowings, or they can have a quicker start by obtaining seedlings raised by us. The following list gives a very wide range of useful bedding plants and will well repay careful scrutiny.

BOTANICAL NAME.	COMMON NAME.	Seed		Plants	
		Pkt.	oz.	doz.	100
Ageratum Mexicanum	Ageratum, "Blue Perfection"	6d	6/-	9d	5/-
Delightful blue flowering bedding plant for summer growing. Very free blooming, large-flowered and compact.

Bright, showy and free flowering annuals.					
Gaillardia	Grandiflora Gaillardia, Choice Mixed	6d	5/-	1/-	6/-
Although these are perennials, they flower exceedingly well the first season and are amongst the gayest of summer flowers.					

BOTANICAL NAME.	COMMON NAME.	Seed		Plants	
		Pkt.	oz.	doz.	100
Godetia Sp. ...	Godetia, Choice Mixed ...	6d	7/6	1/-	6/-
These continue blooming for a lengthy period and comprise a range of exquisite tints specially suitable for drawing room colour schemes.					
Gypsophila Elegans	Gypsophila, Mixed ...	6d	2/6	1/-	6/-
The most graceful of annuals, they are hardy and of rapid growth. For lightening up floral decorations they are unsurpassed.					
Gypsophila Elegans	Gypsophila, Snow White	6d	5/-	1/6	9/-
Large pure white flowers, a grand improvement.					
Helianthus Sp. ...	Sunflowers, Decorative Mixed	6d	7/6	1/-	6/-
Including Stella, Orion, Henry Wild, etc., all pretty single varieties for cut flowers.					
Helianthus Sp. ...	Sunflower, Manteca ...	6d	5/6	1/-	6/-
One of the best of the large-flowering type.					
Helianthus Sp. ...	Sunflower, Red ...	6d	2/6	9d	5/-
Unique shades.					
Helichrysum Sp. ...	Everlasting Flower, Choice Mixed	6d	5/-		
A very fine selection.					
Helipterum	Acroclinium, Roseum ...	6d	5/-		
Useful for cutting and drying as "Immortelles."					
Iberis Sp. ...	Candytuft, "Empress"	6d	5/-	1/-	6/-
White, large and long trusses of bloom.					
Iberis Sp. ...	Candytuft, Giant Hyacinth-Flowered	6d	7/6	9d	5/-
Immense spikes, pure white, selected strain.					
Iberis Sp. ...	Candytuft, Mixed ...	6d	4/6	9d	5/-
A fine selection of colours.					
Impatiens	Balsams, Camellia- Balsamina ...	6d	7/6	1/-	6/-
Of tender habit and should be transplanted when summer has commenced. They make a very effective display when set out in beds or clumps.					
Lavatera	Trimestris Annual Mallow ...	6d	1/6		
Red and white separately or mixed. They are very free-flowering, continuing in bloom for a long period during summer.					
Linaria Sp. ...	Toadflax, Mixed ...	6d	3/-	9d	5/-
Pretty and graceful for small beds and long borders.					
Lobelia Sp. ...	Lobelia, "Emperor William"	6d	15/-	9d	5/-
For dwarf edgings these are incomparable; planted 4 inches apart, they quickly make a continuous edging. Light blue.					
Lobelia Sp. ...	Lobelia, "White Perfection"	6d	15/-	9d	5/-
Splendid for interspersing with the blue variety.

BOTANICAL NAME.	COMMON NAME.	Seed		Plants	
		Pkt.	oz.	doz.	100
Mentzelia Lindleyi	Yellow Bartonias	... 6d	3/6		
A pretty annual with golden yellow flowers.					
Mimulus Moschatus	Musk Plant...	... 6d	15/-		
Sweet scented half hardy perennial. A favourite for pot growing.					
Nemesia Hybrida...	Nemesia Hybrids	...		1/-	6/-
This strain of carefully selected colours must prove of great value for exhibition purposes. A good bed of Nemesia is one of the most pleasing sights of a good garden.					
Nemesia Strumosa	Nemesia, Mixed	... 1/6	45/-	1/-	6/-
Perhaps our best spring annual. It affords an infinite variety of colours and is a most pleasing flower for table decoration.					
Nicotiana Sanderae	Flowering Tobacco,				
	Hybrids	6d	7/6	1/-	6/-
The best of garden flowering Tobaccos. The evening scent is carried a great distance.					
Nigella Sp.	... "Love in a Mist"	... 6d	3/6		
A bright cornflower-blue. This colour is seldom seen in annuals.					
Papaver Orientale	Oriental Poppy,				
	"Excelsior"	6d	15/-		
A very fine mixture. The colours range from delicate salmon to deep crimson.					
Papaver Rhœas	... Shirley Poppy,				
	Extra Selected	6d	4/-		
Charming mixture of this beautiful type in numerous colours.					
Papaver Sp.	... Pæony-Flowered Poppy	6d	2/6		
A choice mixture.					
Perilla Nankinensis	Perilla	... 6d	4/-	1/-	6/-
Ornamental bronze foliage-plants.					
Petunia	Petunias, Choicest				
	Grandiflora	Mixture	6d	1/6	9/-
For the dry summer months nothing stands better than an early planted bed of these beautiful plants treated as annuals. Our strain is well known for fine shading and substance of bloom. Blotches, stripes and lace-edged trumpets are included.					
Phlox Drummondii	Summer Phlox	... 6d	15/-	9d	5/-
This is the best bordering Phlox. A really fine mixture.					
Portulaca					
	Grandiflora	Portulaca, Double	... 1/-	25/-	1/- 6/-
Charming carpet-bedding plants for summer. They make a gorgeous display of colour and withstand the greatest heat and considerable drought. For border edgings and rock work they are also splendid. The flowers resemble nothing more closely than a miniature rose. They must surely be used in every summer garden.					

BOTANICAL NAME.	COMMON NAME.	Seed		Plants	
		Pkt.	oz.	doz.	100
Portulaca	Portulaca, "Kudu"				
Grandiflora	Special Mixed	6d	7/6	6d	3/6
A superb strain including the choicest colours in singles and a very good percentage of doubles.					
Pyrethrum Aureum	Golden Feather	... 6d	3/6	9d	5/-
A light golden-leaved edging plant making a charming setting for formal beds and also a useful border plant for its foliage effect.					
Reseda Odorata	Mignonette, "Machet"	6d	6/6	9d	5/-
This is the favourite Mignonette, never failing during summer and its scent is most fragrant. Selected stock.					
Salpiglossis	Salpiglossis, "Giant				
Grandiflora	Emperor," Mixed	1/-	2 1/-	1/3	7/6
Magnificent plants for specimen beds in lawns and for clumping in borders. In massed beds they are grand. The colours are almost indescribable, ranging from pink to yellow, brown to purple and sky blue to mauve, veined and blotched in a most wonderful manner.					
Salpiglossis	Salpiglossis, "Large-				
Grandiflora	Flowered," Mixed	6d	13/6		
A choice mixture with great variety of colours and venation.					
Scabiosa Sp.	...Scabious,				
	Annual Mixed	6d	3/6	1/-	6/-
A very fine bedding plant and most useful for cut flowers which are carried on long stalks and are admirable for vases. The plant shows to advantage if planted in clumps.					
Schizanthus	Butterfly Flower,				
Wisetonensis	"Snowflake,"	1/6		3/-	
"Snowflake" Schizanthus is a novelty, a great improvement on the older varieties. Its pure white flowers, with beautifully fringed edges are much larger than those of its progenitors. It is a splendid pot plant.					
Statice Sp.	... Sea Lavender,				
	Annual Mixed	6d	6/-	1/-	6/-
Fine annual "everlasting" flowers ranging through all shades of blue to white.					
Tagetes Erecta	... African Marigold,				
	Lemon & Orange,				
	Prize Strain	6d	15/-	1/-	6/-
Without doubt the finest exhibition strain extant.					
Tagetes Patula	... French Marigold,				
	Grandiflora Strain	6d	15/-	9d	5/-
A long straight or sinuous border edging of these makes a vivid and lasting impression. They are prettily striped orange and lemon shades and bronze blotched.

Crispa Grandiflora	Crested Zinnias	... 6d	10/6	9d	5/-
The flowers are crested and curled in a unique manner.					

"KATAKILLA"

Powder Insecticide Wash

READY FOR USE WHEN MIXED WITH COLD WATER.

For Green and Black Fly, Aphides of all kinds, Apple Sucker, Lygus Bug, Red Spider, Dolphin, Plant Lice, Woolly Aphis, Scale, &c., and it is also effective against Caterpillars, especially the Gooseberry Saw-fly Caterpillar. It is free from Arsenic or Nicotine, and fruit or vegetables washed with it are in no way injured for use. It is invaluable as a general wash for

FRUIT TREES and BUSHES, ROSES, PEAS, BEANS,
CABBAGES, CUCUMBERS, TOMATOES,
and ALL HARDY PLANTS.

It is harmless to the plant and harmless to those using it. This wash should be applied with a good powerful spray, and care taken to thoroughly wet in all parts the tree or plant that is being sprayed.

In cartons for 10 gallons, 2/-; in packets for 50 gallons, 5/-

No Messing nor Leakage. Best Aphicide for Roses, Cabbage, Tomato, Lucerne, &c.

SUPPLIED BY

C. STARKE & Co., Ltd., Mowbray, Capetown.

BULBOUS PLANTS.

In this section we include plants having bulbs, tubers, corms or rhizomes. Some of them are also mentioned in other sections of this catalogue when their nature justifies their inclusion under other headings. Most of them are sent out when the essential underground portion is in a dry or ripened state; but there are some which are never quite dormant while others can be moved with perfect safety when in active growth—we use our best discretion about these. All of them are plants of great interest and much pleasure is to be derived from their cultivation and study, while, as all the world knows, there are included among bulbous plants some floral gems of rare beauty and this may be said to apply more particularly to those that are of South African origin.

BOTANICAL NAME.	COMMON NAME.	Each	doz.
Agapanthus			
Umbellatus	African Lily, Blue & White	9d	7/6
See under Herbaceous Perennials (p. 65) for description of this beautiful plant.			
Alstromeria			
Aurantiaca	Peruvian Lily	... 1/-	9/-
Flowers golden-orange streaked with red. Excellent for hot positions and rockeries.			
Alstromeria Hybrida	Peruvian Hybrid,		
	Alstromeria	1/6	
A grand range of colours. The flowers are smaller than those of A. Aurantiaca and last well in water.			
Alstromeria Sp.	... Peruvian Lily,		
	"The Monarch"	3/6	
A beautiful clear orange-coloured variety. The flower is of splendid form, opens out well and lasts longer than the ordinary Peruvian Lily. A really fine thing.			
Amaryllis Belladonna	Belladonna or March Lily	... 9d	6/-
This beautiful flowering bulb is a native of South Africa. It produces its flowers at the end of summer before the leaves appear and here in its natural home it is a fine sight to see these blooms at the driest time of the year when other flowers are conspicuous by their absence.			
Extra large bulbs 1/- each.			
Anemone Coronaria	... Anemone, Giant		
	French, Mixed	2 for 6d	2/-
Our strain includes a fine range of colour and form.			
Anemone Coronaria	... Anemone, St. Brigid, Mixed	6d	3/-
The St. Brigid Anemones are a great improvement on the single varieties, having mostly semi double blossoms and being vigorous growers and free-flowering.			
Antholyza Nervosa	... Antholyza, Scarlet	... 1/6	13/6
A South African species producing magnificent scarlet flowers in the late summer. They are splendid.			
Antholyza Sp.	... Antholyza, Common Cape	6d	2/6
Useful for growing under the shade of trees where few plants will thrive.

9/-

A fine range of colours.

Named varieties 1/6 each.

Crinum Sp.

... Crinum

...

... 1/-

Beautiful evergreen bulbous plants worth growing even for the foliage. They like rich loamy soil and if well watered when actively growing, will give magnificent blooms.

Cyclamen Persicum

Hybridum Cyclamen

...

... 2/-

18/-

Lovely greenhouse plants, but they also make a fine addition to the border in shady places. They require light loamy soil. As pot plants they are superb.

Dahlias.

For the production of cut flowers and for a brilliant display of colour in the garden, Dahlias are unsurpassed. For beauty of form the Cactus varieties excel but there are those who still prefer the Fancy and Pompon varieties and they undoubtedly have very great decorative value. The newer single Collarette type is now also in great favour and some choice blooms are found among these.

Each doz.

Cactus Varieties.—Our collection includes all the best colours and we can offer a very pleasing assortment at 15/- per dozen and named varieties at ...

		1/-	10/-
Madame Monneret. —Delicate rose with splashes of a darker shade, very fine.			
		1/3	12/-
Marie Lemoine. —Creamy white with deeper shading and a purple blotch			
		1/-	10/-
Mrs. Francis King. —A vivid pink of great beauty giving an immense spike with usually 18 to 20 very large flowers			
		1/-	10/-
Niagara. —A rich nankeen yellow with carmine veining in the centre. The flowers are very large and the spike is strong and well filled			
		10d	8/6
Panama. —A deep rose self of great beauty and probably the best rose-coloured gladiolus. It has immense spikes of well expanded flowers			
		1/-	10/-
Peace. —A grand white with claret blotch and pale lilac feathering on the smaller petals. It is a strong grower, one of the very best			
		1/-	10/-
Pink Beauty. —Bright carmine-rose with deeper blotch. It is very early and one of the best for cutting			
		1/-	10/-
Willy Wigman. —Cream with delicate rose tints and large carmine blotch			
		1/-	10/-

Popular Hybrid Types.

		Each	doz.
Brenchleyensis Hybrids. —Brilliant scarlet with strong self-supporting spikes			
		1/-	10/-
Childsi Hybrids. —These are very strong growers with tall spikes bearing immense flowers in a wide range of colours, beautifully blotched, speckled and mottled in the throat			
		8d	6/-
Gandavensis Hybrids. —This race is valued for its exquisite colouring, including the most delicate shades and mixtures of white, cream, violet and red, etc. They are striped and blotched in a most beautiful manner			
		8d	6/-
Groff's Hybrids. —A grand strain. The flowers are exceptionally large and of great beauty			
		8d	6/-
Lemoine's Hybrids. —These are distinguished by a large golded-yellow blotch with borders of various shades of scarlet, purple, etc. on the lower petals			
		8d	5/-
Nanceanus Hybrids. —A fine race producing flowers of great size and brilliant colours, heavily spotted			
		8d	6/-
Primulinus Hybrids. —A new race of hybrids produced by crossing the beautiful primrose-yellow <i>Gladiolus primulinus</i> with some of the best garden varieties			
		1/-	10/-

GLADIOLI—*continued*.

Each doz.

Princeps Hybrids. —A magnificent hybrid with intense crimson scarlet flowers with touches of white. It is late-flowering				1/-	10/-
Meadowvale Mixture. —American hybrids. A very fine selection of various types				10d	7/6
Mixed Hybrids. —A choice mixture including some of the finest varieties				6d	4/6

Dwarf Varieties.

In over seas catalogues most of the dwarf types are described as early-flowering, but we think the term misleading for South Africa and from our experience we would suggest that most of the dwarf varieties will be found useful for spring planting to flower in summer after the larger types have finished blooming, thus providing a longer flowering period for these popular plants.

				Each	doz.
Blushing Bride. —White with beautiful carmine pink flakes				8d	6/-
Colvillei Alba (The Bride). —Pure white				8d	6/-
Crimson Queen. —Scarlet with violet blotch				8d	5/-
Queen Victoria. —A brilliant scarlet, flaked white				8d	5/-
Rosy Gem. —Beautiful rosy pink				8d	5/-

BOTANICAL NAME.	COMMON NAME.	Each	doz.
Gloxinia Hybrida ...	Gloxinias ...	1/3	12/-

These charming plants may be grown successfully in an ordinary cool shadehouse and their magnificent tubular, bell-shaped blooms, ranging in colour from ivory-white through all the shades of red to a deep crimson and including purple, violet, etc.—yellow and true blue have not yet appeared—spotted, shaded, marbled and blotched in a beautiful manner, well repay the moderate amount of attention they demand.

Larger corms 2/- each; 20/- per dozen.

Haemanthus Sp. ...	Maartbloem ...	2/-
Hippeastrum Hybridum ...	Amaryllis Hybrids ...	2/6

These beautiful plants are popularly known as "Amaryllis" although they do not belong to that genus from which they differ in that they may be kept growing throughout the year, whereas *Amaryllis* has a very definite resting period and its flowers appear before the leaves.

Hippeastrum Hybridum ...	Amaryllis, "Prince of Orange" ...	4/6
---------------------------------	--	-----

The colours vary from orange to red with white stripes. The blooms are large and bold, from four to six or more in an umbel. They are splendid for pot culture and also do well in the open ground.

Hyacinths.

Iris Ziphium ...	Spanish Iris, Mixed	2 for 6d	2/6
Bulbous Irises of many varied and beautiful colours.			
Iris Ziphium ...	Spanish Iris, Named Varieties	6d	4/6
Ten beautiful named sorts.			
Ixia Maculata ...	Yellow Ixias	6 for 6d	9d
Charming summer flowering bulbs which thrive remarkably in our hot climate. Per 100 4/6			
Ixia Sp. ...	Ixias, Finest Mixed	3 for 6d	1/6
Ixia Sp. ...	Ixias, Named Varieties	... 6d	3/-
Ixia Sp. ...	Ixias, Red	4 for 6d	1/-
Ixia Viridiflora ...	Ixias, Green	... 6d	4/6
A very striking species, the flowers being a soft sea green colour with a blackish blotch in the centre.			
Leucojum Aestivum ...	Cape Snowflake	2 for 6d	2/-
Pretty white, bell-shaped flowers, tipped green, several being carried on a scape about 1 ft. long.			

BOTANICAL NAME.	COMMON NAME.	Each	doz.
Lilium Auratum ...	Golden Rayed Lily of Japan	2/6	25/-
Magnificent ivory-white flowers of enormous size, with a bright yellow band down the centre of each petal and many deep purple blotches on the inner surface.			
Extra large bulbs 3/6 each.			
Lilium Auratum	Platyphyllum Giant Golden Lily of Japan	4/-	42/-
A larger type with broader leaves and immense flowers.			
The world's finest Lily.			
Lilium Candidum ...	White Madonna Lily	9d	7/6
A truly elegant bloom.			
Lilium Longiflorum	Formosum White Japanese Lily	2/6	25/-
A charming Japanese Lily with pure white, tubular flowers, sweetly scented and carried on stems 3 to 4 ft. high.			
The "Formosum" variety surpasses all others of this beautiful plant.			
Lilium Speciosum	Album White "Speciosum" Lily	2/6	25/-
A beautiful type of Speciosum Lily, pure white with red outside. The flowers produced by this popular Japanese Lily are really superb. The recurved petals are characteristic.			
Lilium Speciosum	Magnificum Japanese Lily, "The Mikado"	2/6	25/-
This gorgeous lily is of comparatively recent introduction and is considered the most beautiful of all the Speciosums.			
Lilium Tigrinum ...	Single Tiger Lily	1/-	9/-
Lilium Tigrinum Pleno ...	Double Tiger Lily	1/3	10/6
Narcissus Odorus ...	The Campenelle Jonquil	2 for 6d	1/6
Charming, sweetly scented flowers, splendid for cutting as they lend themselves well to artistic arrangement.			
Should be more largely grown.			

Poetaz Hybrid Narciss.

This splendid type of Narcissus well repays cultivation. They are hybrids from the small *N. Poeticus ornatus* and the best types of *N. Tazetta*. The flowers retain much of the character of the former but instead of only one on a stem, there are from two to eight or more according to variety.

	Each	doz.
Poetaz Elvira. —Large white flowers with yellow eye	6d	3/-
Poetaz Ideal. —White with orange eye, produces a large truss	6d	4/6
Poetaz Irene. —Primrose with fluted orange cup, large truss	6d	5/-
Poetaz Jaune a Merveille. —Soft yellow with a deep golden cup	6d	3/6
Poetaz Klondyke. —Yellow, deep golden cup, very fine	6d	4/-
Poetaz Triumph. —Pure white with deep yellow eye and the largest flowers in this class, 3 to 4 on a stem	6d	3/6
Poetaz Hybrids, Mixed. —Including the best varieties	...	3/-

Daffodils.

(*Narcissus pseudo-narcissus*)

Long Trumpet Varieties.

	Each	doz.
Beethoven. —Chrome yellow self, long stemmed and good foliage	2/-	
Conqueror. —Enormous flower, large and well expanded yellow trumpet, pale primrose perianth, long stem ...	2/6	
Emperor. —Enormous flower with brilliant yellow trumpet, a prime favourite	6d	4/-
Empress. —Similar to Horsfieldi but the petals are stiffer, a robust grower	6d	5/-
Fairy. —One of the earliest, a free-flowerer, widely expanded chrome yellow trumpet and sulphur perianth, long stem	9d	7/6
Golden Beauty. —A most striking variety with golden yellow trumpet and deep lemon yellow perianth, very early and stands prominent on a long stem ...	1/-	10/-
Golden Horn. —Very deep yellow trumpet, well expanded, lemon yellow perianth	1/-	10/-
Golden Spur. —Enormous flower with deep yellow trumpet, early and very fine	6d	4/-
Hoboken. —Deep golden yellow self, very early ...	8d	6/-
Horsfieldi. —Rich golden yellow trumpet and white perianth	6d	5/-
King Alfred. —The Giant Golden Trumpet Daffodil, flowers of great size and substance, intense rich gold, a great prize winner	5/-	
Lord Balfour. —A bicolor of splendid size and substance ...	1/-	10/-
Obvallaris. —Yellow trumpet, extra early ...	6d	4/-
Prince of Wales. —Enormous deep yellow trumpet, paler yellow perianth, broad petals	1/-	10/-
Princes Maximus. —Yellow trumpet with sulphur perianth, very large flower, early	6d	3/-
Silver Giant. —One of the best of the bicolors, large lemon trumpet, silvery white perianth, blooms stand well above the foliage	10d	8/6
Yellow Hammer. —Very large flower, golden yellow, quite distinct	9d	7/6
Finest Mixture of all Trumpets. —A remarkably fine collection	6d	3/-

Double Varieties.

Orange Phoenix. —"Egg and Bacon." White and orange	6d	3/6
Van Sion (Telamonius Plenus). —Large, pure golden yellow	6d	3/6

Polyanthus Varieties.

(*Narcissus Tazetta*)

Grand Primo. —White with primrose-yellow cup	3 for 6d	1/-
Paper White. —Pure white, a charming variety	... 6d	2/6

BOTANICAL NAME.	COMMON NAME.	Each	doz.
Moræa Iridioides ...	The Iris-like Moræa ...	1/6	15/-

A very useful species as it is almost always in bloom. The flowers are borne on a tall stem and open successively, so that a single stem may continue in bloom for many weeks.

BOTANICAL NAME.	COMMON NAME.	Each	doz.
Nerine Sarniensis ...	Nerina or Guernsey Lily ...	2/-	20/-

This beautiful South African species produces its flowers in our dry season before the leaves appear. The bright red blooms stand out conspicuously at a time when flowers are particularly scarce. Ten to twenty brilliant flowers are borne on a slender scape a foot or more in height and their sickle-shaped segments render the bloom highly attractive. We offer selected nursery grown bulbs of good size.

Ornithogalum

Arabicum Star of Bethlehem ... 2/-

A beautiful species from North Africa. The shining black ovary surrounded by the yellow anthers and creamy white petals make this a conspicuous flower.

Ornithogalum

Thyrsoides "Cape" Chinkerichee 2 for 6d 2/-

This is the early-flowering variety of the beautiful "Chinkerichee."

Ornithogalum

Thyrsoides "Darling" Chinkerichee ... 4d 3/-

The "Darling" variety flowers a few weeks later than the "Cape" variety but it is the most beautiful of the two. The flowers may be plucked when the buds have fully developed but before they have opened and will open beautifully indoors. Treated this way the blooms last as long as six weeks. The flowers carry well and, suitably packed, may be sent overseas quite successfully.

Pancratium Sp. ... Spider Lily ... 2/6

A white flowering bulb very suitable for pot culture but will also thrive in the open ground. The flowers, of which several are borne on a tall stem, are very interesting, always bursting towards evening at about the same time. The stamens are attached to a delicate cup-shaped membrane while the long narrow petals dangle below. Together they make up a remarkable bloom.

Ranunculus Asiaticus Double French Ranunculus

"Agatha."—Rose ...	2 for 6d	2/-
"Lady Campbell."—White with a touch of blue ...	2 for 6d	2/-
"Mikado."—Yellow ...	2 for 6d	2/-
"Mont Blanc."—Pure white, free flowering ...	2 for 6d	2/-
"Vesuvius."—Scarlet ...	2 for 6d	2/-
Finest Mixed.—A grand selection ...	3 for 6d	1/6

Ranunculus Asiaticus Double Persian Ranunculus

Splendid mixture. 2 for 6d 2/-

Ranunculus Asiaticus Double Turban Ranunculus

Finest mixture. 2 for 6d 2/6

Ranunculus Asiaticus

Superbissimus Ranunculus, Large-Flowered

Large single, semi double and double flowers of brilliant shades of colour.

Seed: 6d per pkt; 4/6 per oz.

Sauromatum Guttatum Monarch of the East ... 1/-

Useful for pot culture as the foliage is large and attractive.

Flowers do not appear until the bulbs have attained a large size but they are remarkable, being after the style

BULBOUS PLANTS.

99

BOTANICAL NAME.	COMMON NAME.	Each	doz.
of an Arum with greenish irregularly with deep purple.	yellow spathe blotched		

Sparaxis Tricolor ... Sparaxis, Finest Mixed 3 for 6d 1/6
Beautiful Freesia-like flowers in various colours.

Sprekelia

Formosissima Jacobae Lily ... 2/-

Also known as *Amaryllis formosissima*. This elegant flower is a brilliant scarlet colour and certainly one of the most beautiful of the *Amaryllids*. It must be seen to be appreciated.

Sternbergia Lutea ... Winter Daffodil ... 1/6 12/-

Also known as *Amaryllis lutea*. A charming plant having large bright yellow flowers.

Tritonia Aurea ... Golden Tritonia 3 for 6d 1/6

These produce golden-orange Freesia-like flowers of great beauty.

Tritonia Lineata ... Veined Tritonia 4 for 6d 1/-

Tritonia Pallida ... White Tritonia 4 for 6d 1/-

Watsonia Iridifolia ... Cream Watsonia ... 6d 4/-

A very pretty species with characteristic flowers, greenish ivory colour on opening and changing to cream as they mature.

Watsonia Marginata ... Kanol Pijpie ... 1/- 9/-

A fine species with beautiful, delicate pink flowers.

Watsonia Rosea ... Pink Watsonia ... 3d 1/6

Very showy.

Watsonia Rosea Alba Arderne's Watsonia ... 4d 2/6

This is the beautiful White Watsonia introduced into cultivation by the late Mr. H. M. Arderne.

Zantedeschia

Aethiopica Arum, Cape White ... 6d 4/-

This beautiful plant is very easily grown, the more so as it adapts itself to climatic conditions, growing in winter at the Cape and in Summer where that is the rainy season.

Zantedeschia

Childsiana Arum, Dwarf White ... 9d 7/6

A dwarf and very free-flowering form of the White Arum Lily. Specially suited for pot planting.

Zantedeschia

Devoniensis Arum, "The Godfrey" ... 1/- 9/-

A new type which we have not yet flowered.

Zantedeschia

Elliottiana Arum, Yellow ... 2/- 20/-

A beautiful species having dark green leaves with silvery spots and deep yellow spathe making a very showy flower.

Zantedeschia

Rehmanni Var. Arum, "The Swazi King" ... 3/-

A rare and beautiful variety, deep maroon.

Zephyranthes Candida Swamp Lily 3 for 6d 1/-

Also known as *Amaryllis atamasco*. Splendid for massing or for edging. The pretty white flowers among the narrow dark green leaves make a very fine display in mid-summer. They are very free-flowering.

Rockery Plants and Succulents.

This is a much neglected section of Gardening Practice—a defect which must be remedied if we are to do justice to the natural wealth of this class of ornamental plants to be found in South Africa which is the native home of numerous species of most interesting plants admirably suited to rockery work. Many Karroo plants are included in the list below, and with the growing interest attaching to these we hope to make it a most important section of our Catalogue in the near future. The present list is merely a beginning. We will undoubtedly add to it very considerably from time to time and will in due course be in a position to offer valuable collections for special work.

BOTANICAL NAME.	COMMON NAME.	Each	doz.
Agapanthus			
Umbellatus	African Lily, Blue and White	9d	7/6
See page 65 for description.			
Agave Americana	... American Aloe	...	2/-
Larger plants up to 10/6 each.			
Agave Americana	...		
Variegata	American Aloe, Variegated	2/6	
The American Aloes also make fine bold specimens for lawns and terraces. Larger plants up to 10/6 each.			
Albuca Sp.	... Tamarak	...	1/-
Interesting bulbous plants well suited to rock positions.			
Aloe Sp.	... Aloes	...	2/-
Fine South African plants, ideal for rock-work.			
A collection of six, distinct, for 10/6.			
Aloe Variegata	... Kannidood	...	2/6
Alstromeria Sp.	... Peruvian Lily, "The		
	Monarch"	3/6	
Makes fine specimens for rockeries, very conspicuous when in flower ; a rich gold.			
Alyssum Sp.	... Sweet Alyssum	...	9d
A dwarf, compact and free flowering plant.			
Amaryllis Belladonna	Belladonna or March Lily	9d	6/-
See page 90 for description. Large bulbs 1/- each.			
Apicra Bullulata	... Apicra, Blistered	...	2/6
Very interesting Karroo plants closely allied to the Aloes.			
Apicra Foliolosa	... Apicra, Small-Leaved	...	2/6
These Karroo plants are admirably suited to rock-work.			
Arctotis Sp.	... Goudsbloem	...	1/-
Beautiful Daisies of brilliant colours, including orange, red, wine and various shades of light fawn.			
Artemisia Stelleriana	"Dusty Miller"	...	3/6
Has beautiful silvery foliage. It requires stopping back to induce compact growth.			
Canna Hybrida	... Cannas	...	1/- 9/-
Named varieties 1/6. See page 91.			
Cotyledon Sp.	... Cotyledons	...	1/6

Yucca Sp.	.. Yuccas
Varieties of <i>Y. filamentosa</i> at 2/- 10 10/6 and <i>Y. gloriosa</i> at 10/6 each.			

Collections.

We make up special collections to suit your particular needs. State area to be covered and describe situation and we will select the plants that we consider most likely to succeed.

Price: 21/-; 42/-; 63/-; 105/- and 210/- per collection.

POT PLANTS.

Under this heading we are listing three groups, viz: Ferns and Fernlike Plants, Palms and Dracaenas, etc., and Other Pot Plants. In these three lists will be found all the most useful plants for indoor and stoep decoration and many of them are sufficiently hardy for outdoor planting after they have outgrown their useful sizes as pot plants.

Ferns and Fernlike Plants.

			Price, each		
			Sizes: 1st	2nd	3rd
Adiantum Assimile.	—A hardy type of Maidenhair for basket-work	2/6	3/6	4/6
„	Bauseii. —Very compact. Should be in every collection	3/6		
„	Capillus-Veneris. —British Maidenhair Fern. Dwarf-growing and hardy for rockery and stoep	1/6	2/6	
„	Capillus-Veneris Imbricatum. —Large deeply cut pinnules	3/6	5/-	
„	Capillus-Veneris Lambertiana. —A pretty fern with fine pinnules. Lambert's Maidenhair	2/6	3/6	5/-
„	Concinnum Flemingii. —Fleming's Maidenhair. Erect, fine for specimens indoors	3/6	5/-	7/6
„	Concinnum Latum. —Fine basket fern with drooping fronds	2/6	3/6	4/6
„	Cuneatum. —The best Maidenhair for hardy pot-work, fine for stoeps fairly sheltered from wind. Specimens: 10/-	2/-	3/6	5/6
„	Cuneatum Deflexum. —Fine compact habit	2/6	3/6	

FERNS—continued.

		Price, each		
	Sizes;	1st	2nd	3rd
Adiantum Cuneatum Elegans. —Fronds are very large and graceful. Specimens: 10/-	...	2/6	3/6	5/-
„ Cuneatum Mundulum. —Miniature Maidenhair. This is really pretty and suitable for pots to fit metal ware	...	3/6	5/6	
„ Cuneatum Sayersi. —Sayer's Cuneatum. Of fine appearance, long fronds suitable for floral vases, raised in South Africa, scarce	7/6			
„ Cuneatum Strictum. —Very erect	2/6	3/6	5/6

Larger; 3/6 each.			
Wistaria Multijuga	... Japanese Multijuga Wistaria		
We have imported a few of these fine creepers from Japan in three colours, Purple, White and Pink, but at the time of printing we are still unable to price them as they must be first acclimatised.			

CHOICE ROSES.

For your convenience in making a selection we are listing these in three groups, viz : Dwarfs, Climbers, and Ramblers, etc. Each group is in alphabetical order and any variety can thus be found with the minimum of trouble if the name and type are known.

Prices : Excepting those specially priced, all Roses in this list are 2/- each or 21/- per dozen. Those specially priced can be reckoned 3d less when included in a dozen.

Packing and Postage : 2/- per dozen, 1/6 per $\frac{1}{2}$ dozen, 1/- per $\frac{1}{4}$ dozen, 9d for less than $\frac{1}{4}$ dozen. This includes packing and postage within the Union of South Africa and South West Africa Protectorate.

Abbreviations used : (T) Tea Scented. (H T) Hybrid Tea. (H P) Hybrid Perpetual. (S) Single. (P) Pernetiana. (B) Bourbon. (N) Noisette. (C) Climbing.

Dwarfs.

Admiral Ward (H T).—This beautiful crimson-red bloom with fiery red and purple shading is of globular shape, large and full and the tree is of vigorous and freely branching habit. *Price 3/6 each.*

Alexander Hill Grey (T).—A highly perfumed bloom of perfect form, opens from a fine shaped bud and the plant is a vigorous and erect grower.

Archimede (T).—An old favourite, free grower and abundant bloomer. Pale flesh colour.

Betty (H T).—Old gold with silvery reflex. Gives a beautiful long bud.

Caroline Testout (H T).—Beautiful clear rose, large and full. It is of fine shape and altogether a splendid variety.

Clarice Goodacre (H T).—Very large and of excellent form and unique colour, biscuit-chrome on ivory-white petals. It gives fine long flower stems. *Price 3/6 each.*

Colonel R. S. Williamson (H T).—Large and well formed with petals of good substance, satiny white with deep blush centre.

Constance (P).—A vigorous plant with free-branching habit. It gives a large globular yellow bloom from orange-yellow bud slightly streaked crimson. *Price 3/6 each.*

Countess of Gosford (H T).—A well formed and sweetly scented bloom, deep salmon-pink with saffron yellow. Free bloomer.

Dean Hole (H T).—A grand rose, large silvery pink, free bloomer.

Dorothy Page Roberts (H T).—Unique colour, coppery pink suffused apricot yellow.

Duchess of Sutherland (H T).—A beautiful pink with lemon shading, large and full.

Duchess of Wellington (H T).—A most satisfactory rose to grow. It is free-flowering and gives beautiful long pointed buds of deep saffron yellow, stained crimson, changing to deep copper. At every stage the blooms are intensely beautiful and sweetly scented. *Price 2/6 each.*

Duchess of Westminster (H T).—Clear rose-madder, large and shapely blooms. It is a vigorous grower and free bloomer.

Edith Part.—A rich red suffused salmon and coppery yellow. Sweetly scented and a vigorous grower.

DWARFS—*continued.*

Entente Cordiale (H T).—Creamy white with a suspicion of carmine at the edges. Large, pointed bud and a full well formed bloom. A splendid rose.

Etoile de France (H T).—A velvety red with long pointed bud, large and full.

Florence Haswell Veitch (H T).—A brilliant scarlet with dark shading, excellent form, size and shape.

Florence Pemberton (H T).—A creamy-white with suffusion of pink. A splendid bloom.

Frau Karl Druschki (H P).—A most beautiful pure white rose.

F. R. Patzer (H T).—Creamy buff on delicate pink. Large, erect and of good shape and substance. A grand rose.

G. Amidi Hammond (H T).—Deep apricot shading to buff, large, full and of perfect form on erect stems. *Price 3/6 each.*

General McArthur (H T). A rose we can recommend, large, full and free-flowering. Bright crimson.

George C. Waud (H T).—Orange-vermilion, large, full and well formed. A free flowerer and a remarkable rose.

George Dickson (H T).—Remarkably strong grower producing very large, deep crimson, velvety blooms. It should be in every collection.

Gladys Holland (H T).—Buff, shaded orange, reverse soft rose and pearly peach. Free flowerer. Excellent. *Price 3/6 each.*

H. E. Richardson (H T).—A rich, deep, dazzling crimson. Free grower, large, full and shapely blooms.

His Majesty (H T).—Dark crimson, good size and shape, beautifully perfumed.

Homer (T).—Creamy yellow with terra-cotta edging. Splendid.

Hoosier Beauty (H T).—Rich velvety crimson with deeper shading and very fragrant, on erect vigorous stems. *Price 2/6 each.*

Hugh Dickson (H T).—A brilliant crimson with scarlet shading, strong grower. A charming rose.

Irish Elegance (S).—A bronzy scarlet bud with apricot tints when open. Very fine single.

Irish Fireflame (S).—Fine long bud, bright orange-crimson, sweetly perfumed, vigorous grower and free-flowering.

Janet (H T).—Very large and moderately full, delicate egg-yolk shading to salmon-flesh on very delicate pearly fawn. A beauty. *Price 2/6 each.*

Jonkheer J. L. Mock (H T).—Carmine changing to pink, large and full. It is a vigorous grower and carries its blooms on erect stems.

Kaiserin Augusta Victoria (H T).—Large, pearly white, lemon tinted. The best of its class.

Killarney (H T).—Pale flesh with pink reflex, large, full and of good form.

King George V. (H T).—Rich velvety crimson, suffused deep violet. A vigorous grower, sweetly perfumed.

K. of K. (H T).—Pure dazzling scarlet, huge petals, semi single, one of the finest decorative roses yet introduced. *Price 3/6 each.*

Kootenay (H T).—Primrose, profuse bloomer, good size, form and substance. It has vigorous and erect growth and is a magnificent rose. *Price 3/6 each.*

Lady Ashtown (H T).—Clear rose with silvery reflex, large, full and well formed.

DWARFS—*continued.*

- Lady Downe** (H T).—Buff, shading to deep yellow, large and well carried on upright stems.
- Lady Greenall** (H T).—Saffron-orange on creamy white ground, sweetly perfumed, robust grower and free bloomer. Very fine.
- Lady Hillingdon** (T).—A highly satisfactory rose, deep apricot-yellow, well shaped buds, does well and flowers abundantly. *Price 2/6 each.*
- Lady Plymouth** (T).—Deep ivory-cream, very free grower and flowers liberally, large, full and well formed. Excellent. *Price 2/6 each.*
- Lady Roberts** (T).—A very fine, deep apricot-yellow. One of the best.
- Lady Ursula** (H T).—Delicately perfumed flesh-pink flowers of good size and substance.
- La France** (H T).—Silvery rose, delightfully fragrant, an old favourite.
- La Tosca** (T).—A highly satisfactory rose, nearly always in bloom, silvery pink with deeper centre, large and full.
- Laurent Carle** (H T).—Bright crimson, shading to scarlet, large flower of good shape produced from a long pointed bud on erect stem. Sun-proof.
- Lieutenant Chaure** (H T).—Large and full flowers from a fine long bud, velvety crimson, deep petals.
- Mabel Drew** (H T).—A continuous bloomer and vigorous grower, well shaped, large, scented blooms, deep cream to canary yellow. A very useful rose.
- Madame Abel Chatenay** (H T).—Carmine-rose reflexed lighter, a prime favourite.
- Madame Bardou Job.**—Chrome-yellow to citron-yellow, fairly large bloom, very free flowering, useful garden and decorative rose. *Price 2 6 each.*
- Madame Edouard Herriot** (H T).—Coral-red bud, flowers medium size, opening wide, yellow and rosy scarlet, vigorous grower with green bronzed foliage. A grand decorative rose of rare beauty. *Price 2/6 each.*
- Madame Jules Grolez** (H T).—Well shaped bud, bright cherry-red. An excellent rose.
- Madame Lambard** (T).—Deep rose suffused coppery yellow. Free bloomer and a satisfactory garden rose.
- Madame Segond Weeber** (H T).—Salmon-rose with deeper centre, delicately shaded, large, with broad and stiff petals, shapely bud, free flowering. One of the best of its colour.
- Maman Cochet** (T).—Rose pink, large and full, a splendid rose.
- Margaret Dickson Hamil** (H T).—Maize-straw colour flushed with carmine on back, a beautiful colour contrast, large globular blooms on erect stems freely produced, deliciously fragrant. *Price 3/6 each.*
- Margarete** (H T).—A delicate soft pink, long buds opening to beautiful stiff petalled flowers of good size.
- Marie Adelaide** (H T).—Fine long bud on erect stems opening to a deep orange yellow flower of perfect form and sweetly scented. A prolific bloomer.
- Marie van Houtte** (T).—Lemon-yellow, bordered pink and streaked at times with carmine.
- Mary Countess of Ilchester.**—Crimson-carmine, large and attractive, sweetly perfumed.
- May Alexander Lippiatt** (H T).—Brilliant red, large and very full, strong, erect grower.

DWARFS—*continued.*

Miss Cynthia Ford (H T).—Rosy pink with lighter reverse, delicately shaded, large and full, fine form and fragrant.

Modesty.—Creamy white, large and full, exceptionally large petals, fine shape, pointed bud, splendid decorative and exhibition rose. *Price 3/- each.*

Mrs. Aaron Ward (H T).—Indian yellow, sometimes tinged with salmon-rose, large, full and a prolific bloomer.

Mrs. Amy Hammond (H T).—Ivory-amber with apricot tints, strong grower and free bloomer.

Mrs. Arthur E. Coxhead (H T).—Bright cherry-red, edges shaded scarlet, long pointed bud opening quite full, vigorous grower and free flowerer.

Mrs. Bryce Allen (H T).—Erect grower and exceptionally free bloomer, shapely bud, large and full bloom, madder-carmine-rose when fully open. *Price 3/- each.*

Mrs. Foley Hobbs (T).—Ivory-white faintly tinged with clear pink in delicate shades, large, well formed and delicately perfumed.

Mrs. Forde (H T).—Carmine-rose shading to rose-pink with chrome-yellow at the base, erect stems, vigorous grower, prolific bloomer and sweetly scented.

Mrs. George Shawyer (H T).—Brilliant clear rose, large, full and well formed with large petals of good substance, erect stems, free flowerer.

Mrs. H. Stephens (T).—White with pale pink and peach shadings in centre, strong grower and abundant bloomer, beautifully shaped flower and claimed by many to be one of the best white roses.

Mrs. James Lynas (H T).—Large, full and of splendid form, pearly pink with delicate rosy peach flush on yellow ground. Splendid. *Price 2/6 each.*

Mrs. Mackellar (H T).—Canary-yellow, large, beautifully shaped, vigorous growth, erect, profuse bloomer. A first class garden and show rose. *Price 3/- each.*

Mrs. Mona Hunting (H T).—Medium sized blooms, chamois-yellow opening to fawn, a charming decorative rose. *Price 3/- each.*

Mrs. T. Hillas (H T).—Pure chrome-yellow, large, full and cup-shaped, vigorous grower, profuse bloomer, long bud. *Price 2/6 each.*

Mrs. Wakefield Christie Miller (H T).—Shaded pearly blush to salmon, reverse clear vermilion-rose, very large, quite full and petals large and of good substance.

Ophelia (H T).—Salmon-flesh, shaded rose, excellent shape, erect stems, vigorous grower. *Price 2/6 each.*

Perle von Godesberg (H T).—Creamish yellow, orange centre, like "Kaiserin Auguste Victoria" in habit and form.

Prince de Bulgarie.—Deep rosy-flesh shading to salmon, large, full, a good exhibition rose.

Radiance (H T).—A real beauty, long bud, flowers erect and full, a profuse bloomer, carmine-salmon and opal pink, bright shades, sweetly scented.

Red Letter Day (H T).—Glowing scarlet-crimson of velvety appearance, profuse bloomer and does not fade, semi-double. A superb garden and decorative variety. *Price 3/- each.*

Rhea Reid (H T).—Cherry-crimson, large, full and of splendid form, erect stems, very fine.

Robin Hood (H. T).—Rosy-scarlet, full and well shaped, lasting bloom, very fine.

DWARFS—*continued*.

Sachsengruss (H T).—Resembles "Frau Karl Druschki" in habit and shape and size of bloom, satiny rose on white, centre of bud scarlet-rose. A superb variety.

Sunburst (H T).—Long pointed buds on long stems, large, full and well shaped blooms, cadmium-yellow with orange-yellow centre, prolific bloomer and deliciously tea-scented. Undoubtedly one of the best yellow roses.

White Killarney (H T).—A pure white sport from "Killarney."

White Maman Cochet (T).—A creamy white, large and full, with the habit of "Maman Cochet."

William Shean (H T).—Pure pink, very large, shell-shaped and of splendid form.

Yvonne Vacherot (H T).—Porcelain white with pink suffusion, a profuse bloomer of large size and good shape.

Climbing Varieties.

Cl. Caroline Testout (T).—A climbing form of the favourite "Caroline Testout." A charming variety.

Cl. Devoniensis (T).—Pale flesh, suffused rose, fine shape, a lovely soft-coloured variety.

Cl. Frau Karl Druschki (H P).—A sport from that well known and superb variety.

Cl. Kaiserin (H T).—Climbing form of that excellent rose "Kaiserin Augusta Victoria."

Cl. la France (H T).—Like the old and favourite "la France" excepting in habit of growth.

Cl. Madame Jules Grolez (H T).—An excellent climber, sport from the favourite old variety.

Cl. Malmaison (B).—A "Malmaison" of excellent climbing habit.

Cl. Maman Cochet (T).—Climbing sport from that favourite, "Maman Cochet."

Cl. Papa Gontier (T).—A vigorous form of its progenitor, "Papa Gontier."

Cl. Perle des Jardins (T).—An excellent climber produced as a sport from "Perle des Jardins."

Gloire de Dijon (T).—Salmon-yellow. A hardy, free-flowering climber of great merit.

J. B. Clark (H T).—A beautiful dark red, large bloom.

Lamarque (N).—Creamy white flowers produced in bunches.

Madame Berard.—Salmon-buff, large and full, a beautiful bloom.

Reve D'Or (N).—Deep yellow.

Souvenir de Madame L. Viennot (T).—Deep crimson-red, large and full, vigorous grower.

W. A. Richardson (N).—Deep orange-yellow.

Ramblers, etc.

American Pillar.—Large single flowers in clusters, a beautiful soft pink shade.

Aviateur Bleriot.—Double flowers of medium size in large clusters, delightful shading in saffron to golden yellow.

Banksia White.—Thornless branches of small double white flowers, climbing habit, sweetly scented.

Banksia Yellow.—Creamish yellow, otherwise same as "Banksia White."

RAMBLER ROSES—*continued.*

Dorothy Perkins.—Beautiful clusters of bright pink flowers. A very great favourite.

Dr. W. van Fleet.—Flesh-pink, large cup-shaped flowers with twisted petals.

Hiawatha.—Deep carmine with white eye, single flowers in great profusion. A truly brilliant Rambler.

Lady Gay.—Deep pink flowers in immense clusters.

Silver Moon.—Large silvery-white flowers, double, profuse bloomer, delightfully fragrant.

Trier.—Pale yellow with deeper centre. Of perpetual-flowering character.

Veilchenblau.—Semi-double flowers of large size produced in clusters, bluish purple to lilac-rose.

White Dorothy.—A white sport from that prime favourite "Dorothy Perkins."

Cuttings only.			
Pittosporum Tobira	Japanese Pittosporum	...	
An ornamental evergreen with white flower.			
Seed: per pkt 6d; oz 1/6; lb 13/6.			
Plants: 2/6 each; 25/- per dozen.			
Plumbago Capensis	Plumbago	... 21/-	
A vigorous and drought-resistant blue-flowering hedge plant. A pretty sight when in flower.			
Plants in single tins: 1/6 each.			
Populus Fastigiata	Lombardy Poplar	... 12/6	
A grand shelter or boundary hedge. Most suitable for damp ground. Cuttings only.			
Punica Granatum	Pomegranate	... 15/-	
A fine hedge giving attractive flowers and fruit. Quotation is for cuttings. (Plants: 2/- each; 20/- per dozen).			
Tamarix Gallica	Tamarisk	... 10/-	
A valuable hedge or shelter, hardy and drought-resistant, with pretty plumes of pinkish flowers. Cuttings quoted.			
(Plants: 2/- each).			
Tecoma Capensis	Kaffir Honeysuckle	...	
Very pretty at the flowering stage. It stands drought and wind.			
Plants: 7/6 per dozen; in tins 15/- per dozen.			

ORNAMENTAL SHRUBS

AND OTHER

PLANTS FOR THE SHRUBBERY.

BOTANICAL NAME.	COMMON NAME.	Sizes: 1st	2nd	Plants each
Abutilon Sp.	... Chinese Lantern Plant	... 2/6		
The improved types are richly veined and blotched, the double-flowering types being very beautiful.				
Amygdalus Communis	Flowering Almond	... 2/6	4/6	
Makes capital specimens for spring flowering.				
Aralia Sieboldii	Japanese Aralia	... 2/6	4/6	
Handsome leaves, broad, deep green and spreading.				
Arundinaria Falconieri	Ornamental Bamboo	... 3/6		
One of the most graceful of all Bamboos.				
Asclepias Tuberosa	... Tuberous-Rooted			
	Swallowwort	2/6		
Rich orange-flowered heads, in flower throughout summer.				
Azalea Amœna	... Azaleas	... 5/-	7/6	
Azalea Indica				
A fine range of colours in all sizes.				
Specimens: 10/6 each upwards. Matched pairs: 35/- to 95/-				
Barosma Betulina	... Buchu			
This species yields the best kind of "buchu" which is now in such great demand that its cultivation has been taken up seriously and growers no longer depend entirely upon the natural supply from indigenous plants.				
<i>Seed for 1920 has all been sold.</i>				
Barosma Serratifolia	Buchu			
Also known as "The Fontein Buchu" and "Olifants Buchu." Seed is very scarce and often unobtainable.				
Buddleia				
Madagascariensis	Madagascar Buddleia	... 1/6	2/6	
Long racemes of yellowish honey-scented flowers.				
Buddleia Variabilis				
Veitchiana	Veitchian Buddleia	... 3/6	5/-	
Cylindrical flower spike, tapering, 8 to 12 inches, rosy lilac, very fine.				
Callistemon Coccineus	Scarlet Bottle Brush	... 2/6		
Very showy when in bloom.				
Camellia Japonica	... "Japonica"	...	10/6	
Grafted plants in many colours.				
Specimens; 21/- to 50/- each; pairs 75/- to 100/-				
Cassia Floribunda	... Senna Bush	... 1/6		
A fine yellow-flowered shrub.				
Cassia Tomentosa	... Golden Senna	... 2/6	3/6	
Golden blossoms and beautiful foliage. In oak tubs 15/-				
Cercis Siliquastrum	... Judas Tree	... 2/6		
Hardy deciduous tree for lawn centres.				
Choisya Ternata	... Mexican Orange Blossom	... 2/-		
Scented like Hawthorn, very pretty shrub.				
Colocasia Antiquorum				
var. Esculentum	Elephant's Ears	... 3/6		
Coprosma Baueri	... Variegated Coprosma	... 3/6	5/-	
Beautifully graded yellow and green glossy leaves.				

BOTANICAL NAME.	COMMON NAME.	Plants each	
		Sizes: 1st	2nd
Coprosma Lucida ...	Glossy Coprosma	2/6	
Spreading branches and deep glossy green foliage.			
Cortaderia Argentea ...	Pampas Grass	2/6	
Well known plumed grass.			
Corynocarpus			
Laevigata	Karaka or Australian Laurel	5/-	10/-
Large vivid green leaves, grand bushy specimen when stopped.			
Cratægus Pyracantha	Fiery Thorn	3/-	
A Hawthorn; a fine sight when covered with its scarlet berries.			
Crotalaria Agatiflora	The New Canary Crotalaria	7/6	
A very fine shrub rapidly attaining a height of 8 to 10 feet and nearly always covered with long pendulous racemes of large pea-flowers of a delightful canary shade, carried in two distinct rows, the lip of each flower well recurved fully exposing the perfectly formed carina, the whole giving the appearance of a dozen or more canaries hanging on a slender branch. Average garden soil.			
Cuphea Platycentra ...	Scarlet Cigar Plant	2/-	
A pretty tubular scarlet flower.			
Cycas Revoluta ...	Cycad	7/6	10/6
Nothing equals Cycads for bold effect on lawns.			
Larger specimens: 21/-			
Cydonia Japonica			
Rubra Grandiflora	Japanese Flowering Quince	2/6	
A fine ornamental bush.			
Cyperus Papyrus ...	"Papyrus"	2/6	
Handsome for water margins or covering stand-taps.			
Cyperus Textilis ...	Cape Matjesgoed	1/-	
Makes useful tying material and quite ornamental.			
Cytisus Proliferus			
Albus	Tagasaste	1/6	2/6
A handsome white-flowering shrub.			
Seed: per pkt 6d; per oz 1/-			
Cytisus Scoparius			
Andreanus	Golden Bronze Broom	2/-	
The Andrean Genista. Very effective.			
Datura Suaveolens	Moonflower or		
Knightii	Angel's Trumpet	2/6	3/6
Long double trumpets of creamy-white flowers, strongly scented at eventide.			
Deutzia Crenata			
Flore Pleno	Bridal Wreath	2/-	3/6
Very pretty flowering shrub.			
Diervilla Florida			
Candida	Snow White Weigela	2/6	5/-
Very pretty shrub when in flower. (Larger: 7/6)			
Diervilla Florida			
Variegata	Variegated-Leaved Weigela	4/6	
Silver and green leaves, rosy flowers.			
Dombeya Sp. ...	White Dombeya	2/6	3/6
Lovely South African white-flowering shrub. A wealth of bloom in autumn.			

BOTANICAL NAME.		COMMON NAME.		Plants each Sizes: 1st 2nd	
Dracæna Indivisa	...	Dracæna or Sword Palm	...	2/6	5/-
Effective for path sides, points of lawns, etc.					
Larger: 7/6 to 21/- In oak tubs 20/- to 40/-					
Duranta Plumieri	...	Plumier's Duranta	...	2/6	
Forget-me-not-like flowers followed by yellow berries.					
Elæagnus Longipes	...	Japanese Oleaster	...	2/6	
Evergreen leaves with silvery reflex, edible orange berries in clusters.					
Euonymus Japonicus	...	Japanese Spindle Tree	...	2/6	
Deep green foliage.					
Euonymus Japonicus					
Albo-marginatus	...	White Edged Spindle Tree	...	2/6	3/6
Green and white leaves: evergreen.					
Euonymus Japonicus					
Aureus	...	Golden Spindle Tree	...	4/6	7/6
Very fine for borders and lawn specimens. In oak tubs 20/-					
Fuchsia Sp.	...	Fuchsia	...	1/6	2/-
In great variety.					
Gardenia Florida	...	Katjepiering	...	5/-	
Delightfully scented.					
Habrothamnus Sp.	...	Tree Fuchsia	...	2/-	
A beautiful Mexican flowering shrub. Various colours.					
Hardenbergia					
Comptoniana	...	Lilac Kennedy	...	2/-	
Not unlike Swainsonia, a pretty lilac-flowered shrub.					
Hardenbergia Sp.	...	White Kennedy	...	2/-	
Hibiscus Sinensis	...	Scarlet Trumpet Hibiscus	...	2/6	4/6
A brilliant object when in full bloom.					
Hibiscus Syriacus	...	Syrian Hibiscus	...	2/6	4/6
Double white and double mauve, Azalea-flowered.					
Hydrangea Hortensis	...	Christmas Flower	...	1/6	3/6
The hardy pink variety. In oak tubs 20/-					
Hydrangea Hortensis	...	Hydrangea, "Thos. Hogg"	...	2/6	
A beautiful pure white.					
Hydrangea Hybrida	...	Hydrangeas, New Hybrids	...	3/6	
Six distinct named varieties.					
Hypericum					
Moserianum	...	St. John's Wort	...	2/-	
Pretty yellow cup-shaped flowers.					
Jacaranda					
Mimosaefolia	...	Jacaranda	...	2/6	3/6
Handsome fern-like foliage and lovely light mauve flowers, a medium sized tree but may be trimmed to shrub form.					
Jacobinia Magnifica					
Carnea	...	Justicia	...	2/-	
Small, hardy shrub with terminal spikes of flesh-coloured flowers.					
Jasminum Primulinum	...	Jasmine, Semi-double	...	3/6	
Primrose-yellow, hose-in-hose, drooping branches, the best of the Jasmines.					
Jasminum Sambac	...	Jasmine, White	...	2/6	
A vigorous shrub					
Lagerstrœmia Indica	...	Indian Crepe	...	3/6	
Flowers of coral-crepe, a wealth of colour, most handsome flowering shrub. In oak tubs 20/-					

BOTANICAL NAME.		COMMON NAME:		Plants each Size: 1st 2nd	
Lantana Hybrida	... Lantana	...	2/-		
Lilac, white, scarlet and orange flowers followed by small berries.					
Ligustrum Aureum	... Golden Privet	...	2/-	3/6	
Unequalled for terraces, etc. In tubs 21/- pair					
Magnolia Grandiflora	Large-Flowered Magnolia	...			
See tree list.					
agnolia Sp.	... Deciduous Magnolias	...	5/-	7/6	
Very showy flowers appearing before the leaves.					
Larger: 10/6 to 21/-					
Melia Azederach	... Cape Lilac or Syringa	...	2/-		
Splendid for garden avenue work.					
Nerium Oleander	... Ceylon Rose	...	1/6	2/6	
Delightfully scented. White and pink varieties.					
Nerium Oleander	Variegatum Variegated Ceylon Rose	...	3/6	5/-	
Striped green and gold, very fine.					
Larger: 10/6					
Philadelphus	Coronarius Mock Orange	...	2/6	3/6	
Large, white, sweet-scented, very floriferous.					
Phormium Tenax	Variegated New Zealand				
	Variegata	Flax	2/6		
Alternate bands of green and gold running full length of leaves.					
Pittosporum Aurea	Variegata Variegated Pittosporum	...	7/6		
A lovely shrub for large borders.					
Pittosporum Tobira	... Pittosporum	...	2/6	3/6	
An ornamental evergreen with white flower.					
Portulacaria Afra	... Spekboom	...	1/6		
Succulent-leaved shrub.					
Cuttings: 10/6 per 100.					
Prunus Pissardi	... Cape Copper Beech	...	2/6		
Distinct and striking, wood and foliage reddish-purple.					
Prunus Pseudo-	Cerasus Japanese Flowering Cherry	...	2/6		
Seed: 6d pkt; 2/6 per oz.					
Raphiolepis Japonica	Indian Hawthorn	...	2/6	3/6	
Trusses of white flowers followed by black berries.					
Larger: 7/6. In oak tubs 20/-					
Ricinus Communis	... Castor Bean	...			
Quite ornamental in the shrubbery if judiciously placed.					
Seed: 6d per pkt.					
Sambucus Nigra	Golden Variegated-				
	Aureo-Variegata	Leaved Elder	3/6		
Prettily variegated and very striking.					
Spiræa Sp. (Antony	Waterer) Waterer's Spirea	...	3/6		
A fine shrubby plant with pretty pink heads of bloom.					
Strelitzia Reginae	... Cape "Bird of Paradise"	...	5/-		
Peculiar bird-like flowers, blue and gold, tinted orange.					
Splendid for water margins. In oak tubs 20/-					

SHRUBS, ETC.—*continued.*

Plants each

BOTANICAL NAME.

COMMON NAME.

Sizes: 1st 2nd

Sutherlandia**Frutescens** Cancer Bush

... 1/6

Scarlet-flowering evergreen South African shrub, very pretty effect.

Seed: 6d pkt; 5/- oz.

Swainsonia Sp.

... Australian Pea

...

Evergreen shrub with pink pea flower.

Seed: 6d pkt; 15/- per oz.

Syringa Vulgaris

... English Lilac

... 5/-

7/6

Grafted plants.

Tibouchina**Semidecandra** Lasiandra

... 3/6

Not unlike Clematis, large flowers of royal purple, leaves soft, downy and glaucous, a choice shrub.

Viburnum Opulus

... Guelder Rose

... 2/6

3/6

Balls of white flowers, very fine.

Viburnum Tinus

... Laurustine

... 2/6

3/6

A most useful and drought-resistant shrub with fine heads of creamy flowers.

Larger: 7/6. In oak tubs 20/-

Virgilia Capensis

... Keurboom

... 2/6

An indigenous evergreen leguminous shrub with sweet scented flowers ranging from lilac to violet in colour.

Per dozen: 20/-

FOREST AND ORNAMENTAL TREES.

BOTANICAL NAME.	COMMON NAME.	Seed per		
		oz.	$\frac{1}{4}$ lb	lb
Acacia Baileyana	... Bailey's Wattle	... 6d	1/3	3/6
A drought-resistant tree of great beauty. The most useful of the Acacias for ornamental purposes.				
Plants: 2/- and 3/- each; 20/- and 30/- per doz.				
Acacia Cultriformis	... Imbricated Acacia	... 6d	1/-	2/6
A very fine plant for lawn specimens, drought and frost resistant.				
Plants: 2/- and 3/- each; 20/- and 30/- per doz.				
Acacia Decurrens				
var. Dealbata	Silver Wattle	... 6d	1/3	
Useful where the Black Wattle will not grow as it is hardier, but the bark is not of equal value.				
Acacia Decurrens				
var. Mollis	Black Wattle	... 6d	1/-	
Produces the best tanning bark, succeeds on sour veld.				
Acacia Decurrens				
var. Normalis	Green Wattle	... 6d	1/3	
Closely resembles Black Wattle, but is more upright.				
Acacia Giraffæ	... Kameeldoord	... 6d	9d	1/6
An indigenous tree bearing a pod, similar to that of the Algaroba Tree, which is a highly nutritious fodder.				

BOTANICAL NAME.	COMMON NAME.	oz.	$\frac{1}{4}$ lb	lb
Acacia Melanoxylon ...	Blackwood ...	6d	1/-	3/-
Suitable for the cooler and moister parts of the Union and it requires deep soil. It is a useful shade tree and produces valuable timber.				
Plants: 1/6 and 2/6 each.				
Acacia Pycnantha ...	Golden Wattle ...	6d	1/-	
Another good variety for bark production.				
Acacia Saligna ...	Port Jackson Wattle ...			6d
Quick-growing and hardy. It makes useful tanning bark.				
Larger quantities: 25 lbs at 5d; 100 lbs. at 4d per lb.				
Apodytes Dimidata ...	White Pear ...	6d	1/3	4/-
An indigenous tree suited to the mist belt. It produces a valuable hard-wood largely used by wheelwrights.				
Araucaria Excelsa ...	Norfolk Island Pine ...			
Well known stately ornamental tree.				
Plants: 7/6 to 50/- each.				
Araucaria Imbricata ...	The Monkey Puzzle ...			
A very interesting ornamental tree.				
Plants: 50/- each (only large specimens at present).				
Callitris Arborea ...	Clanwilliam Cedar ...	6d	1/-	2/6
The tree of the Cedarbergen, Cape Province.				
Castanospermum	Australe Moreton Bay Chestnut ...			
A fine avenue tree of fairly rapid growth with spreading branches. Plants: 3/6 each.				
Casuarina	Cunninghamiana Beefwood ...	9d	2/-	5/6
A fine large shade tree. Thrives best near a stream.				
Plants: 25 for 4/-; 12/6 per 100; singles 2/-				
Casuarina Equisetifolia	Coast Beefwood ...	9d	2/-	5/6
Grows well in saline soil and valuable as a sandstay.				
Casuarina Tenuissima ...	Whistling Oak ...			
Suited to the coast belt.				
Plants: 2/- each; 20/- per dozen.				
Cedrus Atlantica ...	Mount Atlas Cedar ...			
Makes fine specimens for lawns.				
Plants: 7/6 to 20/- each.				
Cedrus Deodara ...	The Deodar Cedar ...	9d	2/-	6/6
A fine ornamental tree. Specimens: 21/- to 25/ each.				
Cedrus Libani ...	Cedar of Lebanon ...	9d	2/-	6/6
Slow-growing, but hardy and ornamental, excellent timber.				
Celtis Rhamnifolia ...	Camdeboo Stinkwood ...	9d	1/9	5/6
A handsome native tree. The wood is tough and much used for wagon tent bows (deciduous).				
Ceratonia Siliqua ...	Carob Bean ...	6d	9d	2/-
The seed pods make good cattle food.				
Cinnamomum Camphora	Camphor Tree ...			
Fine large shade tree. Plants: 2/6 and 3/6 each.				
Cryptomeria Japonica ...	Japanese Cedar ...	1/-	2/6	8/6
An evergreen timber tree of immense size.				
Plants: 10/6 and 20/-.				

BOTANICAL NAME.	COMMON NAME.	oz	$\frac{1}{4}$ lb	lb
Cupressus Arizonica ...	Arizonian Cypress ...	1/9	6/-	20/-
One of the best for the O.F.S., a rapid grower.				
Plants: 1/6 and 2/6 each; 15/- and 24/- per doz.				
Cupressus Lawsoniana	Lawson's Variegated Cypress			
Albo-Variegata				
Dwarf and compact, pretty specimens.				
Plants: 5/- to 15/- each.				
Cupressus Lawsoniana	Lawson's Cypress			
Hybrida				
Hybrids				
Admirable for lawn points and tubs.				
Plants: 5/- to 20/- each.				
Cupressus Macrocarpa	Macrocarpa Cypress ...	9d	2/-	6/6
An excellent windbreak, stock shelter and street tree.				
Plants 1/6 to 3/6 each; 15/- to 24/- per doz.				
Cupressus Sempervirens	Common Cypress			
var. Horizontalis (Spreading)				
Makes a durable timber for fencing poles. Hardy in the Karroo and does well in the O.F.S. and parts of Transvaal. Plants: 1/6 each; 15/- doz.				
Cupressus Sempervirens	Common Cypress			
var. Pyramidalis (Upright)				
The familiar tree of churchyards. Hardy in the Karroo.				
Plants: 1/6 each: 15/ doz.; larger 2/6 to 7/6 each.				
Cupressus Torulosa ...	Himalayan Cypress ...	6d	1/6	4/-
An excellent windbreak and stands the severest cold.				
Eucalyptus Amygdalina	Peppermint Gum ...	1/6	3/9	13/6
" Bicolor ...	Bicolor Gum ...	2/-	6/-	20/-
" Botryoides ...	Botryoides Gum ...	1/9	5/-	16/6
" Calophylla ...	White Flowering Gum ...	1/-	3/-	10/-
" Capitellata ...	Stringy Bark ...	1/6	3/9	13/6
" Citriodora ...	Lemon-scented Gum ...	2/-	6/-	20/-
" Cornuta ...	Yate ...	9d	1/9	5/6
" Cornuta				
var. Lehmanni Bush Cornuta Gum ...				
Plants: 13/6 per 100. Singles: 1/6 each; 15/- per doz.				
Eucalyptus				
Corynocalyx Sugar Gum ...				
Plants: 8/6 per 100; 60/- per 1000. Singles: 1/6 and 2/6 each; 15/- and 24/- per 100.				
Eucalyptus				
Diversicolor Karrie ...				
Plants: 2/- each.				
Eucalyptus Ficifolia ...	Crimson Flowering Gum ...	1/6	3/9	13/6
Ornamental foliage and large crimson flowers.				
Plants: 2/6 to 3/6 each; 25/- to 35/- per dozen.				
Eucalyptus Globulus ...	Blue Gum ...	1/-	3/-	10/-
Eucalyptus				
Gomphocephala Tuart ...				
... 1/6 3/9 13/6				
Eucalyptus Gunnii ...	Gunn's Gum ...	2/-	6/-	20/-
Plants: 1/6 each; 15/- per doz.				
Eucalyptus Maculata ..	Spotted Hickory ...	1/6	3/9	13/6
Plants: 8/6 per 100. Singles: 1/6 each; 15/- per doz.				

BOTANICAL NAME.	COMMON NAME.	oz	$\frac{1}{4}$ lb	lb
Eucalyptus Maidenii ...	Maiden's Gum	... 2/-	6/-	20/-
Plants: 15/- per 100; 125/- per 1000. Singles: 2/- each.				
Eucalyptus Melliodora	Yellow Box	... 2/-	6/-	20/-
Plants: 1/6 each; 15/- per doz.				
Eucalyptus Marginata	Jarrah	... 1/6	3/9	13/6
„ Occidentalis	Mallet Gum	... 2/6	9/-	32/6
„ Resinifera	Forest Mahogany	... 9d	2/-	7/-
„ Robusta	Swamp Mahogany	... 1/6	3/9	13/6
Eucalyptus Rostrata ...	Red Gum	... 1/-	3/-	10/-
Plants: 1/6 each; 15/- per doz.				
Eucalyptus Saligna ...	The Sydney Blue Gum	... 1/6	3/9	13/6
Plants: 1/6 each; 15/- per doz.				
Eucalyptus Salmonophloia	Salmon-Barked Gum	... 1/-	3/-	10/-
Eucalyptus Salubris ...	Gimlet Gum	... 2/6	9/-	32/6
Eucalyptus Sideroxylon	The Red Ironbark	... 1/-	3/-	10/-
Plants: 8/6 per 100. Singles: 1/6 each; 15/- per doz.				
Eucalyptus Sp. ...	Mixed Gums	... 1/-	3/-	10/-
Mixed Eucalypts for windbreaks and shelter belts.				
Plants: 7/6 per 100; 60/- per 1000.				
Eucalyptus Stuartiana	Stuart's Gum	... 2/-	6/-	20/-
Plants: 1/6 each; 15/- per doz.				
Eucalyptus Tereticornis	Forest Red Gum	... 1/-	3/-	10/-
Plants: 1/6 each; 15/- per doz.				
Eucalyptus Viminalis	Viminalis (Willow) Gum	9d	2/-	7/-
Plants: 1/6 each; 15/- per doz.				
Ficus Australis ...	Australian Rubber Tree...			
Similar to <i>F. Elastica</i> but leaves are not so bold. A fine street or shade tree. Plants: 3/6 and 5/- each.				
Ficus Elastica ...	India Rubber Tree	...		
A fine specimen tree with large, bold, deep green leaves. Plants: 5/- and 10/6 each.				
Ginkgo Biloba ...	The Maidenhair Tree	... 1/-	3/-	10/-
A highly ornamental tree producing edible nuts.				
Gleditschia Triacanthos	Honey Locust Tree	...	6d	1/6
Hardy against drought and frost.				
Grevillea Robusta ...	Silky Oak	... 1/6	3/9	13/6
Handsome ornamental tree with fernlike leaf.				
Plants: 2/6 and 4/6 each.				
Jacaranda Mimosæfolia	Jacaranda	... 1/6	3/9	13/6
An ornamental tree of great beauty and bearing gorgeous mauvy-blue flowers.				
Plants: 2/6 and 3/6 each.				
Juglans Nigra ...	Black Walnut	...	6d	1/-
Valuable timber tree. It prefers a soil not deficient in lime.				
Juniperus Virginiana	Pencil Cedar	... 6d	1/6	4/-
Slow-growing, but very hardy against drought and frost.				

BOTANICAL NAME.	COMMON NAME.	oz	1/2 lb	1 lb
Leucadendron				
Argenteum	Silver Tree	9d	2/-	6/-
Indigenous on the slopes of Table Mountain and well known for its beautiful silvery foliage.				
Plants: 2/6 each.				
Libocedrus	Decurrens			
Incense Cedar				
Only matched specimens in tubs, £5 per pair.				
Magnolia	Grandiflora			
A stately tree producing immense white flowers with citron-like perfume. Specimens: 10/6 each.				
Melia	Azedarach	6d	1/6	
... Cape Lilac or Syringa Tree				
A glorious avenue tree (deciduous). Its lovely blossoms are sweetly scented. Plants: 2/- each.				
Phytolacca	Dioica			
... Belhambra				
A large ornamental tree of rapid growth. Poultry are extremely fond of the soft succulent leaves which have been proved by analysis to be highly nutritive. By growing two or three of these trees a perpetual supply of green food may be provided for the birds.				
Plants: 1/6 and 2/6 each; 15/- and 25/- per dozen.				
Pinus	Canariensis	9d	2/-	6/6
... Canary Island Pine				
The most valuable timber of the Common Pines.				
Pinus	Densiflora	1/-	3/-	10/-
... Dense Flowered Pine				
Very attractive and useful tree, especially for Japanese Landscape Gardening.				
Pinus	Halepensis	6d	1/6	4/-
... Jerusalem Pine				
Hardy against frost and drought but likes winter rainfall.				
Pinus	Insignis	1/-	3/-	10/-
... Insignis Pine				
Large, handsome and quick-growing tree with fine-grained wood.				
Plants: 12/6 per 100. Singles: 1/6 and 2/6 each; 15/- and 25/- per dozen.				
Pinus	Longifolia	9d	2/-	6/6
... Chir Pine				
Good drought-resister. Probably better than <i>P. Insignis</i> and <i>P. Pinaster</i> for up-country planting.				
Pinus	Palustris	2/-	6/-	20/-
... Long-Leaved Pitch Pine				
Valuable timber tree; likes deep gravelly or sandy soil and a good rainfall.				
Pinus	Pinaster	6d	1/-	3/-
... Cluster Pine				
The forest pine of Cape Peninsula and its neighbourhood. A hardy variety, and can be sown on the permanent situation direct (15 to 20 lbs. per acre).				
Plants: 12/6 per 100. Singles: 1/6 and 2/6 each; 15/- and 25/- per doz.				
Pinus	Pinea			6d
... Stone Pine				
Naturalized in the Cape Peninsula. Good avenue tree.				
Pinus	Strobus			
... Weymouth's Pine				
Finest lawn pine, tall with graceful spreading branches, densely compact, with long pinnules.				
Plants: 7/6 each.				
Pinus	Thunbergii	1/-	3/-	10/-
... Thunberg's Pine				
A Japanese Pine with thick scaly bark; a fine timber tree.				

TREES.

127

BOTANICAL NAME.	COMMON NAME.	oz	$\frac{1}{4}$ lb	lb
Podocarpus Elongata	Bastard Yellow Wood	... 6d	1/-	3/6
Useful timber tree, requires shade, shelter and moisture.				
Podocarpus Macrophylla	Large Leaved Yellow Wood	1/-	3/-	10/-
An ornamental conifer with thick foliage.				
Podocarpus Thunbergii	True Yellow Wood	... 6d	1/-	3/6
Indigenous timber tree. Useful and ornamental.				
Plants: 3/6 each.				
Prosopis Juliflora	Algaroba or Mesquit Bean	1/-	2/6	7/6
A small and hardy tree yielding pods of high nutritive value and durable wood.				
Pseudotsuga Douglasii	The Douglas Fir	...		
A quick-growing and noble pine reaching as much as 200 feet and even more in Canada. Plants; 3/6.				
Quercus Pedunculata	Common Oak	...		6d
Quercus Suber	The Cork Oak	...		
A handsome evergreen with beautiful bark. It yields the cork of commerce. Plants: 2/6 each.				
Retinospora Pisifera Plumosa Aurea	Japanese Plumed Cypress			
A pretty light-coloured plummy cypress rarely seen here.				
Plants: 10/6 each. Specimens in tubs 42/-				
Retinospora Pisifera Squarrosa	Veitch's Japanese Cypress			
Dense heads of small glaucous pinnules; splendid for tubs; slow growing.				
Plants: 10/ and 15/- each. Specimens in tubs: 50/-				
Rhus Viminalis	Karree Tree	... 9d	2/-	6/-
A small hardy indigenous tree of the Karroo and other parts of South Africa.				
Robinia Pseudacacia	Robinia	... 6d	1/3	3/-
A hardy and drought-resistant tree; produces good fencing poles.				
Schinus Molle	Pepper Tree	... 6d	1/-	2/6
A very graceful tree.				
Plants: 1/6 and 2/6 each; 15/- and 25/- per doz.				
Sophora Japonica	Japanese Sophora	... 1/3	4/-	12/6
A leguminous ornamental tree with white flower (deciduous).

Insecticides, Fungicides, etc.

Arsenate of Lead Paste.—The right spray for Caterpillar, Codling Moth, etc. 1 lb 1/9; 4 lbs 6/-; 7 lbs 9/-

Bentley's Compound Liquid Quassia Extract.—For controlling Aphis in its various forms. A safe and reliable remedy. Per pint 2/9.

Bentley's Terrafumite.—For annihilating soil pests. Quite harmless to vegetation if used according to directions. Per 7 lb tin 3/-

"Capex" Sulphur-Lime Solution.—An ideal winter spray for deciduous trees and a highly efficient sheep dip. Per gallon 5/6; 5 gallon 21/-. Larger quantities, direct from the factory, quoted specially on application.

Katakilla.—A powder insecticide wash for Aphis of various kinds. It is harmless to the plant and non-poisonous, therefore most useful in the vegetable garden. Per 10 gallon pkt 2/-; 50 gallon pkt 5/-

Kudu-Formal.—For washing seed grain to prevent smut. See page 9 for full particulars. Per 1 lb bottle 5/-; 5 lb jar 21/-; 10 lb jar 37/6.

Macdougall's No. 2 Fruit Tree Wash (Nicotine-Soap).—Summer spray, very effective against Black Peach Aphis and similar pests, also used for Woolly Aphis and Australian Bug. Pint tins 2/6; per gallon 12/6.

Scalecide.—For scale on citrus trees, roses, etc. and a splendid winter spray for deciduous fruit trees. Quarter tin 4/-; half tin 7/6; large tin 12/6.

Soft Soap.—For making soap emulsion. Per 1 lb tin 1/3; 2 lb tin 2/-

Sulphur.—Ground rock sulphur for vines, also very useful remedy for mildew in roses. Per lb 7d; 12 lbs 5/6. Large quantities quoted specially for delivery direct from the factory.

Tobacco Extract.—Per 1 gallon tin 21/-.

Disinfectants.

"Kudolic".—Starke's High Grade Fluid Disinfectant, 18-20 carbolic co-efficient. The most economical of all disinfectants. Pints 3/3; quarts 5/3; per gallon 11/9.

"Kudu" Wood Preservative.—Preserves the wood and kills all vermin. Indispensable for poultry houses, etc. A sure cure for Tampans, Red Mite and other vermin on poultry by simply painting the wood-work once a year. Per gal. 7/9.

Pearson's Hycol (Blue Label).—No. 1 Fluid Disinfectant. Pints 3/3; quarts 5/3; per gallon 11/9.

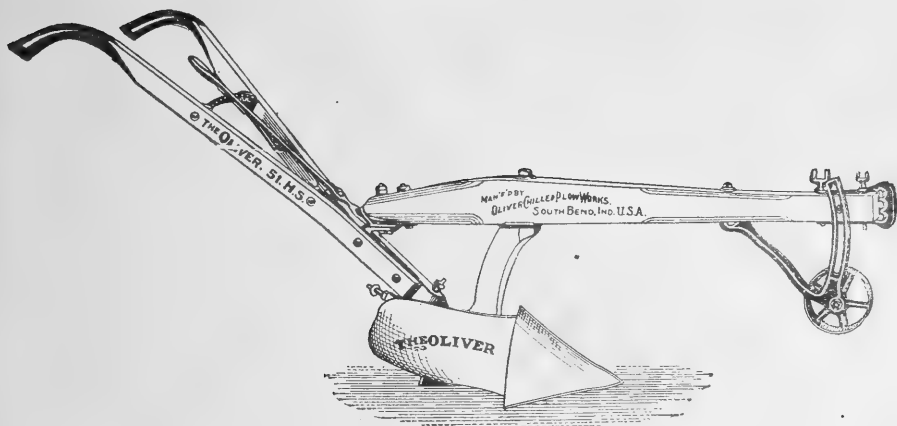

Pearson's Hycol (Yellow Label).—No. 2 Fluid Disinfectant. Pints 2/6; quarts 4/3; per gallon 9/6.

Solignum.—No. 2 Medium Brown. Per gallon 7/9.

Starke's "Antiflu" for Floors. Lays the dust! Kills the germ! Cleans the floor! Floors usually become a little dirtier each day, but if swept with "Antiflu" they are a little cleaner each day. It is indispensable for Warehouses, Shops and Showrooms and renders scrubbing unnecessary. It saves its cost in the merchandise it protects from the pernicious effects of the dust raised in sweeping without it. For Schools and Public Offices it is ideal. Try it! Price: 7/6 per bushel.

IMPLEMENTS.

The "OLIVER" No. 151 Reversible Plough (Formerly No. 51).

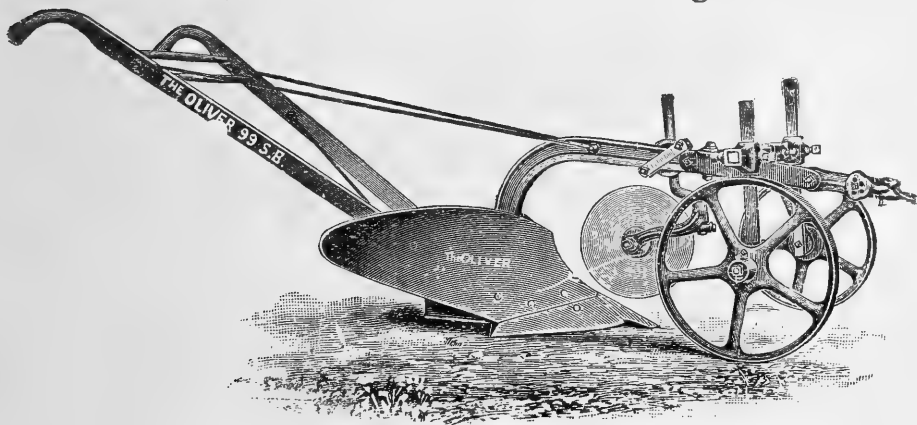

This is a light One-Horse Plough, excellently adapted for garden work. Supplied with wheel, wrench, and extra share.

Price: £4 10s. Capacity 4 x 8. Weight: 73 lbs.

Shares: 4/1 each. O. 151 S.B.

"OLIVER" Combination Plough.

The Favourite O.98 (Formerly the No. 98) Steel Beam Oliver Plough.

The o.98 is one of the most popular of the celebrated Oliver Ploughs, its great strength being a very desirable feature where it is subject to heavy strains and rough usage. The new bracings to the mouldboard are much appreciated, whilst iron handles are now supplied instead of wooden ones.

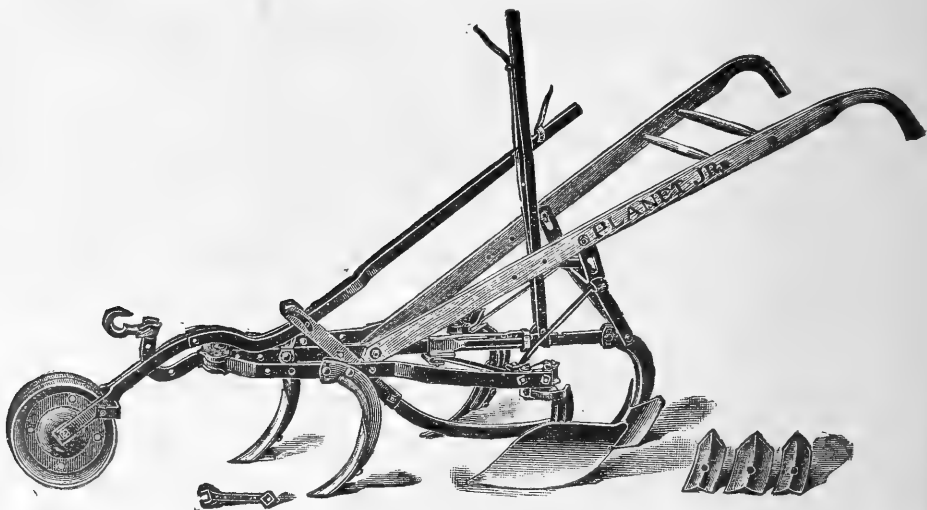

The reversible wings and slip points with which these ploughs are fitted, are very important items, as they are self sharpening, and therefore always in condition for first-class work. Steel points may be had for stony lands,

Turns a furrow 7 x 13. An extra point, wing and wrench with each plough.

Price: {	With Single Wheel £8 0 0
	„ Double Wheels £9 10 0
	Rolling Coulter (as illustrated), 40/- extra.	

No. 8 Planet Jr. Horse Hoe.

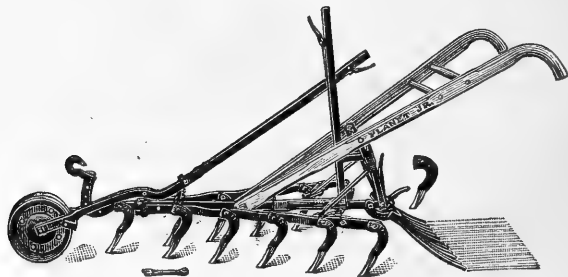

For Vineyards and General use.

Prices :

	£	s.	d.	Packed Weights.
No. 8 (as in cut) ...	7	2	6	74 lbs
No. 9 (expanding lever only) ...	6	7	6	64 lbs
No. 4 (no levers) ...	5	15	0	57 lbs

Planet Jr. Twelve-Tooth Harrow, Cultivator and Pulveriser.

This tool has rapidly grown in favour with strawberry growers, market gardeners and farmers because the twelve chisel-shaped teeth do such thorough work, and because the tool is so convenient, durable and strong. The teeth and pulveriser leave the ground in the finest condition, and the operator can set the tool exactly to any depth desired making delicate work not only possible but very easy.

Improved braces enable one to change the handles in height to suit boy or man, and also **sidewise**. It is a great advantage to be able to move the handles to one side when cultivating blackberries, raspberries, vines, hops, etc., saving the hands, the clothes and the crops. **The expander works with ease, yet holds the tool thoroughly rigid.**

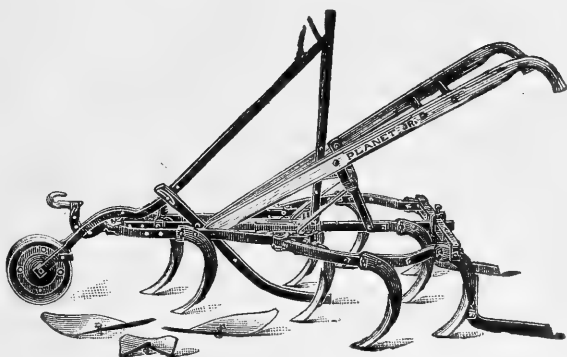

Complete (with Pulveriser), £6 7s. 6d. Without Pulveriser, £5 10s.

Weight, complete 70 lbs.

Planet Jr. Nine-tooth Horse Hoe.

This tool is made by attaching two extra side bars to our No. 8 Horse Hoe (each carrying two teeth and a depth regulator), and a middle bar extension and truss expander. The tool leaves no open furrows next to the row.

Complete attachment, fitting any of our horse hoes. Price, £3 17s. 6d.

Lighter attachment for adding two teeth only, 26/3

Price as fitted in cut, £11 5s. Weight (packed) 131 lbs.

Planet Jr. Combined Seed and Fertilizer Drill.

The No. 21 Two-Wheel Drill.

Price £7 10s.

Packed weight
95 lbs.

No. 21 meets the demand for a drill to sow seeds and fertilizers at the same time. **This tool** may be used to sow seed only, in either hills or drills, as desired; or to sow fertilizers only; or to sow both together. Its work is equally perfect when used in any of these ways. It sows all garden seeds in hills, 4, 6, 8, 12 or 24 inches apart, or in drills, and also fertilizer, placing it above or below the seed as desired. **The quantity** is regulated by the patent feed rod and index at the top of the handle. **The seed hopper** holds two quarts; the fertilizer hopper four quarts.

No. 21, though performing a double service, does not run too hard for the work accomplished. The parts are galvanized and the whole get-up is a desirable one.

All adjustments for thickness are easily made from between the handles.

No. 16.—Planet Jr. Single Wheel Hoe, Cultivator, Rake and Plough.

We offer these Single Wheel Hoes as the highest type of their class. They have an assortment of tools which adapts the implement to a large variety of work, and there is scarcely any garden culture of which they are not capable.

Nos. 16, 17, 17½ and 18 wheels and frames are alike, but the tools sold with each vary. Thus the No. 17 is not supplied with rakes, the No. 17½ has neither rakes nor plough; whilst the No. 18 has only two hoes and no other tools.

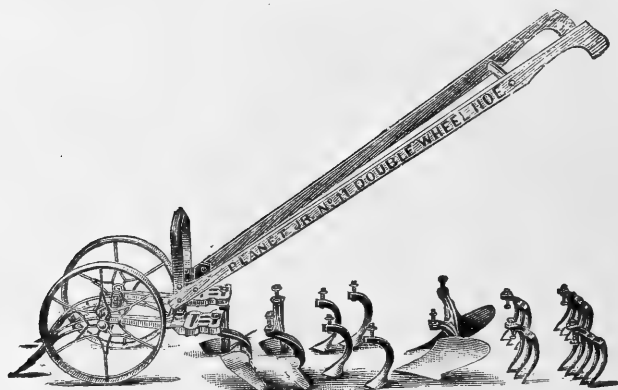

Prices :

No. 16	62/6
No. 17	57/6
No. 17½	50/-

No. 11.—Planet Jr. Double Wheel Hoe.

The Planet Jr. Double Wheel Hoes are the greatest cultivating tools in the world for the Onion and small Sugar Beet grower, and also for every grower of garden crops from drilled seed. They do more, and do it better and easier than can possibly be done in any other way, where rows are too close for horse work.

Nos. 11, 12 and 13 wheels and frames are alike, but the tools supplied with each vary. No. 11 has the attachments shown in the illustration. No. 12 has only one pair each of rakes and hoes, otherwise as illustrated. No. 13 has 1 pair hoes and no other tools.

Prices :

	£	s.	d.
No. 11	4 15 0

28 lbs

No. 4.—Planet Jr. Combined Hill and Drill Seeder, Wheel Hoe, Cultivator and Plough.

This tool combines in a single implement a Hilddropping Seeder, dropping seed 4, 6, 8, 12, or 24 inches apart, a Continuous Row Seeder, a Single Wheel Hoe, a Furrower, a Wheel Cultivator, and Garden Plough. A most complete tool for all kinds of garden work, accomplishing as much work in one hour

as would require half a day by older methods.

Price, as shown, £6 5s. od. Packed Weight, 47 lbs.

NORCROSS GARDEN CULTIVATORS.

The finest Hand Cultivator ever designed.

Prices : Each

No. 33—3-Prong - 6/6

No. 55—5-Prong - 8/6

No. 11—Midget - 3/3

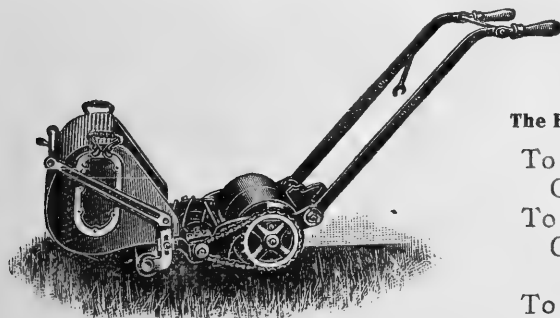

The Empire Garden Rake and Cultivator.

The Empire Garden Cultivator with its oblique teeth and specially turned prongs is an entirely new creation in Cultivators.

Push it from you or pull it towards you and it turns the soil in two directions. A **double action** that quickly breaks up clods and puts the ground in excellent condition for seeding and planting.

Price, with handle, 4/3 each.

Green's Patent "SILENS MESSOR" Lawn Mowers.

The Highest Grade Roller Machine made

To cut 8 in. ... £10 10 0

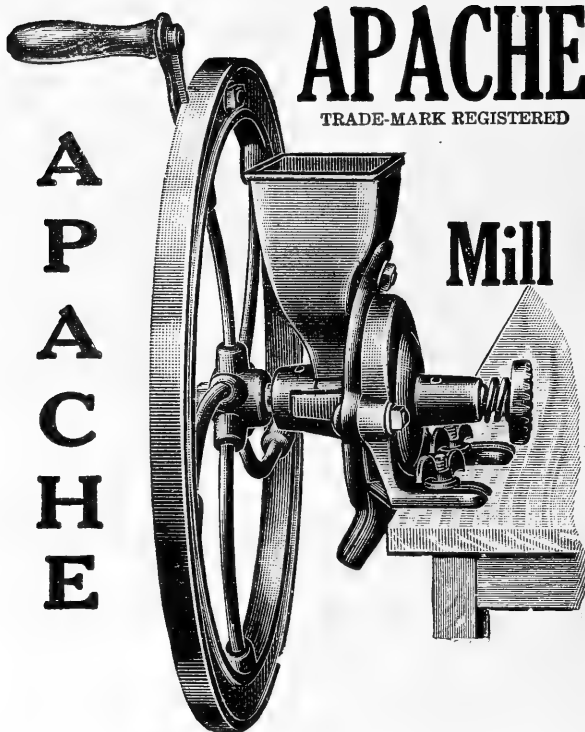

Can be worked by a lady.

To cut 10 in. ... £12 17 6

Can be worked by a strong youth.

To cut 12 in. ... £15 12 6

Can be worked by a man.

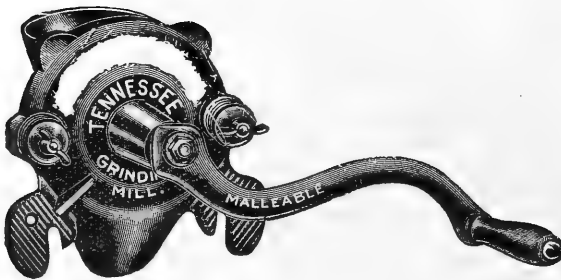

The "Apache" Mill will grind successfully all dry grains such as mealies, wheat, rice, coffee, etc. It grinds rapidly, and may be adjusted to turn out a fine or coarse sample. The Grinding Plates may be taken out, for cleaning or replacing, without difficulty, and the Handle is adjustable for shorter or longer leverage. The Fly Wheel is so constructed as to give the maximum of momentum with the minimum of weight.

The "Apache" Mill will save its cost in a very short time on any farm, or in any household where grain is ground.

Weight, 31 lbs. Price, 57/6

"Tennessee" Mealie Grinder.

The "Tennessee" is a small but exceedingly useful Grinder. It can be adjusted so as to produce either coarse or fine meal, and can be readily fixed in almost any position by means of clamps.

Weight, 12 lbs.
Price 22/6

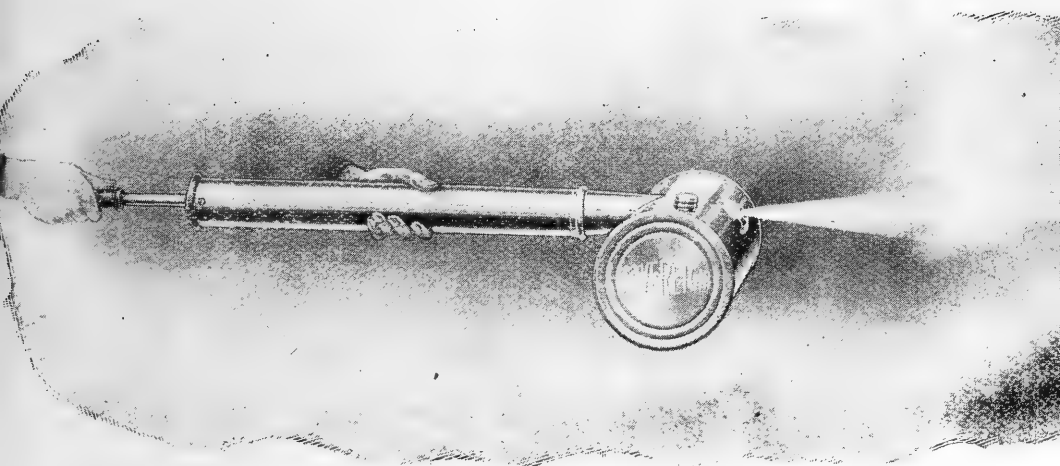

"Black Hawk" Mealie Shellers

The "Black Hawk" is a low-priced machine which lasts and does its work well. It is all a farmer requires for shelling mealies for home use. Its bearings are long and thoroughly chilled, and it is largely made up of malleable iron parts, rendering breakages unlikely. The machine is simple and easily adjusted, and its construction is such that it cannot choke or clog.

Weight, 15 lbs. Price, 21/-

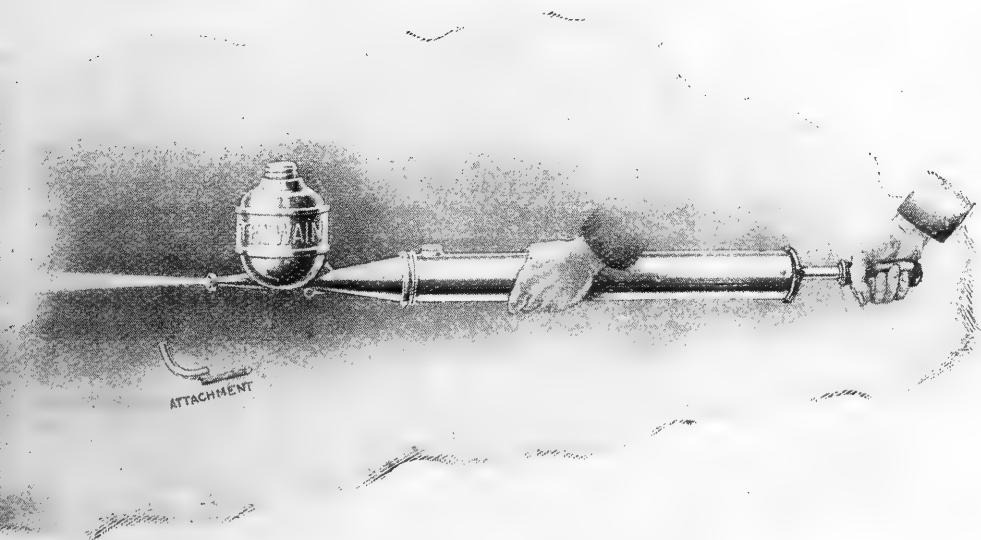

The "Sovereign" Sprayer.

For spraying Liquid Insecticides and Disinfectants for Horticultural, Domestic and Hospital use.

Stock Foods

"KUDU" CALF MEAL

A reliable milk-substitute. It grows big healthy calves.

"KUDU" DAIRY MEAL

A great milk producer because it is a balanced ration.

"KUDU" CATTLE LICK

Prevents unnatural craving for bones, rags and other dangerous articles.

Poultry Foods

STARKE'S POULTRY MEAL

Brings **more eggs** and induces the utmost vigour in the Stock Birds. Suitable for wet or dry mash.

STARKE'S MIXED POULTRY GRAIN

A properly balanced mixture which will keep the birds in the best of health and **make poultry pay**.

STARKE'S "CHIX" FOR CHICKENS

The Universal Chicken Food. A grain and seed mixture made in three grades. Can be fed from shell to maturity. It makes strong bone and plenty of muscle.

STARKE'S CHICKEN MEAL

A properly balanced meal mixture for chickens. It may be fed either as a wet or as a dry mash.

STARKE'S MIXED POULTRY GRIT

A **Super-Health Grit**. It tones up the system and maintains the digestive organs in good working order.

STARKE'S MIXED BIRD SEED

A properly formulated mixture for all seed-eating cage birds.

STARKE'S PARROT FOOD

All ingredients are in the right proportion like our other mixtures.
